Exploring The West:

Exploring the West Charles River, 2023-11-26 The Louisiana Purchase encompassed all or part of 15 current U S states and two Canadian provinces including Arkansas Missouri Iowa Oklahoma Kansas Nebraska parts of Minnesota that were west of the Mississippi River most of North Dakota nearly all of South Dakota northeastern New Mexico Northern Texas the portions of Montana Wyoming and Colorado east of the Continental Divide and Louisiana west of the Mississippi River including the city of New Orleans parts of this area were still claimed by Spain at the time of the Purchase In addition the Louisiana Purchase contained small portions of land that would eventually become part of the Canadian provinces of Alberta and Saskatchewan The purchase which doubled the size of the young nation comprises around 23% of current American territory The purchase allowed Jefferson to plan something he had talked about since taking office an expedition deep into the unmapped and largely unknown continent with the final destination being the Pacific Ocean This could prove the most significant of the goals that Jefferson a person who thought of himself as a scientifically minded thinker wanted to accomplish as president Though he knew he had bought a huge amount of land Jefferson wasn't entirely sure of what he had bought so he asked a team led by Meriwether Lewis and William Clark to traverse the continent until they reached the Pacific studying everything from the ecology to geography along the way to get an understanding of the country's new region Lewis and Clark would find far more than they anticipated The 33 men who made the trip came into contact with about two dozen Native American tribes many of whom helped the men survive the journey and along the way they met and were assisted by the famous Sacagawea who would become one of the expedition's most famous participants Though they suffered deaths on their way west the group ultimately reached the Pacific coast and got back to St Louis in 1806 having drawn up nearly 150 maps and giving America a good idea of much of what lay west In the aftermath of the Louisiana Purchase the Lewis and Clark expedition was a much heralded blow for American rights in the face of international competition but that was only one of four expeditions authorized by Jefferson Given that Lewis and Clark remain so famous it was inevitable that the other American explorers would be overlooked particularly William Eaton the hero of the Battle of Derna in the Barbary Wars and Zebulon Montgomery Pike the explorer of the Mississippi Most of the most notable frontiersmen traveled immense distances during their careers and for many only distant memories could recreate the routes taken Few of the significant wilderness figures were experienced as cartographers to create accurate maps for industry settlement and the military These American frontiersmen made first contact with numerous indigenous tribes in virtually every area of the west but viable maps were few For example historians believe that even Jim Bridger's prodigious travels were eclipsed by that of New York born Jedediah Smith whose uncharacteristic personal life set him apart from the rough edged mountain man reputation Of all the legends and folk heroes who lived in the 19th century men such as Daniel Boone and Davy Crockett few actually accomplished as much as Kit Carson A frontier boy who hopped onto the Santa Fe Trail as a teen Carson became the

quintessential mountain man during the 1830s and was literally a trailblazer for John C Fremont s historic expeditions through the West in the 1840s Today Fremont is best known for leading five expeditions west three of which were official U S expeditions and two of which were private On his third official expedition he was given secret instructions for when he reached California

Voyage of Rediscovery John Krist,2004 More than

two centuries ago President Thomas Jefferson sent a hardy band of explorers on an unparalleled voyage of discovery across uncharted America. Members of the Lewis and Clark expedition were the first U.S. citizens to cross the Continental Divide, the first to reach the Pacific by land, the first to map the landscape that would someday become central to the nation's identity. They also were the last to describe the West before it underwent radical change at the hands of traders, trappers, soldiers, and settlers. As the 2003-2006 bicentennial of the expedition approached, veteran journalist John Krist set out to retrace the explorers' path, hoping to answer a few deceptively simple questions: What is it like on the trail today? What was it like 200 years ago? What can we learn about the West and about the nation itself by examining it through the unique lens of the explorers' journals and letters? *Voyage of Rediscovery* interweaves tales from the trail with analysis of some of the most compelling environmental issues facing the region. Mixing adventure, history, science, and sorrow, it paints an evocative portrait of the modern American West and the people who call it home. —*Mary Kingsley*

Exploring West Africa Sebastian Hale, Kingsley challenged Victorian norms by exploring West Africa solo. Her observations of local customs and ecosystems added nuance to Western views of Africa. —*Exploring the American West, 1803-1879*, 1982
