## **Exploring Translation And Multilingual Text Production Beyond Content:**

Exploring Translation and Multilingual Text Production Erich Steiner, Colin Yallop, 2013-02-06 The series serves to propagate investigations into language usage especially with respect to computational support This includes all forms of text handling activity not only interlingual translations but also conversions carried out in response to different communicative tasks Among the major topics are problems of text transfer and the interplay between human and machine activities

**Cross-Linguistic Corpora for the Study of Translations** Silvia Hansen-Schirra, Stella Neumann, Erich Steiner, 2012-12-06 The book specifies a corpus architecture including annotation and querying techniques and its implementation The corpus architecture is developed for empirical studies of translations and beyond those for the study of texts which are interlingually comparable particularly texts of similar registers The compiled corpus CroCo is a resource for research and is with some copyright restrictions accessible to other research projects Most of the research was undertaken as part of a DFG Project into linguistic properties of translations Fundamentally this research project was a corpus based investigation into the language pair English German The long term goal is a contribution to the study of translation as a contact variety and beyond this to language comparison and language contact more generally with the language pair English German as our object languages This goal implies a thorough interest in possible specific properties of translations and beyond this in an empirical translation theory The methodology developed is not restricted to the traditional exclusively system based comparison of earlier days where real text excerpts or constructed examples are used as mere illustrations of assumptions and claims but instead implements an empirical research strategy involving structured data the sub corpora and their relationships to each other annotated and aligned on various theoretically motivated levels of representation the formation of hypotheses and their operationalizations statistics on the data critical examinations of their significance and interpretation against the background of system based comparisons and other independent sources of explanation for the phenomena observed Further applications of the resource developed in computational linguistics are outlined and evaluated

**Evaluating the Evaluator** Hansjörg Bittner, 2019-11-28 This book offers a theoretical framework for assessing translation quality grounded in supportive argumentation The volume outlines a systematic framework for translators and translation critics to substantiate their decisions and judgments on a translation's quality and in the case of negative criticism put forward a more effective translation solution The book traces the decision making process underpinning translation practice considering the different factors surrounding a particular translation to inform the most appropriate translation strategy such as the temporal and geographical relationship between source and target texts special provisions required by clients timeframe qualifications and sociocultural and political issues The framework posits that such factors should underpin any arguments used by the translator in adopting a given strategy and in turn that any criticism of a translation's quality must be in line with the same argumentative structure Applied to a corpus of translation examiners

reports of translation the book demonstrates how this framework can act as a tool to be scaled to fit the needs of the different actors of a translation translators critics and scholars This book will be of interest to scholars in translation studies and practicing translators *Empirical Evidences and Theoretical Assumptions in Functional Linguistics* Elissa Asp,Michelle Aldridge,2022-07-28 This collection explores the relationships between theory and evidences in functional linguistics bringing together perspectives from both established and emerging scholars The volume begins by establishing theoretical common ground for functional approaches to language critically discussing empirical inquiry in functional linguistics and the challenges and opportunities of using new technologies in linguistic investigations Building on this foundation the second part of the volume explores the challenges involved in using different data sources as evidence for theorizing language and linguistic processes drawing on work on lexical cohesion in language variation neuroimaging and neuropathological data and keystroke logging and eye tracking The final section of the volume examines the ways in which evidences from a wide range of data sources can offer new perspectives toward challenging established theoretical claims employing empirical evidences from corpus linguistic analysis keystroke logging and multimodal communication This pioneering collection synthesizes perspectives and addresses fundamental questions in the investigation of the relationships between theory and evidences in functional linguistics and will be of particular interest to researchers working in the field as well as linguists working in experimental and interdisciplinary approaches which seek to bridge this gap *The Dancer and the Dance* Chan Sin-wai,2014-10-17 The Dancer and the Dance is a collection of thirteen essays in translation studies Unlike many similar collections that have appeared in the past decades it is the product of theory integrated with practice in it the authors have steered clear of theorizing in a vacuum making sure that their findings tally with what actually happens in translation there is no attempt at putting forward hypotheses based on mere speculation As translation theorists and or translators whose specialties cover translation studies linguistics cultural studies computer aided translation Chinese literature English literature comparative literature and creative writing the thirteen authors have taken up the challenge of unravelling the mystery of what in I A Richards s words may very probably be the most complex type of event yet produced in the evolution of the cosmos Impossible as the task may have seemed they have all succeeded each in his her own way in tracing out many warp and weft threads as well as hitherto undiscovered patterns in the vast gorgeous and mysterious tapestry woven by God after Babel **Halliday in the 21st Century** M.A.K. Halliday,2013-12-05 This is the eleventh volume in Professor M A K Halliday s Collected Works First published as a 10 volume set from 2002 to 2007 they have shown the sizeable and growing international interest across a number of disciplines in the systemic functional linguistics framework Halliday s powerful theoretical approach to the study of language has contributed significantly not only to advances in our knowledge of how language works but also how linguistic insights may be practically applied across a wide spectrum of social concerns *Contrastive Register Variation* Stella Neumann,2013-12-12 The book provides the first comparison of usage preferences

across registers in the language pair English German Due to the innovative quantitative approach and broad coverage the volume is an excellent resource for scholars working in contrastive linguistics and translation studies as well as for corpus linguists

**Corpus Linguistics in Chinese Contexts** Simon Smith, 2015-07-27 Rapid advances in computing have enabled the integration of corpora into language teaching and learning yet in China corpus methods have not yet been widely adopted Corpus Linguistics in Chinese Contexts aims to advance the state of the art in the use of corpora in applied linguistics and contribute to the expertise in corpus use in China

Introducing Systemic Functional Linguistics Hui Yu, Chenguang Chang, Bo Wang, Yuanyi Ma, 2025-09-12 This book provides a comprehensive introduction to Systemic Functional Linguistics SFL covering key concepts and contributions to the field and instructing beginners to apply SFL to different areas Authored by contributors with extensive experience of teaching SFL this book is composed of 14 chapters covering theories descriptions and applications of SFL It encompasses the following topics SFL theory and the organizing principles descriptions of various lexicogrammatical and semantic systems grammatical metaphor register studies different areas of SFL application including translation studies multimodal discourse analysis and educational linguistics Suitable to be used as teaching materials the chapters are carefully organized into sections of learning outcomes key terms exercises and suggested readings By introducing the theory and applications of SFL in accessible terms and requiring no prior knowledge this practical book is a key reading for students new to the area

**Systemic Functional Linguistics and Translation Studies** Mira Kim, Jeremy Munday, Zhenhua Wang, Pin Wang, 2021-04-22 The field of translation studies has grown rapidly over recent decades with critical questions being investigated across the globe Drawing together this scattered research Systemic Functional Linguistics and Translation Studies consolidates important propositions by drawing on systemic functional linguistics SFL Using the SFL dimensions of stratification rank axis and delicacy to show how languages are more similar or more different this book provides a state of the art critical assessment of the interaction between SFL and translation studies Highlighting the major contribution SFL can make in developing translation theories a team of world leading experts investigate how intricate and wide ranging translation questions such as re instantiation and multimodality can be most efficiently explored through a detailed meaning and function oriented linguistic theory Examining the theoretical concepts and practical applications of SFL in the translation of a range of languages including Arabic Chinese and Brazilian Portuguese Systemic Functional Linguistics and Translation Studies provides a stimulus for new work spanning the two fields and suggests new directions for future research

Genre- and Register-related Discourse Features in Contrast Marie-Aude Lefer, Svetlana Vogelee, 2016-07-20 This volume contributes to filling a gap in corpus based research by investigating the ways in which linguistic features vary across genres registers cross linguistically It brings together insightful chapters by leading scholars in the field fruitfully exploiting genre or register controlled multilingual parallel and comparable corpora to i problematize cross register variation in a multilingual perspective ii address methodological and theoretical issues raised by

register oriented contrastive and translation studies iii investigate the cross linguistic and cross genre variation of specific linguistic features such as lexical bundles sentence initial adverbials and tag questions iv identify cross cultural and cross linguistic dissimilarities in expressing a functional category viz Appraisal in the field of opinion mining The book offers new cutting edge research that should be of interest to specialists in contrastive linguistics translation studies and cross cultural studies Originally published as a special issue of Languages in Contrast 14 1 2014 Bloomsbury Companion to Systemic Functional Linguistics M.A.K. Halliday, Jonathan J. Webster, 2009-07-18 Designed to be the essential one volume resource for students and researchers on Systemic Functional Linguistics The Routledge Handbook of Translation and Cognition Fabio Alves, Arnt Jakobsen, 2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive state of the art overview of how translation and cognition relate to each other discussing the most important issues in the fledgling sub discipline of Cognitive Translation Studies CTS from foundational to applied aspects With a strong focus on interdisciplinarity the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective Looking at different types of cognitive processes this volume also ventures into emergent areas such as neuroscience artificial intelligence cognitive ergonomics and human computer interaction With an editors introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism second language acquisition and related areas

**Cross-Linguistic Variation in System and Text** Elke Teich, 2012-02-13 The intuition that translations are somehow different from texts that are not translations has been around for many years but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text The present book provides a novel methodology for investigating the specific linguistic properties of translations As this methodology is both corpus based and driven by a functional theory of language it is powerful enough to account for the multi dimensional nature of cross linguistic variation in translations and cross lingually comparable texts

**Registerial Expertise in Traditional Chinese Medical Translation** Yan Yue, 2025-03-31 Yue s book explores the nature of translation using traditional Chinese medicine TCM and the TCM classic Huangdi Neijing and its various translations Yue examines in great detail and depth the important factors that cause the differences in the translators treatment of language indeterminacies Apart from having multi faceted and fine grained linguistic analysis this book also serves as a good model of methodology in terms of corpus building contrastive analysis exemplification and glossing following systemic functional linguistics SFL convention This book is an argument for greater emphasis on the linguistic notion of register in translator s expertise specifically in the way that professional experience and training with their registerial demands may be the key to semantic decisions forced on a translator by the inevitable vagaries and

indeterminacies of establishing a working equivalence across languages and cultures and deep time It probes the issue in an extreme case the debate over who is the ideal translator in Chinese medicine translation through various case studies The result suggests it is possible to demonstrate empirically that clinical experience in translators is likely to have consistent or even measurable consequences This book will be of interest to three different fields translators in training applicable systemic functional linguistics and traditional Chinese medicine communication *Proceedings of the VIIth GSCP International Conference. Speech and Corpora* Massimo Pettorino, Heliana Mello, Tommaso Raso, 2012 The 7th International Conference of the Gruppo di Studi sulla Comunicazione Parlata dedicated to the memory of Claire Blanche Benveniste chose as its main theme Speech and Corpora The wide international origin of the 235 authors from 21 countries and 95 institutions led to papers on many different languages The 89 papers of this volume reflect the themes of the conference spoken corpora compilation and annotation with the technological connected fields the relation between prosody and pragmatics speech pathologies and different papers on phonetics speech and linguistic analysis pragmatics and sociolinguistics Many papers are also dedicated to speech and second language studies The online publication with FUP allows direct access to sound and video linked to papers when downloaded **Translation: A Multidisciplinary Approach** J. House, 2015-12-11 The cross linguistic and cross cultural practice of translation is a field of rapidly growing international importance World renowned experts offer new and multidisciplinary insights on this subject viewing translation as social action and intercultural communication and as a phenomenon of languages in contact and a socio cognitive process **Corpus-Based Contrastive Studies of English and Chinese** Tony McEnery, Richard Xiao, 2010-07-02 This volume represents the first book length corpus based contrastive studies of major grammatical categories in English and Chinese two most important yet distinctly different world languages in the 21st century on the basis of large matching corpora of authentic spoken and written data in the two languages **Theorizing and Applying Systemic Functional Linguistics** Bo Wang, Yuanyi Ma, 2023-12-29 This collection reflects on developments in the field of Systemic Functional Linguistics SFL as embodied in the work of Christian M I M Matthiessen highlighting his diverse contributions to the field from theoretical and applied perspectives The book surveys Matthiessen s academic career and illustrates the myriad ways in which his work has reverberated through to current innovations in SFL research The book also exhibits his theoretical contributions to major linguistic topics and his influence on the development of SFL Written by some of the world s foremost scholars in the field chapters cover such topics as theories of SFL and its applications in different domains as well as the developmental trajectories of SFL in major geographic areas Addressing the key issues in SFL through the lens of Matthiessen s career this book is an accessible resource for students and scholars in systemic functional linguistics as well as those interested in the systemic functional approach in related areas within linguistics **Key Themes and New Directions in Systemic Functional Translation Studies** Bo Wang, Yuanyi Ma, 2022-04-19 This collection features eight interviews with seven senior scholars whose seminal

works involve the application of Systemic Functional Linguistics SFL to translation studies have advanced Systemic Functional Translation Studies SFTS as a research agenda in its own right with critical reflections and insights into future directions The book introduces SFTS as a research field tracing its development and situating the contributions of the scholars interviewed within this tradition An international group of researchers working across a diverse range of topics within SFTS are interviewed including Christian M I M Matthiessen Erich Steiner J R Martin Juliane House Jeremy Munday Adriana Pagano and Akila Sellami Baklouti Taken together the collection offers a comprehensive account of theoretical and methodological developments in SFTS with critical overviews of these scholars body of work within the research area and reflections on the emerging research that pushes SFTS scholarship into new frontiers This volume will be of particular interest to scholars in translation studies and Systemic Functional Linguistics as well as those interested in innovations in linguistic theory
