**International Nuclear Export Controls and Non-Proliferation** Ian J. Stewart, 2021-09-27 This book examines the evolution of international nuclear non proliferation trade controls over time The book argues that the international nuclear export controls have developed in a sub optimal way as a result of a non proliferation collective action problem This has resulted in competition among suppliers owing to the absence of an overarching effective system of control While efforts have been undertaken to address this collective action problem and strengthen controls over time these measures have been inherently limited it is argued here because of the same structural factors and vested interests that led to the creation of the problem in the first place This study examines international controls from the beginning of the nuclear age and early efforts to control the atom up to more recent times and the challenge posed by Iranian and North Korean nuclear ambitions Drawing on a rich body of original archival research and interviews the book demonstrates that the collective action problem has restrained cooperation in preventing nuclear proliferation and that gaps persist in the international nuclear trade control regime This book will be of much interest to students of nuclear proliferation and arms control security studies and International Relations

*Nuclear Waste*

*Management in Canada* Darrin Durant, Genevieve Fuji Johnson, 2010-07-01 As oil reserves decline and the environment takes centre stage in public policy discussions the merits and dangers of nuclear power and nuclear waste management are once again being debated Nuclear Waste Management in Canada provides a critical counterpoint to the position of government and industry by examining not only the technical but also the social and ethical aspects of the issue What do frequently used

terms such as safety risk and acceptability really mean And how and why did the public consultation process in Canada fail to address ethical and social issues This timely collection defuses the uncertainty ambiguity and ignorance that surrounds discussions of nuclear energy      Atomic Assistance Matthew Fuhrmann,2012-07-11 Nuclear technology is dual use in nature meaning that it can be used to produce nuclear energy or to build nuclear weapons Despite security concerns about proliferation the United States and other nuclear nations have regularly shared with other countries nuclear technology materials and knowledge for peaceful purposes In Atomic Assistance Matthew Fuhrmann argues that governments use peaceful nuclear assistance as a tool of economic statecraft Nuclear suppliers hope that they can reap the benefits of foreign aid improving relationships with their allies limiting the influence of their adversaries enhancing their energy security by gaining favorable access to oil supplies without undermining their security By providing peaceful nuclear assistance however countries inadvertently help spread nuclear weapons Fuhrmann draws on several cases of Atoms for Peace including U S civilian nuclear assistance to Iran from 1957 to 1979 Soviet aid to Libya from 1975 to 1986 French Italian and Brazilian nuclear exports to Iraq from 1975 to 1981 and U S nuclear cooperation with India from 2001 to 2008 He also explores decision making in countries such as Japan North Korea Pakistan South Africa and Syria to determine why states began or did not begin nuclear weapons programs and why some programs succeeded while others failed Fuhrmann concludes that on average countries receiving higher levels of peaceful nuclear assistance are more likely to pursue and acquire the bomb especially if they experience an international crisis after receiving aid      A Guide to Canadian Economic History Kenneth J. Rea,1991      **Australia's Uranium Trade** Stephan Frühling,2016-04-08 Australia's Uranium Trade explores why the export of uranium remains a highly controversial issue in Australia and how this affects Australia's engagement with the strategic regime and market realms of international nuclear affairs The book focuses on the key challenges facing Australian policy makers in a twenty first century context where civilian nuclear energy consumption is expanding significantly while at the same time the international nuclear nonproliferation regime is subject to increasing and unprecedented pressures By focusing on Australia as a prominent case study the book is concerned with how a traditionally strong supporter of the international nuclear nonproliferation regime is attempting to recalibrate its interest in maximizing the economic and diplomatic benefits of increased uranium exports during a period of flux in the strategic regime and market realms of nuclear affairs Australia's Uranium Trade provides broader lessons for how indeed whether nuclear suppliers worldwide are adapting to the changing nuclear environment internationally      **The Koreas** ,1990      **Canada Among Nations, 2007** Jean Daudelin,Daniel Schwanen,2008-03-26 In Canada Among Nations 2007 a team of specialists explores the space that Canada currently occupies in the global policy landscape and considers the bureaucratic players who manage this occupation Looking at trade the environment development defence intellectual property rights and the biggest file of all the United States they examine the various games involved from the relationship of the Prime Minister's Office with the foreign policy

apparatus to the constraints imposed by Alberta's and Quebec's particular interests and takes on foreign policy

**In the Chamber of Risks** William Leiss, 2001-11-10 The essential problem is the failure to recognize that controversies over risks are normal events in modern society and as such will be with us for the foreseeable future Three key propositions define these events risk management decisions are inherently disputable public perceptions of risk are legitimate and should be treated as such the public needs to be intensively involved in the processes of risk evaluation and management Leiss and his collaborators chronicle these organizational risks in a set of detailed case studies on genetically modified foods cellular telephones the notorious fuel additive MMT pulp mill effluent nuclear power toxic substances legislation tobacco and the new type of moral risks associated with genetics technologies such as cloning Contributors include Debora L Van Nijnatten Sir Wilfred Laurier University Michael D Mehta University of Saskatchewan Stephen Hill University of Calgary ric Darier Greenpeace Greg Paoli Decisionalysis Risk Consultants Inc and Peter V Hodson Queen's University

The Bomb in the Wilderness John O'Brian, 2020-10-01 Photographs link the nuclear past and nuclear present shaping the public's perception of events What can they reveal about Canada's nuclear footprint The Bomb in the Wilderness contends that photography is central to how we have represented interpreted and remembered nuclear activities since 1945 During the Second World War Canada was a member of the Manhattan Project the consortium that developed the atomic bombs dropped on Hiroshima and Nagasaki in 1945 The impact and global reach of Canada's nuclear programs has been felt ever since But do photographs alert viewers to nuclear threat numb them to its dangers or by some strange calculus accomplish both John O'Brian's wide ranging and personal account of the nuclear era presents and discusses more than a hundred photographs ranging from military images to the atomic ephemera of consumer culture We need this fascinating analysis to ensure that we do not look away
