Experiments In Form A Foundation Course In Three Dimensional Design:

Experiments in form; a foundation course in three-dimensional design P. Pearce,1980 **Experiments in Form** Peter Pearce,Susan Pearce,Susan M. Pearce,1980 *The Green Imperative: Ecology and Ethics in Design and Architecture* Victor Papanek,2022-02-01 A fresh edition of the sustainable design pioneer Victor Papanek s classic and ever relevant book examining the important role of design in combating climate change Whether it s horror at the plastic littering the world s beaches or despair at the melting polar ice caps the world is gradually waking up to the impending climate disaster In *The Green Imperative* Papanek argues for design that addresses these issues head on This means using materials that can be recycled and reused no more pointless packaging thinking about how products make us feel and engage all our senses putting nature at the heart of design working at a smaller scale rejecting aesthetics for their own sake and thinking before we buy First published at the end of the twentieth century this book offered a plethora of honest advice clear examples and withering critiques laying out the flaws of and opportunities for the design world at that time A quarter of a century on Papanek s lucid prose has lost none of its verve and the problems he highlights have only become more urgent giving today s reader both a fascinating historical perspective on the issues at hand and a blueprint for how they might be solved

Formulations Andrew Witt,2022-01-11 An investigation of mathematics as it was drawn encoded imagined and interpreted by architects on the eve of digitization in the mid twentieth century In *Formulations* Andrew Witt examines the visual methodological and cultural intersections between architecture and mathematics The linkages Witt explores involve not the mystic transcendence of numbers invoked throughout architectural history but rather architecture s encounters with a range of calculational systems techniques that architects inventively retooled for design Witt offers a catalog of mid twentieth century practices of mathematical drawing and calculation in design that preceded and anticipated digitization as well as an account of the formal compendia that became a cultural currency shared between modern mathematicians and modern architects Witt presents a series of extensively illustrated biographies of method episodes that chart the myriad ways in which mathematics particularly the mathematical notion of modeling and drawing was spliced into the creative practice of design These include early drawing machines that mechanized curvature the incorporation of geometric maquettes theorems made flesh into the toolbox of design the virtualization of buildings and landscapes through surveyed triangulation and photogrammetry formal and functional topology stereoscopic drawing the economic implications of cubic matrices and a strange synthesis of the technological mineral and biological crystallographic design Trained in both architecture and mathematics Witt uses mathematics as a lens through which to understand the relationship between architecture and a much broader set of sciences and visual techniques Through an intercultural exchange with other disciplines he argues architecture adapted not only the shapes and surfaces of mathematics but also its values and epistemic ideals **Historical Information Science** Lawrence J. McCrank,2001 Here is an extensive review and bibliographic essay backed by 5 000

citations about developments in information technology since the advent of personal computing and the convergence of the disciplines Its focus is on the access preservation and analysis of historical information primarily in electronic form and the relationships between new methodology and instructional media technique and research trends in library special collections digital libraries electronic and data archives and museums *Design Resources* Lawrence Von Bamford,1984

Industrial Design Magazine ,1981 Vol for 1982 includes special issue Designer s choice Industrial design s 28th annual review **Color Model Environments** Harold Linton,1985 Publishers Weekly ,1979 *Design* ,1981 **Vision and Invention** Calvin Harlan,1986 **Paperbound Books in Print** ,1983 **Scientific American** ,1887 U.S. Government Research Reports ,1961 **Digital Intentions Explorations and Accidents** ,2008-01-15 Digital design as seen on the following pages is no longer a discipline with a single visual signature redefining what is visually real but rather branches into a myriad of visual languages intellectual pursuits and experiential tones The frames that used to define digital creativities even a decade ago are constantly being re framed Accordingly essays in this compilation were divided into four subject categories directing the reader s attention to various thematic readings This division reflects the ever growing richness and diversity of digitally created content However any categorization is a simplified convention that provides artificial boundaries The included projects cover broad conceptual visual and educational themes While each paper is internally consistent and coherent they often cross established boundaries and venture into the unknown **Environment & Planning** ,1980 **Architecture Series: Bibliography** ,1980 *NBS Special Publication* ,1980 Hydraulic Research in the United States ,1966 Report United States.
