Experiments In Reinventing Government:

Experiments in Reinventing Government David Maturo, 2001-12-01 The past fifty years have witnessed the increasing size and inefficiency of many aspects of the United States government They also give testimony to the accelerating involvement of the government in many aspects of American life particularly in economic and business activity Since the beginning of the deregulating Reagan Administration in 1980 government spending ownership and intervention have been seriously questioned sparking the dawn of the public vs private debate At the heart of the debate is privatization or the transfer of goods and service delivery from the government to the private sector It means relying more on private institutions and less on government to satisfy societal needs With privatization the government can cease the challenge and complexity of providing goods and services to the public and begin the more manageable task of simply ensuring that they are provided Privatization helps guide the ship of government to a more efficient and effective management strategy of steering rather than rowing This book takes you into the government of the fifth largest city in the United States Philadelphia and reveals a the concept of privatization how it originated and how government and others perceive it b the advantages and disadvantages of privatization c what environments and initiatives allow privatization to work most effectively and those that inhibit it when it is most appropriate and likely to succeed d Philadelphia s stance and approach to privatization and how the government there implemented privatization initiatives how they turned out and what lessons were learned e based on the above theoretical and empirical analysis the DOs and DON Ts for state and local governments to consider in the future when experimenting or executing privatization initiatives

Politics Recoded Aure Schrock, 2024-09-24 The first detailed history of Code for America that examines how democratically designed government systems can collectively improve technology s impact on society For decades tens of thousands of volunteers and employees of Code for America have taken a different path to institutional change through designing and implementing infrastructure In *Politics Recoded* Aure Schrock employs a robust organizational ethnography to analyze how Code for America s infrastructural organizing changed how politics get exercised showing how we citizens can work directly with the government on projects to improve our collective livelihoods Drawing from theories of organizing social infrastructure racialized organizations technical cultures and intersectionality Schrock argues that our post techlash society must no longer presume that corporate platforms or social networks can level social inequities An underrecognized yet influential organization Code for America emerged from a tech culture background that prioritized networks and publicity over the long slow work of institutional change But its evolution demonstrates how to push beyond the fundamental flaws of tech forward organizing This the first history of Code for America shows how promoting agentic citizenship and brokering in empathy let the organization influence policy at all levels of government and demonstrates why we need to bolster institutions to ensure that everyone is justly represented and receiving the benefits Appealing to those in political science communication and information studies *Politics Recoded* will empower practitioners

and activists to revolutionize technological design and participate in alternative forms of civic engagement

The American Experiment with Government Corporations Jerry Mitchell, 1999 Both the failures and successes of those organizations occupying a middle ground between government bureaucracy and private corporations such as Amtrak the Tennessee Valley Authority the U S Postal Service and the Maryland Stadium Authority are analyzed Rather than come to some definitive conclusion about the effectiveness of this type of organization the author attempts to use the examination to explore how an American experimental society searches for ways to best provide goods and services Annotation copyrighted by Book News Inc Portland OR

Experiments in Public Management Research Oliver James, Sebastian R. Jilke, Gregg G. Van Ryzin, 2017-07-13 Interest in experimental research in public management is on the rise yet the field still lacks a broad understanding of its role in producing substantive findings and theoretical advances Written by a team of leading international researchers this book sets out the advantages of experiments in public management and showcases their rapidly developing contribution to research and practice The book offers a comprehensive overview of the relationship between experiments and public management theory and the benefits for examining causal effects It will appeal to researchers and graduate level students in public administration public management government politics and policy studies The key topics addressed are the distinct logic of experimental methods in the laboratory in the field and in survey experiments how leading researchers are using different kinds of experiment to build knowledge about theory and practice across many areas of public management and the research agendas for experimental work in public management

The Transformation of Governance Donald F. Kettl, 2002-09-03 The theory of public administration has long been based on the notions of hierarchy and authority However the way managers actually manage has increasingly become at odds with the theory The growing gap between theory and practice poses enormous challenges for managers in determining how best to work and for American government in determining how best to hold public administrators accountable for effectively doing their jobs In the quest to improve the practice of public administration Kettl explains political scientists and other scholars have tried a number of approaches including formal modeling implementation studies a public management perspective and even institutional choice This book offers a new framework for reconciling effective administration with the requirements of democratic government Instead of thinking in terms of organizational structure and management Kettl suggests administrators and theorists need to focus on governance or links between government and its broader environment political social and administrative Government is the collection of institutions that act with authority and create formal obligations governance is the set of processes and institutions formal and informal through which social action occurs Linking government and governance Kettl concludes is the foundation for understanding the theory and practice of government in twenty first century America for making public programs work better and for securing the values on which the American republic has been built

The Price of Government David Osborne, Peter Hutchinson, 2009-04-29 Government is broke

The 2004 federal deficit is the highest in U S history The states have suffered three years of record shortfalls Cities counties and school districts are laying off policemen and teachers closing schools and cutting services But the fiscal pain won t go away and the bankrupt ideologies of left and right offer little guidance The Price of Government presents a radically different approach to budgeting one that focuses on buying results for citizens rather than cutting or adding to last year s spending programs It advocates consolidation competition customer choice and a relentless focus on results to save millions while improving public services Federal Register ,1999-04 Logged On Zubair K. Bhatti,Jody Zall Kusek,Tony Verheijen,2014-10-27 Logged On offers a new mobile technology model and five solutions that can improve citizens interactions with a more effective and efficient government The book presents a number of examples from around the world but focuses on South Asia countries some of the most challenging in the world **A.T. Quarterly** ,1993 *The Charter School Experiment* Christopher A. Lubienski,Peter C. Weitzel,2010-09-01 When charter schools first arrived on the American educational scene few observers suspected that within two decades thousands of these schools would be established serving almost a million and a half children across forty states The widespread popularity of these schools and of the charter movement itself speaks to the unique and chronic desire for substantive change in American education As an innovation in governance the ultimate goal of the charter movement is to improve learning opportunities for all students not only those who attend charter schools but also students in public schools that are affected by competition from charters In *The Charter School Experiment* a select group of leading scholars traces the development of one of the most dynamic and powerful areas of education reform Contributors with varying perspectives on the charter movement carefully evaluate how well charter schools are fulfilling the goals originally set out for them introducing competition to the school sector promoting more equitable access to quality schools and encouraging innovation to improve educational outcomes They explore the unintended effects of the charter school experiment over the past two decades and conclude that charter schools are entering a new phase of their development beginning to serve purposes significantly different from those originally set out for them Testing, Teaching, and Learning National Research Council,Division of Behavioral and Social Sciences and Education,Board on Testing and Assessment,Committee on Title I Testing and Assessment,1999-11-06 State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students The new requirements come from provisions of the 1994 reauthorization of Title I the largest federal effort in precollegiate education which provides aid to level the field for disadvantaged students *Testing Teaching and Learning* is written to help states and school districts comply with the new law offering guidance for designing and implementing assessment and accountability systems This book examines standards based education reform and reviews the research on student assessment focusing on the needs of disadvantaged students covered by Title I With examples of states and districts that have track records in new systems the committee develops a

practical decision framework for education officials The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement Testing Teaching and Learning will be an important tool for all involved in educating disadvantaged students state and local administrators and classroom teachers **Job Safety & Health Quarterly** ,1993 Personnel Management in Government Katherine C. Naff,Norma M. Riccucci,Jay Shafritz,David H. Rosenbloom,Albert C. Hyde,2001-05-15 A comprehensive guide this book covers employee relations and the legacy of quality and reengineering and discussions on the growth of public personnel management in state and local sectors The authors discuss affirmative action and equal opportunity case law work and family issues the Volcker Commission findings an analysis of federal pay reform and innovative classification and compensation systems currently implemented by federal agencies a discussion of constitutional and legal issues facing public personnel administration in areas such as AIDS and drug testing figures and tables on collective bargaining laws and trends and more

The Projects Howard A. Husock,2025-09-09 How housing policy failed the people it was designed to help and how to fix it As the US struggles to provide affordable housing millions of Americans live in deteriorating public housing projects enduring the mistakes of past housing policy In *The Projects* Howard A Husock explains how we got here detailing the tragic rise and fall of public housing and the pitfalls of other subsidy programs He takes us inside a progressive movement led by a group of New York City philanthropists politicians and business magnates who first championed public housing as a solution to urban blight From First Lady Eleanor Roosevelt to the controversial city planner Robert Moses many well known historical figures made a convincing case for affordable housing in America Despite the movement s lofty ideals the creation of the Projects led to the destruction of low income communities across the country From the Hill District in Pittsburgh to Black Bottom in Detroit predominantly Black neighborhoods were judged only by the quality of their housing Husock looks beyond these neighborhoods physical conditions to their uncounted riches from local artists like August Wilson to vital community institutions As he shares residents stories he honors what they crafted through their own plans rather than those of city planners Husock traces the history of public housing to contemporary debates on the government s role in the housing market Through interviews with residents he reveals how public housing transformed the lives of Americans and the physical faces of cities and towns He ultimately critiques repair and reform efforts making policy recommendations that address the core failings of public housing for the people it was once designed to help Mapping out a better path for policy makers he lays a new foundation for upward mobility in America Global Encyclopedia of Public Administration, Public Policy, and Governance Ali Farazmand,2023-04-05 This global encyclopedic work serves as a comprehensive collection of global scholarship regarding the vast fields of public administration public policy governance and management Written and edited by leading international scholars and practitioners this exhaustive resource covers all areas of the above fields and their numerous subfields of study In keeping with the multidisciplinary spirit of these fields and subfields the entries make use of

Social Experiments in Practice: The What, Why, When, Where, and How of Experimental Design and Analysis Laura R. Peck, 2017-01-10 This issue considers social experiments in practice and how recent advances improve their value and potential applications Although controversial it is clear they are here to stay and are in fact increasing With their greater abundance experimental evaluations have stretched to address more diverse policy questions no longer simply providing a treatment control contrast but adding multiarm multistage and multidimensional factorial designs and analytic extensions to expose more about what works best for whom Social experiments are also putting programs under the microscope when they are most ready for testing enhancing the policy value of their findings This volume provides new developments in all these areas from scholars instrumental to recent scientific advances In some instances established ideas are given new attention connecting them to new opportunities to learn and inform policy By all means this issue aims to encourage stronger and more informative social experiments in the future This is the 152nd issue in the New Directions for Evaluation series from Jossey Bass It is an official publication of the American Evaluation Association

TV Transformations Tania Lewis, 2013-09-13 The past decade has seen an explosion of lifestyle makeover TV shows Audiences around the world are being urged to renovate everything from their homes to their pets and children while lifestyle experts on TV now tell us what not to eat and what not to wear Makeover television and makeover culture is now ubiquitous and yet compared with reality TV shows like Big Brother and Survivor there has been relatively little critical attention paid to this format This exciting collection of essays written by leading media scholars from the UK US and Australia aims to reveal the reasons for the huge popularity and influence of the makeover show Written in a lively and accessible manner the essays brought together here

will help readers make sense of makeover TV by offering a range of different approaches to understanding the emergence of this popular cultural phenomenon Looking at a range of shows from The Biggest Loser to Trinny and Susannah Undress essays include an analysis of how and why makeover TV shows have migrated across such a range of TV cultures the social significance of the rise of home renovation shows the different ways in which British versus American audiences identify with makeover shows and the growing role of lifestyle TV in the context of neo liberalism in educating us to be good citizens This book was published as a special issue of Continuum Journal of Media and Cultural Studies Communication Matters Jeremy Packer, Stephen B. Crofts Wiley, 2013-06-17 Communication has often been understood as a realm of immaterial insubstantial phenomena images messages thoughts languages cultures and ideologies mediating our embodied experience of the concrete world Communication Matters challenges this view assembling leading scholars in the fields of Communication Rhetoric and English to focus on the materiality of communication Building on the work of materialist theorists such as Gilles Deleuze Michel Foucault Friedrich Kittler and Henri Lefebvre the essays collected here examine the materiality of discourse itself and the constitutive force of communication in the production of the real Communication Matters presents original work that rethinks communication as material and situates materialist approaches to communication within the broader materiality turn emerging in the humanities and social sciences This collection will be of interest to researchers and postgraduate students in Media Communication Studies and Rhetoric The book includes images of the digital media installations of Francesca Talenti Professor Department of Communication Studies University of North Carolina at Chapel Hill **Energy Research Abstracts** , 1994 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes Organizations Howard P.
