## Expert Rules:

*Expert Laws of War* Anton O. Petrov, 2020-06-26 Over recent decades international humanitarian law has been shaped by the omnipresence of so called expert manuals Astute and engaging this discerning book provides a comprehensive account of these black letter rules and commentaries produced by private expert groups and demonstrates why the general acceptance of these expert manuals is largely unjustified The author innovatively links interdisciplinary insights to the needs of military lawyers in practice showing the pitfalls of relying on private manuals as arguable restatements and interpretations of the law as it is

*Expert Systems* Petrică Vizureanu, 2010-01-01 Expert systems represent a branch of artificial intelligence aiming to take the experience of human specialists and transfer it to a computer system The knowledge is stored in the computer which by an execution system inference engine is reasoning and derives specific conclusions for the problem The purpose of expert systems is to help and support user s reasoning but not by replacing human judgement In fact expert systems offer to the inexperienced user a solution when human experts are not available This book has 18 chapters and explains that the expert systems are products of artificial intelligence branch of computer science that seeks to develop intelligent programs What is remarkable for expert systems is the applicability area and solving of different issues in many fields of architecture archeology commerce trade education medicine to engineering systems production of goods and control diagnosis problems in many industrial branches

Hybrid Artificial Intelligence Systems Emilio Corchado, Ajith Abraham, 2008-09-30 The Third International Workshop on Hybrid Artificial Intelligence Systems HAIS 2008 presented the most recent developments in the dynamically expanding realm of symbolic and sub symbolic techniques aimed at the construction of highly robust and reliable problem solving techniques Hybrid intelligent systems have become increasingly popular given their capabilities to handle a broad spectrum of real world complex problems which come with inherent imprecision uncertainty and vagueness high dimensionality and non stationarity These systems provide us with the opportunity to exploit existing domain knowledge as well as raw data to come up with promising solutions in an effective manner Being truly multidisciplinary the series of HAIS workshops offers a unique research forum to present and discuss the latest theoretical advances and real world applications in this exciting research field This volume of Lecture Notes on Artificial Intelligence LNAI includes accepted papers presented at HAIS 2008 held in University of Burgos Burgos Spain September 2008 The global purpose of HAIS conferences has been to form a broad and interdisciplinary forum for hybrid artificial intelligence systems and associated learning paradigms which are playing increasingly important roles in a large number of application areas Since its first edition in Brazil in 2006 HAIS has become an important forum for researchers working on fundamental and theoretical aspects of hybrid artificial intelligence systems based on the use of agents and multiagent systems bioinformatics and bio inspired models fuzzy systems artificial vision artificial neural networks optimization models and alike

*Psychiatry in Law/law in Psychiatry:*  
*Psychiatry in law* Ralph Slovenko, 2002 Since c 1960 the interplay of psychiatry and law has emerged from an elective

seminar to a topic of national prominence In its breadth and coverage Ralph Slovenko's *Psychiatry and Law* provides a critical exposition of the many practices and basic premises of law and psychiatry It is a complete text for psychiatry residents or law students and an invaluable reference for practicing professionals in each field New approaches for practitioners are provided as well as material to assist them in preparing and documenting their cases *Psychiatry and Law* is rooted in Dr Slovenko's previously published work *Psychiatry and Law* Little Brown 1973 which received the American Psychiatric Association's prestigious Manfred Guttmacher award

**The Application of Contracts in Engineering and Construction Projects** Donald Charrett, 2018-07-04 Written by an engineer and construction lawyer with many years of experience *The Application of Contracts in Engineering and Construction Projects* provides unique and invaluable guidance on the role of contracts in construction and engineering projects Compiling papers written and edited by the author it draws together a lifetime of lessons learned in these fields and covers the topics a practicing professional might encounter in such a project developed in bite sized chunks Key topics included are the engineer and the contract the project and the contract avoidance and resolution of disputes forensic engineers and expert witnesses and international construction contracts The inclusion of numerous case studies to illustrate the importance of getting the contract right before it is entered into and the consequences that may ensue if this is not done makes *The Application of Contracts in Engineering and Construction Projects* essential reading for construction professionals lawyers and students of construction law

**Personal Injury and Damage Ascertainment under Civil Law** Santo Davide Ferrara, Rafael Boscolo-Berto, Guido Viel, 2016-10-06 This volume serves to provide an international overview of personal injury compensation in different geographical areas 15 countries already included with a special focus on the methods used to ascertain the injury and the related damages It also goes on to clarify the logical and methodological steps required for a sequential in depth ascertainment of any traumatic event and the related personal damage both pecuniary and non pecuniary Personal injury is a legal term for an injury to the body mind or emotions suffered by the plaintiff under tort and or civil law regulations Damages related to the injury can be pecuniary or non pecuniary in nature Although several comparative studies and research projects on tort and civil law and personal injury claims aimed at developing new tools for promoting harmonization of private law have been performed at an international level heterogeneity and divergences still exist in the definition and compensation of personal injury and damage across different national legislative systems The starting point for any awarding procedure should be a medical or rather a medico legal assessment to gain evidence on the trauma or event causing the injury the mechanism of injury the pre existing health status of the injured party and the health consequences of the injury temporary and permanent impairment work incapacity etc In order to pursue the ultimate goal of an international harmonization of personal injury compensation it is of utmost importance to define the quality requirements for the medico legal ascertainment methodology which are essential for guaranteeing the objectivity rigor and reproducibility of the data

and the evidence collection procedure Currently there are no supra national medico legal guidelines dealing with the ascertainment methodology of personal injury and damage under tort and civil law

**Construction Law** Julian Bailey, 2016-07-22 Now in its second edition Construction Law is the standard work of reference for busy construction law practitioners and it will support lawyers in their contentious and non contentious practices worldwide Published in three volumes it is the most comprehensive text on this subject and provides a unique and invaluable comparative multi jurisdictional approach This book has been described by Lord Justice Jackson as a tour de force and by His Honour Humphrey Lloyd QC as seminal and definitive This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law as well as changes to statutes and regulations The laws of Hong Kong and Singapore are also now covered in detail in addition to those of England and Australia Practitioners as well as interested academics and post graduate students will all find this book to be an invaluable guide to the many facets of construction law
