The Experts Speak Cerf, Christopher Cerf, 1990-09-01      *The Experts Speak* Christopher Cerf, Victor S. Navasky, 1984  
Includes index      Confronting the Experts Brian Martin, 1996-04-04 Confronting the Experts brings together six personal case histories of challenges to establishment experts The authors tell why they questioned conventional wisdom what methods they used how they dealt with the experts response and what lessons they learned Because the book shows how powerful groups can get their way by gaining the support of intellectual authorities and also how these authorities can be challenged it provides insights into the issues of power dissent and social change Included are Sharon Beder s research on sewage and how it helped to undermine the credibility of the Sydney Water Board Mark Diesendorf s scientific and social critique of fluoridation Edward Herman s exposition of the flaws in the establishment perspective on terrorism Harold Hillman s questioning of the validity of standard methods used in biology such as subcellular fractionation and electron microscopy Michael Mallory and Gordon Moran s challenge to the orthodox interpretation of a famous painting in Siena Italy and Dhirendra Sharma s confrontation with India s nuclear establishment      Need to Know John Gordon Stackhouse, 2014 If a serious Christian wants to think seriously about a serious subject what does he or she do Grounded in the best of the Christian theological tradition Need to Know sets out a comprehensive coherent and clear model of responsible Christian thinking      **Leading a Digital School** Mal Lee, Michael Francis Gaffney, 2008 This important new book informs educational leaders about current developments in the use of digital technologies and presents a number of case studies demonstrating their value and complexity It encourages leaders to engage in the process of successful change for their own school community by providing guidelines and advice drawn from emerging research Leading a Digital School is a rich source of information and advice about joining the new education revolution It shows clearly and concisely how schools can integrate digital technologies creatively and wisely in order to enliven teaching and support student learning      **Expert Political Judgment** Philip E. Tetlock, 2017-08-29 Since its original publication Expert Political Judgment by New York Times bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena let alone predict the future He evaluates predictions from experts in different fields comparing them to predictions by well informed laity or those based on simple extrapolation from current trends He goes on to analyze which styles of thinking are more successful in forecasting Classifying thinking styles using Isaiah Berlin s prototypes of the fox and the hedgehog Tetlock contends that the fox the thinker who knows many little things draws from an eclectic array of traditions and is better able to improvise in response to changing events is more successful in predicting the future than the hedgehog who knows one big thing toils devotedly within one tradition and imposes formulaic solutions on ill defined problems He notes a perversely inverse relationship between the best scientific indicators of good judgement and the

qualities that the media most prizes in pundits the single minded determination required to prevail in ideological combat Clearly written and impeccably researched the book fills a huge void in the literature on evaluating expert opinion It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision making Now with a new preface in which Tetlock discusses the latest research in the field the book explores what constitutes good judgment in predicting future events and looks at why experts are often wrong in their forecasts **Human Factors**

**in Aviation** Earl L. Wiener, David C. Nagel, 2014-06-28 Since the 1950s a number of specialized books dealing with human factors has been published but very little in aviation Human Factors in Aviation is the first comprehensive review of contemporary applications of human factors research to aviation A must for aviation professionals equipment and systems designers pilots and managers with emphasis on definition and solution of specific problems General areas of human cognition and perception systems theory and safety are approached through specific topics in aviation behavioral analysis of pilot performance cockpit automation advancing display and control technology and training methods **Encyclopedia**

**Origins of the Sphinx** Robert M. Schoch, Robert Bauval, 2017-03-16 New research and evidence that the Sphinx is thousands of years older than previously thought Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory Examines how the Sphinx is contemporaneous with Giza's Great Sphinx aligned with the constellation Leo and was recarved during the Old Kingdom era of Egypt Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone According to orthodox Egyptology the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre Yet this fact has scant to no supportive evidence When was the Sphinx really built and most importantly why In this provocative collaboration from two Egyptology outsiders Robert M Schoch Ph D and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre Pharaonic civilization They examine the known history of the Sphinx contrasting what Egyptologists claim with prominent historical accounts and new research including updates to Schoch's geological water weathering research and reanalysis of seismic studies Building on Bauval's Orion Correlation Theory they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era they assert that the Sphinx was first built by an advanced pre Pharaonic civilization that existed circa 12 000 years ago on the Giza Plateau contemporaneous with the sophisticated Giza complex The authors examine how the monuments at Giza memorialize Zep Tepi the Golden Age of legend shown here to be an actual historical time period from roughly 10 500 BCE through 9700 BCE Moving us closer to an understanding of the true age and purpose of the Great Sphinx Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age
