## **Explaining Human Action:**

*Human Action and Its Explanation* R. Tuomela, 2012-12-06 This book presents a unified and systematic philosophical account of human actions and their explanation and it does it in the spirit of scientific realism In addition various other related topics such as psychological concept formation and the nature of mental events and states are discussed This is due to the fact that the key problems in the philosophy of psychology are interconnected to a high degree This interwovenness has affected the discussion of these problems in that often the same topic is discussed in several contexts in the book I hope the reader does not find this too frustrating The theory of action developed in this book especially in its latter half is a causalist one In a sense it can be regarded as an explication and refinement of a typical common sense view of actions and the mental episodes causally responsible for them It has of course not been possible to discuss all the relevant philosophical problems in great detail even if I have regarded it as necessary to give a brief treatment of relatively many problems Rather I have concentrated on some key issues and hope that future research will help to clarify the rest

**Explaining Human Action** Kathleen Lennon, 1990 Kathleen Lennon provides a new approach to the philosophy of action showing how reasons fit into the causal framework of the world while defending their autonomy She disputes the rapidly congealing orthodoxy which maintains that explanations according to intentional states cannot be causal explanations

*Explaining Human Actions and Environmental Changes* Andrew P. Vayda, 2009-05-15 In this collection of recent essays Andrew P Vayda argues for a pragmatic approach to explanation and explanation oriented research in social and environmental sciences He supports his arguments with causal analyses of both human actions such as cutting down trees and fighting over resources and environmental changes such as forest fires and he voices his opposition to methodological and ethnographic holism and the notion that explanation can be achieved by deploying theories rather than by obtaining evidence of the causal histories of concrete actions and events Vayda is critical of much recent scholarship in such areas as political ecology local knowledge studies discourse studies and evolutionary human behavioral ecology for its indifference to questions of evidence and methodology and its failure to give proper consideration to multiple and alternative possible causes of whatever is being explained He also discusses the use and misuse of evidence and generalizations the payoffs and pitfalls of moving from one level of analysis to another the dos and don'ts in interdisciplinary research the uses of statistics and the importance of being clear about objects of explanation This original and challenging work makes sense of the future of ecological anthropology and will be of interest to researchers in the social and environmental sciences in general

**Explanation and Human Action** A. R. Louch, 1966 Understanding Human Action Michael A. Simon, 1981-06-30 Is human behavior determined in accordance with causal laws available to scientists Is science capable of making sense of human actions and social life This book is a penetrating inquiry into the question of what social science is all about In it Michael A Simon challenges the prevailing view with his thesis that the social sciences are sciences in name only and are based upon the freedom and

uniqueness of the human subjects of scientific explanation Combining sound scholarship with clear readable prose Simon explains why freedom must be a primitive conception and indicates the conditions for human uniqueness He offers a proposal for what the social sciences might become if researchers recognize that they are not scientists in the ordinary sense of the word **Action, Intention, and Reason** Robert Audi,1993 Three new essays and 11 others published since 1971 develop

and defend a general position on action theory that is intentionalist about the nature of action causal and nomic about explanations of action compatibilist about free action and moral responsibility internalist about the grounds of rational actions and holistic about the nature of rationality Paper edition 8105 8 17 95 Annotation copyright by Book News Inc Portland OR Explanation in Causal Inference Tyler J. VanderWeele,2015 A comprehensive examination of methods for mediation and interaction VanderWeele s book is the first to approach this topic from the perspective of causal inference Numerous software tools are provided and the text is both accessible and easy to read with examples drawn from diverse fields The result is an essential reference for anyone conducting empirical research in the biomedical or social sciences

**New Essays on the Explanation of Action** C. Sandis,2008-11-28 These previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons *Explaining Explanation* David-Hillel Ruben,2015-12-03 This second edition of David Hillel Ruben s influential and highly acclaimed book on the philosophy of explanation has been revised and expanded and the author has made substantial changes in light of the extensive reviews the first edition received Ruben s views on the place of laws in explanation has been refined and clarified What is perhaps the central thesis of the book his realist view of explanation describing the way in which explanation depends on metaphysics has been updated and extended and engages with some of the work in this area published since the book s first edition Explanation in Action Theory and

Historiography Gunnar Schumann,2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography *Explaining Buyer Behavior* John O'Shaughnessy,1992-06-04 This volume provides the

fundamentals needed to understand the various explanatory systems and methodologies used in the behavior sciences and to

evaluate their findings in particular the literature and findings on buyer behavior In clear prose the author discusses the key issues in modern philosophy psychology and sociology and their relevance for the student of marketing and buyer behavior O Shaughnessy exploits insights from many disciplines as to the many ways to derive understanding of behavioral phenomena making it accessible not only to academics and students of marketing but to professionals as well      Historical Explanation Gunnar Schumann,2023-11-14 This book is concerned with the appropriate form of explanations in historiography and the social sciences It combines action theory and philosophy of historiography and develops a theory of teleological explanations of human actions based on late Wittgensteinian and Ordinary Language Philosophy insights In philosophy of action many philosophers favor causal theories of human action Additionally in current philosophy of historiography the majority view is that historians should explain historical phenomena by their causes This book pushes back against these mainstream views by reviving an anti causal view of explanation of current and past human actions The author argues that disciplines that deal with human actions require a certain form of explanation namely a teleological or intentional explanation This means that past human actions and their results will have to be explained by reasons of agents not by causes Therefore historiography employs a method of explanation which is in stark contrast to the sciences The author thus proposes a Verstehen understanding approach in historiography and the social sciences Historical Explanation will be of interest to scholars and advanced students working in philosophy of action philosophy of history and philosophy of the social sciences      **Neurolaw and Responsibility for Action** Bebhinn Donnelly-Lazarov,Dennis Michael Patterson,Peter Raynor,2018-05-03 Examines the particularly prescient implications that neuroscience has for legal responsibility highlighting the philosophical and practical challenges that arise      Action Reconceptualized David K. Chan,2016-05-11 The concept of action that requires philosophical analysis is one that concerns behavior characteristically found in humans In Action Reconceptualized Human Agency and Its Sources David K Chan examines the sources of human agency that are proposed in causal theories of action namely desire intention and trying and distinguishes them from each other in terms of their roles in practical reasoning and motivation He conceptualizes them in relation to each other in a way that is consistent and useful for answering a number of questions that are central to the philosophy of action The action theory in this book addresses the need to understand human agency for its own sake but it also serves another purpose When the philosopher Elizabeth Anscombe stressed the need to do philosophy of action before doing ethical theory what she meant was that moral philosophers should first work out a proper account of the relationship between the inner states of a person and the actions that she performs This book provides such an account and makes the case that it is desire rather than intention that is the basis for the ethical evaluation of an agent Action Reconceptualized will be of particular interest to students and scholars doing research in action theory and ethics as well as to those working outside of philosophy in psychology and cognitive science      **Laws And Explanation In The Social Sciences** Lee C McIntyre,2018-10-08 The first full length defense of social scientific laws to appear in the last twenty

years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior

Tradition, Rationality, and Virtue Thomas D. D'Andrea, 2017-09-29 Tradition Rationality and Virtue provides the first comprehensive and detailed treatment of the work of Alasdair MacIntyre In this book Thomas D Andrea presents an accessible critical study of the full range of MacIntyre's thought across ethical theory psychoanalytic theory social and political philosophy Marxist theory and the philosophy of religion Moving from the roots of MacIntyre's thought in ethical inquiry this book examines MacIntyre's treatment of Marx Christianity and the nature of human action and discusses in depth the development and applications of MacIntyre's After Virtue project The book culminates in an examination of major internal and external criticisms of MacIntyre's work and a consideration of its future directions

**Philosophical Problems in Psychology** Neil Bolton, 2025-04-01 Philosophical psychology reflects upon the aims and the concepts of empirical psychology First published in 1979 Philosophical Problems in Psychology argues that empirical psychology must be founded upon the language of rationality for actions and the reasons people give for their actions are at the heart of human behaviour This thesis is defended in the contributions to Part I which assert that psychology must take the form of an elaboration of common sense But the authors in Part II maintain that psychology may remain faithful to this insight whilst still developing more sophisticated models of behaviour The use of computer models Piaget's views on the effects of internalization and a discussion of the geometry of phenomenal space provide illustrations Part III contains three papers which explore the limitations of theoretical statements which emphasize our construction of reality The pertinence of the computer analogy is disputed subject centred models are scrutinized in the light of phenomenology and the role of theory in psychotherapy is critically discussed

*The Nature of Explanation in Social Sciences* Rajesh Ranjan Tiwari, 2023-07-07 This book provides a comprehensive overview of the nature of explanations as given in both natural and social sciences It discusses models of explanation adopted in natural and social sciences The author also elaborates upon naturalistic and anti naturalistic views and other types of explanations such as functional purposive etc in social science The volume elaborates upon themes like bridge principle functional explanation purposive explanation teleological explanation prediction methodological individualism methodological collectivism illocutionary redescription principle of action and dispositional explanations to understand whether the explanations given in the realm of social

sciences are the same or different from the explanations that are given in the field of natural sciences This introductory book is a must read for students and scholars of philosophy of science logic science and technology studies social sciences and philosophy in general     *Kant's Theory of Action* Richard McCarty, 2009-06-18 What are the causes of our actions How do we act with free will What makes an action virtuous What is a good will Richard McCarty presents controversial and carefully argued answers to these questions based on the theory of action that underlies Kant's ethics considered in its historical context     *Transitions and Learning Through the Lifecourse* Kathryn Ecclestone, Gert Biesta, Martin Hughes, 2009-10-16 Transition has numerous everyday and conceptual meanings yet while certain transitions are unsettling and difficult for some people risk challenge and even difficulty might also be important factors in successful transitions for others
