Russia in the 21st Century Steven Rosefielde, 2005 Sample Text

The Economic Sources of Social Order Development in Post-socialist

Eastern Europe Richard Connolly, 2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country's ties with the international economy and the level of competition within a country's economic system will shape the trajectory of political competition within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural economic development and that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes

Networks, Trust and Social Capital Sokratis M. Koniaras, 2017-03-02 The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research

Making and Breaking Democratic Transitions Vladimir Gel'man, Sergei Ryzhenkov, Michael Brie, 2005-01-12 Focusing on the vastly different outcomes of post Soviet regime transitions this study explores why some societies have become more democratic and some have not Based on in depth comparative analyses the book assesses political developments in six of Russia's regions Saratov Nizhnii Novgorod Volgograd Ryazan Ul'yanovsk and Tver oblasts since 1988 The authors consider the influence of Soviet governance systems on the

emergence of cleavages and new actors in the post Soviet period They also analyze the impact of institutional changes on regional regimes and the success or failure of formal institutions as a framework for political competitiveness Placing their detailed field data within the larger comparative and theoretical context of political transitions the authors are able to explain the mixed outcomes of post communist regime change in Russia and other post Soviet nations With its innovative model of path contingent democratization and its new typology of political regimes and regime transitions this book will be essential reading for all scholars of democracy

Integration and Dis-Integration and the Natural Gas Market in post-Soviet Countries 1989-2001 Sven Grählert, 2006-03-29 Inhaltsangabe Abstract Integration and Dis Integration or Dis Integration and Integration or Dis Integration and Re Integration can be quite a word play The Dis Integration of the former Soviet Union FSU in the early 1990s marks a serious and unprecedented development in modern history It was a break up of the Union of Socialist Soviet Republics into fifteen newly independent states Hereby twelve states formed the Commonwealth of Independent States CIS a structure that was to keep some order over the break up Three countries the Baltics announced their total independence and declared no will to be part of the CIS A later Integration or Re Integration within the CIS is being actively discussed and debated up to now Several theories have evolved on the future of the region Huntington s thesis predicts the Clash of Civilizations He argues that the future battle over world politics will be over religious and cultural factors Huntington predicts a split up of the world along religious lines In turn Duncan rejects religion to be a factor in the current developments of the CIS He limits Kuzio s idea of a division between the CIS into radicals and pragmatists among the two groups the Westernizers and Slavophiles Duncan concludes that there is generally a shift towards pragmatism in the foreign policies of the member states of the FSU Disillusionment with the West is widespread Most important factors that make countries tend towards a Westernist or Eurasianist course are linked to ethnicity and conflict The author views the political regime and economic reforms as less important Other studies focus more on the relationship between Russia and the other CIS countries Alexandrova s arguments support the trend towards pragmatism She adds that Moscow gave up the concept of re integration which it was convinced of in the first years of transition Russia s foreign policy from Yeltsin to Putin shifted from Multilateralism to Bilateralism Russian capital invested in the near abroad is seen as a strong instrument to influence other CIS states and force them to Moscow s security policy Another less recent study on Integration and Disintegration from 1997 by authors of Brown University U S and institutes from five newly independent states gives some outlook over the future ten years until 2006 Base for discussion were four rather extreme and abstract scenarios Researchers and other experts from the region

Organized Crime, Prison and Post-Soviet Societies Alain Touraine, Anton Oleinik, 2017-11-01 This title was first published in 2003 The Red Mafia in Russia have become the subject of increasing international interest and considerable misinterpretation After well received editions in Russian French and Italian Anton Oleinik s study of Russian prisons in which he explores the social roots of organized crime in post Soviet societies is now

published in English This English edition includes a postscript on the Moscow terrorist crisis of 2002 Oleinik's analysis reveals prison society as a mirror of broader Russian society characterized by the absence of the state as an organizer of social practices He builds on this to make a central distinction between two types of societies the modern large society and the small society like Russia that has only been partially modernized and in which the world of everyday life experiences and relationships remains entirely separated from the official aims of modernization and efficiency Oleinik is interested in the void between these two separate worlds a void he sees being filled in Russia by the Mafia

Public Problems - Private Solutions? Simon Raiser, 2017-11-30 Cities and city regions are undergoing rapid transformation They are prime locations of innovation while at the same time facing growing problems of spatial fragmentation and social exclusion By addressing these problems cities become forerunners for new patterns of governance which include increasingly private actors While research on global cities has focused primarily on the world's leading financial and economic centres comparative research on the changing role of large complex cities in the developing world is less advanced But it is here where public problems are most seriously threatening the cohesion of urban society and where the need for new answers is most urgent Illustrated by in depth examinations of four city regions Shanghai Mumbai Johannesburg and S o Paulo this book readdresses this balance The book revisits the same set of cities from different angles thereby reflecting urban contradictions juxtapositions and disjunctures

Theorising Social Change in Post-Soviet Countries Balihar Sanghera, Sarah Amsler, Tatiana Yarkova, 2007 The book traces three main approaches to the sociology of post Soviet societies studies guided by neoliberal theory and or practice work which may be termed neoconservative in orientation and which is often a response to the first and a third type of work that is considered both critical and reflexive and which seeks to transcend the limitations of the other approaches The book is divided into three parts addressing polity culture and economy In each section authors endeavour to transcend both neoliberalism and neoconservatism and reach for a third approach critical social science This is a broad movement and the authors vary in their own explanatory and normative ideas as they carve out frameworks that will enable them to develop a more rigorous and at the same time more comprehensive and critical understanding of social change
