## **Explaining China:**

Explaining China John Earl Baker, 1927      *Explaining China* John Earl Baker, 1927      **Understanding China's Economy** Gregory C Chow, 1994-11-25 In the early 1990s the world began to recognize China as a rising economic power to reckon with. China's economy is dynamic; her human and natural resources are plentiful and her economic growth has been well sustained over the last 16 years. In fact, some have predicted that by the year 2020 China's economic output will be close to half that of the US. It is undeniable that China will be an economic giant if she is not already one today. In this book, the author has traced China's economic development over the last 16 years. The steps and characteristics of China's economic reform are detailed. The prospects for China's economic growth are studied. The author also attempts to analyze topical issues pertaining to China's economic relations with the US and her integration with the other Asian economies. This book provides the interested reader with a bird's eye view of the Chinese economy over the last 16 years. Most chapters are written for the general reader, while a few are for professional economists. For the questions it answers or for those that it raises, this is an important book to read.

*The China Path and its Original Meaning* Han Qingxiang, 2023-12-19 This book examines the fundamental issues of Marxism in the 21st century and explores its contributions through the explanatory framework of the unity of continuity and stages, spatial and temporal analysis, and the dialectical relationship of universality and particularity of Marxist historical development. Marxism in the 21st century is a concept closely related to the historical changes of capitalism and the historical shift of the center of the socialist movement. Marxism in the 21st century should be developed on the basis of the continuation of the fundamental position, value orientation, ideals and beliefs, basic principles, and methodological principles of Marxism. This book explores the logic of the development of modernization in contemporary China and the world, the communication and interaction between contemporary China and the world, and the coexistence of socialism and capitalism. It also examines the relationship between the adaptation of Marxism to the Chinese context, Marxism in contemporary China, and Marxism in the 21st century. The book also discusses Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, which provides a scientific theoretical system for interpreting the contemporary world and could become the core theoretical form of Marxism in the 21st century. The book will be essential reading for students and scholars of Marxism, Chinese studies, and modernization theory.
