Explaining Economic Policy Reversals

Tim Battin

Explaining Economic Policy Reversals:

Explaining Economic Policy Reversals Christopher Hood,1994-01-01 **Understanding Regulation** Robert Baldwin,Martin Cave,Martin Lodge,2012 An introduction to the practical and theoretical issues that are central to the study of regulation which a particular focus on contested areas and how they are dealt with The Bureaucratization of the World in the Neoliberal Era B. Hibou,2015-05-06 Contemporary bureaucracy is a set of norms rules procedures and formalities which includes administration business and NGOs Where Max Weber meets Michel Foucault B atrice Hibou analyzes the political dynamics underlying this process Neoliberal bureaucracy is a vector of discipline and control producing social and political indifference **Homeschooling in America** Joseph Murphy,2014-02-04 This revealing and balanced portrait of homeschooling today provides a full history of the movement demographic insights and extensive research on how homeschooled children fare in the United States Delving into a movement that impacts more students nationwide than the entire charter school movement this book explores The history of homeschooling in America How this movement has grown in credibility and enrollment exponentially The current state of homeschooling including questions about who gets homeschooled why and what is the success academically and in life of students who are homeschooled The impact of homeschooling on the student and on American society In 2010 more than two million students were homeschooled In the most extensive survey and analysis of research on homeschooling spanning the birth of the movement in the 1970s to today Homeschooling in America shines a light on one of the most important yet least understood social movements of the last forty years and explores what it means for education today Abandoning Keynes Tim Battin,1997-05-29 This analysis proposes a political explanation for the breakdown of Keynesian full employment in Australia It taps into the current literature that examines the role of economic interests ideas and institutions and by taking issue with the arguments of anti Keynesian economists the book carries the argument that there was and is nothing inherently contradictory about Keynesian theory or much of its practice Keynesianism its imperfections notwithstanding was overturned because of a powerful alliance of interests and ideas European Telecommunications Liberalisation Kjell A. Eliassen,Marit Sjoavaag Nfa,Marit Sjoavaag,2013-03-04 This book examines the process and consequences of telecommunications liberalisation in the context of an ever closer European Union The creation of a single market for telecommunications and of a wider European single market mirror one another Telecommunications are also something of a test case for the privatisation process as this sector has traditionally been a state monopoly The volume approaches the European experience from three angles the politics of regulation and the process of liberalisation in the EU including case studies of the UK France and Germany increasing global economic interdependence makes international comparisons essential and the volume compares the EU experience with that of the Czech Republic Israel and Thailand the consequences of technology and continuous innovation **The Politics of Corporate Taxation in the European Union** Claudio Radaelli,2013-01-11 This study explores the formation of the

European Union's tax policy and asks why member states did not raise objections to it. The author's analysis is enriched by two further levels of inquiry. Firstly, he examines the Europeanization of domestic tax policy in Italy and the UK, asking how domestic policy has changed and what is meant by Europeanization. Secondly, he puts the European Union tax policy in the wider context of tax globalization. Will the liberalization of capital movement, tax havens, and the flexibility of multinationals in managing their taxable incomes wreck the European Union's fragile tax policies?

Handbook of Innovation in Public Services Stephen P. Osborne, Louise Brown, 2013-01-01. Innovation is a core issue for public services and is a key element of public services reform, particularly in this age of austerity where policymakers urge the need to innovate to do more with less. This comprehensive and accessible Handbook explores the potential for creating efficient and effective public services. Leading researchers from across the globe review the state of the art in research on innovation in public services, providing an overview of key issues from a multi-disciplinary perspective. Topics explored include context for innovation in public services and public service reform, managerial change, challenges, ICT and e-government, and collaboration and networks. The theory is underpinned by seven wide-ranging case studies of innovation in practice. Taking the field forward and providing a baseline for future research, this highly unique and original Handbook will prove essential reading for academics, researchers, students, policymakers, and practitioners across the fields of innovation, public policy, social policy, and public management.

Evaluation and Turbulent Times Jan-Eric Furubo, 2017-09-08. Now more than ever, policy evaluation is an important component in addressing the world's economic crisis. Before it can do so, the discipline must adapt to changing economic and political environments. The contributors address a basic question: What impact do crises have on evaluation, and how can evaluation contribute in times of turbulence? Examining the state of evaluation today, the volume's editors cover a broad range of topics, including post hoc evaluation, shifting economic paradigms, the World Bank Group's response to the global economic crisis, challenges in evaluating financial literacy, evaluating counter-terrorism programs, evaluation in the context of humanitarian crises, and why civil society organizations in sub-Saharan Africa matter in evaluating poverty interventions. The contributors explore the role of evaluation in the search for solutions to global instability. They recognize, however, that in order to address unprecedented crises, evaluation itself needs to be evaluated and updated as part of the process of change and reform. This volume is the latest in Transaction's well-respected Comparative Policy Evaluation series.

Regulating Securitized Products R. Saleuddin, 2015-07-14. Securitization regulation remains in the eyes of investors, banks, businesses, bureaucrats, and politicians one of the remaining unsolved puzzles of the post-Global Financial Crisis landscape. This book describes the key features of securitization, including the most common structures and their uses, as well as the motivations of the participants in these markets. Important historical moments and case studies are frequently used to illustrate critical issues in the design and enforcement of regulation for securitized products. This work is intended to contextualize and contribute to the highly specialized debates between policymakers, regulators, and the regulated financial intermediaries.

setting out an agenda for discussion as well as providing some strongly held views on possible solutions Written by an industry insider with over 20 years experience in the markets this book considers regulatory tools from all sides while avoiding common biases It is a valuable source for not only regulators and policymakers but also educators students and researchers in financial regulation financial engineering and investment management New Labour and Thatcherism R. Heffernan,2000-04-19 Labour s 1997 victory was widely credited to the party s reinvention of itself as New Labour This book argues that the transformation of the Labour Party is best understood as the product of Thatcherism and marks the emergence of a new consensus in British politics **Public Enterprise in an Era of Change** University of Regina. Canadian Plains Research Center,1998 On 6 December 1996 the public consultation committee Talking About Saskatchewan Crowns TASC and the University of Regina held a one day conference to examine the historic role of Saskatchewan Crown corporations and the future of public enterprise in a new world economy The conference brought together renowned academic business and labour leaders all contributing their input to a major review of Saskatchewan Crowns The conference was divided into four sections Public Enterprise Developments An International Perspective Changing Attitudes and Expectations Regarding Public Ownership and Investment Public Enterprise In Whose Interest and Government Control Ownership Regulation or Market Pressure The papers from the conference are included in this publication *Monetary Regimes of the Twentieth Century* Andrew Britton,2001-06-04 Abstract economic theory may be timeless and potentially universal in its application but macroeconomics has to be seen in its historical context The nature of the policy regime the behaviour of the economy and the beliefs of professional economists all interact and influence each other This short historical account of monetary regimes since 1900 shows how the role of policy has changed and how this has related to experience of inflation and the real economy as well as to changes in political philosophies The narrative concentrates on developments in America Europe and Japan from the era of the classical gold standard via the era of policy intervention and reduced faith in the market to the present neo liberal regimes The grand narrative of the century is a journey to Utopia and back It is argued that no school of macroeconomics is right for all time different theoretical models may be appropriate for different periods and regimes **The Politics of Nuclear Energy in Western Europe** Wolfgang C. Müller,Paul W. Thurner,2018-01-26 This volume investigates nuclear energy policies in Western Europe over the entire post war period but with special attention to the two most recent decades The comparative analytical perspective draws on the interplay between voters attitudes challenging movements party competition and coalition formation Spanning more than 60 years and 16 countries the researchers examine the underlying causal processes leading to the observed varieties of Western European nuclear energy policies Based on a mixed methods approach using both structured case studies as well as quantitative analyses the study shows that the nature of party competition under given institutional contexts is a key driver for as a rule tactically motivated governmental policy changes and stability respectively Part I introduces the practical and theoretical relevance of the topic It

outlines the reasoning of the major scientific contributions with regard to nuclear energy policies and offers a theoretical alternative to the previous literatures that has been predominantly movements oriented Additionally it provides core economic and political indicators of the changing role of nuclear energy in the countries Part II consists of seven in depth case studies where the outlined theoretical perspective is applied Part III consists of a general summary short narratives of the countries not covered in case studies qualitative comparison and an assessment of the factors for policy change from multivariate analysis

Policy Process Michael Hill, 2014-07-15 In this new edition of his classic reader Michael Hill seeks to make the selected extracts reflect a more European outlook on the process of policy making and implementation With reference to the third edition of his popular textbook *The Policy Process in the Modern State* Hill has maintained the thematic approach of the first edition looking in turn at approaches to policy making in Europe power bureaucracy and the State the rationality incrementalism debate the role of organisational theory in policy implementation street level bureaucracy and discretion Already praised as one of the best readers available in this field Michael Hill's new edition will be even more valued as a reference and teaching resource by students and lecturers alike

Banking on Knowledge Diane Stone, 2003-09-02 This book is one of the first studies of how the World Bank is reinventing itself as the knowledge bank

Public Value and the Digital Economy Usman Chohan, 2021-07-29 How can the public manager create and co create value in the digital economy While there is much exciting work being done there is a pressing need to recontextualize public value theory PVT specifically in terms of its theoretical precepts in the fluid and dynamic environment that the digital economy has produced Much of the theoretical undergirding of PVT predates the full onset of today's digital economy leaving aside phenomena including citizen driven innovations decentralized digital structures and the algorithmic foundations of new economic life This is why a conceptually driven exercise in contemporizing PVT would be of great value to public administration's theoreticians seeking to lead the theory in catching up to the praxis This book seeks to answer the question of creating and co creating public managerial value by developing chapters that revisit categories central to the functions of public managers in relation to other value creating agents under PVT It introduces new and important lenses to PVT that are grounded in the praxis of the digital economy raising new questions about old problems in PVT and generating newer formulations that push PVT forward and make its debates salient to the futures that lay before the modern public manager The book therefore constitutes an important effort to take PVT forward by shedding new light on the potency of the public manager in confronting and constructing the digital economy through co creation with the other agents of public value It will be of interest to researchers academics and policy makers in the fields of public and nonprofit management public administration and policy and PVT

The Public Sector Jan-Erik Lane, 2000-02-24 The Third Edition of this successful textbook introduces students to the major concepts models and approaches surrounding the public sector Now fully updated to include coverage of the New Public Management NPM *The Public Sector* is the most comprehensive textbook on theories

of public policy and public administration The Public Sector is introduced within a three part framework public resource allocation redistribution and regulation Jan Erik Lane explains the basic concepts of each of these broad areas and goes on to examine their consequences for various approaches to the making and implementation of public policy The book explores models of management effectiveness and efficiency and evaluates the contribution among many of public choice and neo institutionalist approaches organizational theory models of normative policy making and expanded in this edition the theory of fiscal federalism The New Edition retains chapters on public sector reform and continues to contrast the logic of the new management state with that of the old administrative state before introducing the basic ideas of New Public Management The Public Sector will be essential reading to all students seeking a deeper understanding of the modern state and government across political science and public policy administration and management **Elgar Concise Encyclopedia of Oil and Gas Law** Tina Soliman Hunter,Angela Dobb,Ernst Nordtveit,2024-11-08 The Elgar Concise Encyclopedia of Oil and Gas Law provides a comprehensive overview of the engineering and geological aspects of oil and gas activities placed within their legal context as well as legal aspects of these activities It focuses on exploration for and production of oil and gas incorporating experience based knowledge and the application of the law to technical issues *The Social Science Encyclopedia* Adam Kuper,2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society
