Explanation And Human Action:

Explanation and Human Action A. R. Louch, 1966 *Explanation and Human Action* A. R. Louch, 1969 Human Action and Its Explanation R. Tuomela, 2012-12-06 This book presents a unified and systematic philosophical account of human actions and their explanation and it does it in the spirit of scientific realism In addition various other related topics such as psychological concept formation and the nature of mental events and states are discussed This is due to the fact that the key problems in the philosophy of psychology are interconnected to a high degree This interwovenness has affected the discussion of these problems in that often the same topic is discussed in several contexts in the book I hope the reader does not find this too frustrating The theory of action developed in this book especially in its latter half is a causalist one In a sense it can be regarded as an explication and refinement of a typical common sense view of actions and the mental episodes causally responsible for them It has of course not been possible to discuss all the relevant philosophical problems in great detail even if I have regarded it as necessary to give a brief treatment of relatively many problems Rather I have concentrated on some key issues and hope that future research will help to clarify the rest *Understanding Human Action* Michael A. Simon, 1981-06-30 Is human behavior determined in accordance with causal laws available to scientists Is science capable of making sense of human actions and social life This book is a penetrating inquiry into the question of what social science is all about In it Michael A Simon challenges the prevailing view with his thesis that the social sciences are sciences in name only and are based upon the freedom and uniqueness of the human subjects of scientific explanation Combining sound scholarship with clear readable prose Simon explains why freedom must be a primitive conception and indicates the conditions for human uniqueness He offers a proposal for what the social sciences might become if researchers recognize that they are not scientists in the ordinary sense of the word The Earth as Transformed by Human Action B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere **Action, Intention, and Reason** Robert Audi, 1993 Three new essays and 11 others published since 1971 develop and defend a general position on action theory that is intentionalist about the nature of action causal and nomic about explanations of action compatibilist about free action and moral responsibility internalist about the grounds of rational actions and holistic about the nature of rationality Paper edition 8105 8 17 95

Explanation in Causal Inference Tyler J. VanderWeele, 2015 A comprehensive examination of methods for mediation and interaction VanderWeele's book is the first to approach this topic from the perspective of causal inference Numerous software tools are provided and the text is both accessible and easy to read with examples drawn from diverse fields The result is an essential reference for anyone conducting empirical research in the biomedical or social sciences *Laws And Explanation In The Social Sciences* Lee C McIntyre, 2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism

Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior

Historical Explanation Gunnar Schumann, 2023-11-14 This book is concerned with the appropriate form of explanations in historiography and the social sciences It combines action theory and philosophy of historiography and develops a theory of teleological explanations of human actions based on late Wittgensteinian and Ordinary Language Philosophy insights In philosophy of action many philosophers favor causal theories of human action Additionally in current philosophy of

historiography the majority view is that historians should explain historical phenomena by their causes This book pushes back against these mainstream views by reviving an anti causal view of explanation of current and past human actions The author argues that disciplines that deal with human actions require a certain form of explanation namely a teleological or intentional explanation This means that past human actions and their results will have to be explained by reasons of agents not by causes Therefore historiography employs a method of explanation which is in stark contrast to the sciences The author thus proposes a Verstehen understanding approach in historiography and the social sciences Historical Explanation will be of interest to scholars and advanced students working in philosophy of action philosophy of history and philosophy of the social sciences Philosophy of Action Jonathan Dancy, Constantine Sandis, 2015-02-17 The Philosophy of Action An Anthology is an authoritative collection of key work by top scholars arranged thematically and accompanied by expert introductions written by the editors This unique collection brings together a selection of the most influential essays from the 1960s to the present day An invaluable collection that brings together a selection of the most important classic and contemporary articles in philosophy of action from the 1960 s to the present day No other broad ranging and detailed coverage of this kind currently exists in the field Each themed section opens with a synoptic introduction and includes a comprehensive further reading list to guide students Includes sections on action and agency willing and trying intention and intentional action acting for a reason the explanation of action and free agency and responsibility Written and organised in a style that allows it to be used as a primary teaching resource in its own right **Persuasion and Human Action** Mary John Smith, 1982

Handbook of Legal Reasoning and Argumentation Giorgio Bongiovanni, Gerald Postema, Antonino Rotolo, Giovanni Sartor, Chiara Valentini, Douglas Walton, 2018-07-02 This handbook addresses legal reasoning and argumentation from a logical philosophical and legal perspective The main forms of legal reasoning and argumentation are covered in an exhaustive and critical fashion and are analysed in connection with more general types and problems of reasoning Accordingly the subject matter of the handbook divides in three parts The first one introduces and discusses the basic concepts of practical reasoning The second one discusses the general structures and procedures of reasoning and argumentation that are relevant to legal discourse The third one looks at their instantiations and developments of these aspects of argumentation as they are put to work in the law in different areas and applications of legal reasoning

Philosophy - Basic Notions, Volume 1 Nicolae Sfetcu, 1900 A basic introduction to the world of philosophy with answers to the deepest questions we all ask ourselves through the lens of the world s greatest philosophers from Plato and Confucius to modern thinkers A guide to the fundamental nature of existence society and the way we think After an overview of philosophy with the history of philosophy branches of philosophy philosophical concepts and philosophical schools and traditions specific topics in philosophy are addressed such as God religion good and evil ethics animal rights politics political philosophy appearance and reality science philosophy of science mind philosophy of mind and art aesthetics Philosophy is the study of

general and fundamental problems concerning such matters as existence knowledge values reason mind and language Philosophical methods include questioning critical discussion rational argument and systematic presentation Classical philosophical questions include both abstract questions Is it possible to know something and prove it What is most real and more practical and concrete questions Is there an optimal way to live Is it better to be just or unjust Do people have free will Philosophy is distinguished from other ways of approaching these problems by its critical generally systematic approach and reliance on rational arguments Other investigations are closely related to art science politics or other pursuits For example is beauty objective or subjective Are there many scientific methods or just one Is political utopia a hopeful dream or hopeless fantasy The main sub fields of academic philosophy include metaphysics concerned with the fundamental nature of reality and being epistemology about the nature and foundations of knowledge and its limits and validity ethics aesthetics political philosophy logic philosophy of science and the history of Western philosophy Many philosophical debates that began in antiquity are still debated today

The Ambiguity of Being Jonathan R. Heaps, 2024-02 The debate in Catholic theology over the relationship between the natural and the supernatural has only occasionally engaged with Bernard Lonergan's philosophical and theological contributions on the topic *The Ambiguity of Being* argues that more detailed engagement with Lonergan's work implies an oversight in both the 20th and 21st century debates *Ambiguity* argues the controversy has failed to notice how the problem of the natural and the supernatural is in fact two problems *Ambiguity* takes both problems in their widest sense to be about action both divine and human The first problem asks how God can act in human action A question for Christians at least since St Augustine faced the Pelagian controversy Lonergan retrieved what he understood to be St Thomas Aquinas' mature solution It is a solution gathering together a whole series of theological and philosophical developments into a subtle metaphysical theory of divine and human cooperation But the recent debates have resituated this problem and various interpretations of St Thomas's solution to it in a modern world with modern concerns about culture and politics for the sake of answering a second intrinsically related but really distinct question what is God doing in human action *Ambiguity* finds that the recent controversy almost always finds participants attempting to deduce an answer to the second modern problem from the medieval metaphysical Thomist solution to the first By contrast *Ambiguity* argues at length the modern problem cannot be reduced to nor an answer deduced from its medieval metaphysical partner because the modern problem of the supernatural what is God doing in human action is a hermeneutical problem that calls out for a hermeneutical answer *Ambiguity* sketches a heuristic for what a fully adequate answer to this question would require suggesting a radical re-conception of modern theology's scope

Our Fundamental Problem Nicholas Maxwell, 2020-06-03 How can the world we live in and see touch hear and smell the world of living things people consciousness free will meaning and value how can all of this exist and flourish embedded as it is in the physical universe made up of nothing but physical entities such as electrons and quarks How can anything be of value if everything in the universe is ultimately just physics In Our

Fundamental Problem Nicholas Maxwell argues that this problem of reconciling the human and physical worlds needs to take centre stage in our thinking so that our best ideas about it interact with our attempts to solve even more important specialized problems of thought and life When we explore this fundamental problem Maxwell argues revolutionary answers emerge for a wide range of questions arising in philosophy science social inquiry academic inquiry as a whole and most important of all our capacity to solve the global problems that threaten our future climate change habitat destruction extinction of species inequality war pollution of earth sea and air An unorthodox introduction to philosophy Our Fundamental Problem brings philosophy down to earth and demonstrates its vital importance for science scholarship education life and the fate of the world

Neurolaw and Responsibility for Action Bebhinn Donnelly-Lazarov, 2018-05-03 Law regulates human behaviour a phenomenon about which neuroscience has much to say Neuroscience can tell us whether a defendant suffers from a brain abnormality or injury and it can correlate these neural deficits with criminal offending Using fMRI and other technologies it might indicate whether a witness is telling lies or the truth It can further propose neuro interventions to change the brains of offenders and so to reduce their propensity to offend And it can make suggestions about whether a defendant knows or merely suspects a prohibited state of affairs so drawing distinctions among the mental states that are central to legal responsibility Each of these matters has philosophical import is a neurological deficit inculpatory or exculpatory what is the proper role for law if the mind is no more than the brain is lying really a brain state and can neuroscience really read the brain In this edited collection leading contributors to the field provide new insights on these matters bringing to light the great challenges that arise when disciplinary boundaries merge

Determinism, Causality and Explanation in Economics Dawid Megger, 2025-06-27 In recent years the concepts of determinism causality and explanation have taken on particular importance in the economic literature Due to the failures of economic predictions based on mathematical models philosophers and economists turned their attention to methodological issues At the same time heterodox approaches to economics have received increased attention including the Austrian school of economics an intellectual tradition that perceives economics as a science of human action and has emphasised the role of causal explanations practically from its inception This book opens by exploring disputes in the

philosophy of science over the fundamental goal of science While instrumentalists argue that scientists should aim at good predictions regardless of the veracity of theories according to scientific realists they should look for knowledge that reflects reality The book shows that the Austrian tradition adheres to scientific realism and can be perceived as a middle ground between historicism and positivism It discusses the determinism free will problem in economics and its methodological relevance Then it examines various theories of causality regularity counterfactual interventionist probabilistic and process mechanistic and their applicability to economics Finally it explores possible and desirable types of explanations in economics As the book tries to show the Austrian school offers a unique and valuable approach to these issues The book will be of particular interest to readers in economic theory philosophy of economics and economic methodology especially those appreciating heterodox traditions
