Helling,2014-05-19 This volume contains the English translation of Felix Kaufmann s 1895 1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl s phenomenology Kelsen s pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K Helling which introduces the historical and theoretical background of Kaufmann s study and specifically illuminates his relation to Alfred Sch tz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students

Routledge History of

Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchquilt of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events

Interpretation and Explanation in the Human Sciences David K. Henderson, 1993 Henderson examines the foundations of an analytic social science approach to develop a well integrated account of the human sciences focusing on the pivotal notions of interpretation and explanation The author acknowledges the importance of interpretive understanding in the human sciences and proposes a methodology that reflects both interpretive practice as well as scientific methodology He refutes the methodological separatists who hold that the logic of explanation and testing in the human sciences is fundamentally different from that of the natural sciences and examines in detail the constraints on interpretation In providing an integrated treatment of these two central issues in social science Henderson offers a thorough analysis of the adequacy of interpretation and the nature of explanation in the human sciences *Understanding Human Action* Michael A.

Simon, 1981-06-30 Is human behavior determined in accordance with causal laws available to scientists Is science capable of making sense of human actions and social life This book is a penetrating inquiry into the question of what social science is all about In it Michael A Simon challenges the prevailing view with his thesis that the social sciences are sciences in name only and are based upon the freedom and uniqueness of the human subjects of scientific explanation Combining sound scholarship with clear readable prose Simon explains why freedom must be a primitive conception and indicates the conditions for human uniqueness He offers a proposal for what the social sciences might become if researchers recognize that they are not scientists in the ordinary sense of the word *Understanding Scientific Understanding* Henk W. de Regt, 2017 Putting scientific understanding center stage within the study of scientific explanations *Understanding Scientific Understanding* develops and defends a philosophical theory of scientific understanding that can describe and explain the historical variation of criteria for understanding actually employed by scientists Book jacket **The Routledge Companion to Hermeneutics**
