## **Explanation New Directions In Philosophy:**

*Explanation: New Directions in Philosophy* The Faculty in Philosophy, 2012-12-06 This volume initiates a series of American University Publications in Philosophy It is expected that as occasion permits volumes will be added to the series contributing to the dialogue that is contemporary philosophy The essays in this volume were written by the faculty in philosophy at The American University during the academic year 1970-71 and appear here for the first time In a variety of modes the essays cluster around epistemological problems collateral with theories of explanation In view of recent attention to such theories this volume explores several new directions in the explanation of behavior language and religion We are especially appreciative of the secretarial assistance of Mrs Madaline Shoemaker whose magic turned many an unreadable manuscript into an intelligible essay We are also grateful to Miss Maria Wilhelm for the final typing of the volume and to the Office of the Dean for Graduate Studies The American University for encouragement and for a financial grant toward typing expenses Barry L Blose Harold A Durfee David F T Rodier Editorial Committee TABLE OF CONTENTS Preface v

CONTEMPORARY DIRECTIONS THE SPIRIT OF CONTEMPORARY AMERICAN PHILOSOPHY Roger T *Explanation* American University Faculty in Philosophy (Washington), 1973 **Explanation** 3 Island Press, 1973-07-31 *Explanation* Roger T. Simonds, 1973 **New Directions in the Russellian Theory of Time** Emiliano Boccardi, L. Nathan Oaklander, Erwin Tegtmeier, 2024-12-26 The main debates in the philosophy of time have centred on whether A theory with events ordered by pastness presentness and futurity or B theory ordered by earlier than or later than are equally fundamental Emiliano Boccardi L Nathan Oaklander and Erwin Tegtmeier instead uphold the Russellian theory or R theory and consider not only the fundamental differences but also its superiority They argue McTaggart's misinterpretation of Russell has led to a false dichotomy between the A and B theories while exploring the connection between temporal relations temporal facts and time In defence of the R theory they argue how it offers a metaphysical explanation of the nature of time in addition to investigating whether ontological theories of time can be considered from a moral or existential point of view Using an ontological approach this volume clarifies what is mistaken about both theories can only be resolved by adopting a Russellian philosophy reaching beyond the A theory vs B theory debate **Explanation Beyond Causation** Alexander Reutlinger, Juha Saatsi, 2018 Explanations are important to us in many contexts in science mathematics philosophy and also in everyday and juridical contexts But what is an explanation In the philosophical study of explanation there is long standing influential tradition that links explanation intimately to causation we often explain by providing accurate information about the causes of the phenomenon to be explained Such causal accounts have been the received view of the nature of explanation particularly in philosophy of science since the 1980s However philosophers have recently begun to break with this causal tradition by shifting their focus to kinds of explanation that do not turn on causal information The increasing recognition of the importance of such non causal explanations in the sciences and elsewhere raises pressing questions for philosophers of

explanation What is the nature of non causal explanations and which theory best captures it How do non causal explanations relate to causal ones How are non causal explanations in the sciences related to those in mathematics and metaphysics This volume of new essays explores answers to these and other questions at the heart of contemporary philosophy of explanation The essays address these questions from a variety of perspectives including general accounts of non causal and causal explanations as well as a wide range of detailed case studies of non causal explanations from the sciences mathematics and metaphysics

**Explanation** the Faculty Philosophy at the American University,1973 **Phenomenology and Beyond: The Self and Its Language** H.A. Durfee,David F.T. Rodier,2012-12-06 It has been a constant intention of the series of AMERICAN UNIVERSITY PUBLICATIONS IN PHILOSOPHY to present to the philosophical reader books which probed the frontiers of contemporary philosophy That intention remains true of the following volume which offers an international dialogue regarding the phenomenological program and succeeding movements Early in this Series we tried as well to initiate philosophical discussion across serious boundaries and barriers which have characterized contemporary reflection That theme also continued in the original essays presented herein With the publication of this fifth volume in the Series we have crossed something of a minor milestone in our endeavor and are appreciative of the kind welcome with which we have been received by the readers We wish to thank sincerely the contributors to this volume for their helpful and willing cooperation We also wish to thank Ms Irmgard Scherer for her translation of Professor Apel s paper as well as Professor Apel himself for reviewing this translation We are also pleased to thank the Office of the Dean of the College Of Arts And Sciences and especially Dean Betty T Bennett for a grant for typing as well as Ms Mary H Wason for her fine typing skills and her kind cooperation

*Four Decades of Scientific Explanation* Wesley C. Salmon,2006-06-15 As Aristotle stated scientific explanation is based on deductive argument yet Wesley C Salmon points out not all deductive arguments are qualified explanations The validity of the explanation must itself be examined *Four Decades of Scientific Explanation* provides a comprehensive account of the developments in scientific explanation that transpired in the last four decades of the twentieth century It continues to stand as the most comprehensive treatment of the writings on the subject during these years Building on the historic 1948 essay by Carl G Hempel and Paul Oppenheim *Studies in the Logic of Explanation* which introduced the deductive nomological D N model on which most work on scientific explanation was based for the following four decades Salmon goes beyond this model s inherent basis of describing empirical knowledge to tells us not only what but also why Salmon examines the predominant models in chronological order and describes their development refinement and criticism or rejection *Four Decades of Scientific Explanation* underscores the need for a consensus of approach and ongoing evaluations of methodology in scientific explanation with the goal of providing a better understanding of natural phenomena

**Feminist Interpretations of Emmanuel Levinas** Tina Chanter,2010-11 This volume of essays all but one previously unpublished investigates the question of Levinas s relationship to feminist thought Levinas known as the philosopher of the

Other was famously portrayed by Simone de Beauvoir as a patriarchal thinker who denigrated women by viewing them as the paradigmatic Other. Reconsideration of the validity of this interpretation of Levinas and exploration of what more positively can be derived from his thought for feminism are two of this volume's primary aims. Levinas breaks with Heidegger's phenomenology by understanding the ethical relation to the Other the face-to-face as exceeding the language of ontology. The ethical orientation of Levinas's philosophy assumes a subject who lives in a world of enjoyment, a world that is made accessible through the dwelling. The feminine presence presides over this dwelling and the feminine face represents the first welcome. How is this feminine face to be understood? Does it provide a model for the infinite obligation to the Other or is it a proto-ethical relation? The essays in this volume investigate this dilemma. Contributors are Alison Ainley, Diane Brody, Catherine Chaliel, Luce Irigaray, Claire Katz, Kelly Oliver, Diane Perpich, Stella Sandford, Sonya Sikka, and Ewa Ziarek.

**Levels of Explanation** Katie Robertson, Alastair Wilson, 2024-11-30. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. The different sciences furnish us with a wide variety of explanations: some work at macroscopic scales, some work at microscopic scales, and some operate across different levels. How do these different explanatory levels relate to one another and what is an explanatory level in the first place? Over the last 50 years, more and more philosophers, both reductionists and anti-reductionists, no longer subscribe to the idea that the best explanation resides at the fundamental physical level. New challenges arise from the success of scientific explanations employing multi-level models which mix levels of explanation from distinctive differences between levels, structures in biology, cognitive science, and social science, from the apparently radical reimagining of the explanatory role of spacetime in our current best theories of fundamental physics, and from the enduring mystery of how higher-level explanations are possible in the first place. These questions naturally connect to classic philosophical ways of thinking about the relationships between levels, reduction, emergence, and fundamentality. This volume presents a snapshot of cutting-edge research on explanatory levels from their conceptual foundations to the details of how they are used in scientific practice. *On Mathematical Explanations of Empirical Phenomena* Lars Arthur Tump, 2025-09-08. This book addresses contemporary issues in the philosophy of mathematics that deal with the role of mathematics in explanations of empirical phenomena. It brings together various debates such as on indispensability, number theory, abstraction, principles, and counterpossibles, which turn out to be highly relevant for evaluating the role of the mathematics in question. The book consists of two parts and has a general introduction of the broader context in which the discussions take place. The first part focuses on the possibility of extracting an argument for mathematical realism in relation to the explanatory indispensability argument and shows that circularity looms unless a controversial abstraction principle is assumed. It also offers an alternative non-mathematical explanation that makes use of relative interpretation. The second part focuses on the possibility of bringing out the explanatory role of

mathematics counterfactually and shows that due to the necessary nature of mathematics any proposal should take into account discussions on the knowledge and the structure of numbers As a whole this book is of great use to academic research in the field of philosophy of mathematics

**New Directions in Literary History** Ralph Cohen, 2022-06-30 First published in 1974 New Directions in Literary History is a comprehensive attempt to present approaches to literary studies that have developed from phenomenology stylistics and linguistics Marxist reconsiderations of literature interdisciplinary studies and analysis of reader response Written by an international group of scholars the essays are taken from the pages of New Literary History They range from the Middle Ages to contemporary literature European and American literary critics are here represented together with an art critic a philosopher and a novelist Their essays deal with crucial problems in the study of literature the relationship of the contemporary critic to works of the past the place of method in literary study how reading takes place the role of the reader in different literary periods in providing a guide to interpretation the language of literature and its relation to natural or ordinary language the origin and decline of literary forms and what constitutes literature especially in the relation between fictional character and autobiography Although the essays are essentially concerned with theoretical issues they also examine the practical applications to literature Students of English literature and literary theory will find this book particularly interesting

**Scientific Explanation** Philip Kitcher, Wesley C. Salmon, 1962-05-25 Scientific Explanation was first published in 1962 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Is a new consensus emerging in the philosophy of science The nine distinguished contributors to this volume apply that question to the realm of scientific explanation and although their conclusions vary they agree in one respect there definitely was an old consensus Co editor Wesley Salmon s opening essay Four Decades of Scientific Explanation grounds the entire discussion His point of departure is the founding document of the old consensus a 1948 paper by Carl G Hempel and Paul Oppenheim Studies in the Logic of Explanation that set forth with remarkable clarity a mode of argument that came to be known as the deductive nomological model This approach holding that explanation does not move beyond the sphere of empirical knowledge remained dominant during the hegemony of logical empiricism from 1950 to 1975 Salmon traces in detail the rise and breakup of the old consensus and examines the degree to which there is if not a new consensus at least a kind of reconciliation on this issue among contemporary philosophers of science and clear agreement that science can indeed tell us why The other contributors in the order of their presentations are Peter Railton Matti Sintonen Paul W Humphreys David Papineau Nancy Cartwright James Woodward Merrilee H Salmon and Philip Kitcher

**Facing the Other** Sean Hand, 2014-04-04 Emmanuel Levinas is one of the key philosophers in the post Heideggerian field and an increasingly central presence in contemporary debates about identity and responsibility His work spans and encapsulates the major philosophical and ethical concerns of the twentieth century combining the insights of a basic phenomenological training with the demands

of a Jewish culture and its basis in the endless exegesis of Talmudic reading His concerns and subjects are wide they include the Other the body infinity women Jewish Christian relations Zionism and the impulses and limits of philosophical language itself This collection explicates Levinas s major contribution to these debates namely the idea of the primacy of ethics over ontology or epistemology It investigates how in the wake of a post structuralist orthodoxy scholars and practitioners in such fields as literary theory cultural studies feminism and psychoanalysis are turning to Levinas s work to articulate a rediscovered concern with the ethical dimension of their discipline Stressing the largely assumed but unexplored Jewish dimension of Levinas s work this book is an important contribution to the field of Jewish studies and philosophy *New Directions in Rhizomatic Learning* Myint Swe Khine,2023-06-05 Drawing on the theories and philosophies of Deleuze and Guattari this edited collection explores the concept of rhizomatic learning and consolidates recent explorations in theory building and multidisciplinary research to identify new directions in the field Knowledge transfer is no longer a fixed process Rhizomatic learning posits that learning is a continuous dynamic process making connections using multiple paths without beginnings and ending in a nomadic style The chapters in this book examine these notions and how they intersect with a contemporary and future global society Tracking the development of the field from poststructuralist thinking to nomadic pedagogy this book goes beyond philosophy to examine rhizomatic learning within the real world of education It highlights innovative methods frameworks and controversies as well as creative and unique approaches to both the theory and practice of rhizomatic learning Bringing together international contributors to provide new insights into pedagogy for 21st century learning this book will be of interest to academics researchers and postgraduate students in education and adjacent fields

**Explanation in Action Theory and Historiography** Gunnar Schumann,2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography Collingwood on Philosophical Methodology Karim Dharamsi,Giuseppina D'Oro,Stephen Leach,2019-01-17 This book discusses Collingwood s conception of the role and character of philosophical analysis It explores questions such as is there anything distinctive about the activity of philosophizing If so what distinguishes philosophy from other forms of inquiry What is the relation between philosophy and science and between philosophy and history For much of the twentieth century philosophers philosophized with little self

awareness Collingwood was exceptional in the attention he paid to the activity of philosophizing This book will be of interest both to those who are interested in Collingwood's philosophy and more generally to all who are interested in the question what is philosophy      *Teaching Historical Narratives* Jon A. Levisohn, 2024-11-28 With this book Jon Levisohn argues that current history education is set up in a way that sees students of history at one end of a continuum with the academic experts in the field of history at the other and where the goal of history education is to help students to think like historians Building on a critical engagement with Carl Hempel Hayden White and David Carr as well as contemporary work in virtue epistemology Levisohn proposes a new theory of historiography which serves as a set of guidelines for the teaching and learning of history According to the theory the work of historiography is best characterized as a negotiation among narratives weaving together received narratives with new information and ideas in order to construct a new narrative This negotiation happens with a particular orientation towards negative evidence or flexible disconfirmationism and is assessed according to the openness sensitivity responsibility creativity boldness and humility i.e. the virtues of historical interpretation The book rethinks the work of history education offering new ways of thinking about the goals of the teaching of history namely in terms of the cultivation of the interpretive virtues      **The Provocation of Levinas** Robert Bernasconi, David Wood, 2002-11 This book brings together the most interesting and far reaching responses to the work of Levinas in three key areas contemporary feminism psychotherapy and Levinas's relation to other philosophers
