Dick, National Aeronautics and Space Administration, 2010-07-07 On 29 July 1958 President Dwight D Eisenhower signed the National Aeronautics and Space Act creating the National Aeronautics and Space Administration NASA which became operational on 1 October of that year Over the next 50 years NASA achieved a set of spectacular feats ranging from advancing the well established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight In the midst of the geopolitical context of the Cold War 12 Americans walked on the Moon arriving in peace for all mankind Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble as well as the pale blue dot from the edge of the solar system A flotilla of spacecraft has studied Earth while other spacecraft have probed the depths of the solar system and the universe beyond In the 1980s the evolution of aeronautics gave us the first winged human spacecraft the Space Shuttle and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars With the Apollo fire and two Space Shuttle accidents NASA has also seen the depths of tragedy In this volume a wide array of scholars turn a critical eye toward NASA s first 50 years probing an institution widely seen as the premier agency for exploration in the world carrying on a long tradition of exploration by the United States and the human species in general Fifty years after its founding NASA finds itself at a crossroads that historical perspectives can only help to illuminate *Applying Standards-Based Constructivism* Pat Flynn, Paul Vermette, Don Mesibov, 2013-09-27 This book provides teachers with practical ways of constructing lessons that will engage students and help them develop personal responsibility for their own learning State learning standards and related core curricula require students to demonstrate what they know and understand Students cannot learn to demonstrate their understanding if they sit passively The authors

call for constructivist practices which recognize the important role played by standards and student accountability and which also acknowledge the practical need for lecture in an appropriate context This book also shows the links between constructivism and differentiated instruction and other approaches to teaching and learning

Formation of Gold Deposits Neil Phillips, 2022-06-16 This book addresses the origin of gold deposits to answer questions of science and curiosity These answers contribute in turn to the improved exploration and mining of gold Initially there is a summary of the methods used to address the genesis of gold deposits including some of the essential science and concepts Five basic observations follow that apply to many gold deposits and need to be considered in any genetic ideas Magmatic processes enriching gold are discussed followed by the role of aqueous fluids during gold deposit formation at elevated temperatures and pressures Modifying effects after deposit formation include high grade metamorphism retrogression weathering and erosion The main types of gold deposits are then explained within the spectrum of viable genetic ideas with informal names for these examples that include gold only gold plus Carlin slate belt epithermal porphyry iron oxide copper gold and Archean greenstone Case histories are included in which the role of gold geology contributed directly to discoveries one example is at the province scale and another at the goldfield scale Unlike other books on the subject this one addresses virtually all gold deposit types rather than focusing on one type in isolation The primary readership includes industry geologists senior undergraduates postgraduates and those with some knowledge of science and an interest in the gold industry

Unifying Geography David T. Herbert, John A. Matthews, 2004-08-05 It can be argued that the differences in

content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography
