Explorations Into Urban Structure:

Explorations into urban structure by Melvin M. Webber [and others]. , **Explorations into Urban Structure** Melvin M. Webber, 2016-11-11 The remarkable expansion in metropolitan growth rates has been nearly matched by the phenomenal expansion in the literature commenting upon it Social scientists of every discipline and politicians of every persuasion have been straining to understand the changing urban scene and searching for effective ways of planning for change However these efforts have been typically handicapped by simplistic and unitary conceptions of the metropolis Most of the commentaries have conceived the metropolis as mappable and discrete settlement and metropolitan planning has been conceived as willful redesigning of spatial forms In this volume six students of metropolitan development present a challenging reappraisal and fresh conceptual approaches to the analysis of urban systems Drawing upon the accumulating theory in economics sociology political science geography and city planning they reconceptualize urban structure and function refocusing attention from the forms of population density to the processes of human interaction They see the urban system as a complex network of functional interdependencies that are reflected in the intricate processes of communication intergovernmental competition and market decision The authors are concerned primarily with increasing the effectiveness of public policy in this field The conceptual clarity they bring to that task leads them to approach metropolitan planning with a new respect for the pluralism and diversity that are the distinguishing marks of complex urban processes It is only through the recognition of these processes that we can hope to overcome the seemingly insurmountable problems of urban planning and renewal In an increasingly urban society these problems take on pressing urgency *Explorations into Urban Structure* is a timely thought provoking and direction setting book about some of the key conceptual and policy issues of our time Contributors to this landmark volume include John W Dyckman Donald L Foley Albert Z Guttenberg William L C Wheaton and Catherine Bauer Wurster **Explorations into urban structure** Melvin M. Wheaton, Catherine Bauer Wurster, 1964 **Explorations Into Urban Structure** William G. Grigsby, 1964 *Explorations in Urban Design* Matthew Carmona, 2017-05-15 Whilst recognising that distinctly different traditions exist within the study and practice of urban design this book advances an interdisciplinary and innovative approach which is of direct importance to understanding the urban forms conditions practices and processes It enthuses and inspires users who are grappling with urban design research problems but who need inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities While each of the contributors presents a particular approach to researching the field sometimes focusing centrally on particular research methodologies others cutting across

methods or focusing on theory all include discussion of actual research projects to illustrate their application to real world problems This book will be valuable to everyone from the informed undergraduate student about to embark on their first dissertation to PhD students and seasoned researchers immersed in methodological and conceptual complexity and wishing to compare available and appropriate methodological paths

English Industrial Cities of the Nineteenth Century Richard Dennis, 1986-07-17 In the first full length treatment of nineteenth century urbanism from a geographical perspective Richard Dennia focuses on the industrial towns and cities of Lancashire Yorkshire the Midlands and South Wales that epitomised the spirit of the new age

The New Urban Frontier Neil Smith, 2005-10-26 Why have so many central and inner cities in Europe North America and Australia been so radically revamped in the last three decades converting urban decay into new chic Will the process continue in the twenty first century or has it ended What does this mean for the people who live there Can they do anything about it This book challenges conventional wisdom which holds gentrification to be the simple outcome of new middle class tastes and a demand for urban living It reveals gentrification as part of a much larger

shift in the political economy and culture of the late twentieth century Documenting in gritty detail the conflicts that gentrification brings to the new urban frontiers the author explores the interconnections of urban policy patterns of investment eviction and homelessness The failure of liberal urban policy and the end of the 1980s financial boom have made the end of the century city a darker and more dangerous place Public policy and the private market are conspiring against minorities working people the poor and the homeless as never before In the emerging revanchist city gentrification has become part of this policy of revenge Urban Social Geography Paul Knox, Steven Pinch, 2014-09-15 The 6th edition of this highly respected text builds upon the successful structure engaging writing style and clear presentation of previous editions Examining urban social geography from a theoretical and historical perspective it also explores how it has developed into the modern day Taking account of recent critical work whilst simultaneously presenting well established approaches to the subject it ensures students are well informed about all the issues The result is a topical book that is clear and accessible for students Behavioural Travel Modelling David A. Hensher, Peter R. Stopher, 2021-05-11 Originally published in 1979 this study deals on a fully comprehensive level with both passenger and freight travel The 40 chapters deal with an extensive range of related topics including equilibrium modelling theoretical and conceptual developments in demand modelling goods movement and forecasting and policy It outlines approaches to understanding travel behaviour which move beyond the individual choice theory towards a broader consideration of activities **The extended self** Chris Abel, 2016-10-28 In this wide ranging study of architecture and cultural evolution the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology based culture and its energy hungry products The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements Drawing upon research from philosophy psychology and the neurosciences the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis Inventing Future Cities Michael Batty, 2018-12-11 How we can invent but not predict the future of cities We cannot predict future cities but we can invent them Cities are largely unpredictable because they are complex systems that are more like organisms than machines Neither the laws of economics nor the laws of mechanics apply cities are the product of countless individual and collective decisions that do not conform to any grand plan They are the product of our inventions they evolve In Inventing Future Cities Michael Batty explores what we need to understand about cities in order to invent their future Batty outlines certain themes principles that apply to all cities He investigates not the invention of artifacts but inventive processes Today form is becoming ever more divorced from function information networks

now shape the traditional functions of cities as places of exchange and innovation By the end of this century most of the world s population will live in cities large or small sometimes contiguous and always connected in an urbanized world it will be increasingly difficult to define a city by its physical boundaries Batty discusses the coming great transition from a world with few cities to a world of all cities argues that future cities will be defined as clusters in a hierarchy describes the future high frequency real time streaming city considers urban sprawl and urban renewal and maps the waves of technological change which grow ever more intense and lead to continuous innovation an unending process of creative destruction out of which future cities will emerge Form Syntax for Quantitative Urban Morphology and Urban Design Analyses Yu

Ye,2025-01-31 This book sets out to develop a quantitative based analysis Form Syntax which is able to identify various prototypes of urban forms and their degrees of urbanity thereby enhancing urban design practices Form Syntax is a combination of emerging quantitative analysis tools with qualitative urban morphology tradition It integrates a set of spatial analysis tools including Space Syntax Spacematrix and Mixed use index MXI through GIS to measure the morphological features of streets buildings and blocks and functions Furthermore the Form Syntax assists in comprehending the intrinsic evolving logic of urban form Based on the findings of urban morphology the Urban Form Index could function as an analytical instrument in numerous phases of the urban design process thereby promoting urban vitality Moreover morphology led understandings of urban design theory can inform urban design practices This study endeavors to introduce quantitative thinking into urban morphology and urban design with the objective of developing a lively built environment and pursuing more vibrant place making Urban Transportation Research and Planning, Current Literature ,1965
