provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change. Nevertheless, there is a lack of research exploring climate visualization from an audience perspective. This thesis addresses this gap. The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective, focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization. In addition, the thesis discusses the potential contributions and/or limitations of climate visualization from a communication perspective. Based on a social semiotic theoretical framework, this thesis employs focus group interviews to study participants' meaning-making related to two cases of climate visualization: a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes, impacts, and mitigation alternatives; and a web-based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change. The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences. Nevertheless, despite these communicative qualities, the analyses also show that participants' interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations. Although climate visualization can enhance a sense of proximity with climate change, the localization of climate risk can also lead to participants downplaying the significance of climate impacts. In addition, despite the intentions of inducing a sense of agency in both cases of climate visualization, participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors. These findings show that although climate visualization presents certain communicative qualities, it is not a panacea for engaging lay audiences with climate change. This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication.

Kommunikation kring klimatförändringar är ett aktuellt och relevant ämne och många bedömare anser att kommunikation kring orsaker, effekter och möjliga alternativ är en viktig del i arbetet med att mota klimatutmaningarna. Klimatvisualisering är en process för att skilja klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning. I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan. I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppsminskningar och klimatanpassning. Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv. Denna avhandling adresserar denna kunskapslucka. Det övergripande syftet är således att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman tolkar innebörden av klimatförändringar såsom de representeras i två exempel på klimatvisualisering. Avhandlingen behandlar

ven klimatvisualiseringens mjlga bidrag och eller begrnsningar ur ett kommunikationsperspektiv Med utgngspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomf rdes fokusgruppsstudier f r att studera deltagarnas meningsskapande i relation till tv exempel p klimatvisualisering en film som visas i en domteater framtagna f r svenska gymnasieelever med m ls ttningen att uppmuntra till reflektion kring klimatf r ndringarnas orsaker effekter och alternativ f r utsl ppsminskning samt ett webbaserat verktyg f r klimatanpassning som utvecklats f r att st dja hus gare i Norden att anpassa sig till klimatf r ndringarnas lokala effekter Resultaten av denna avhandling visar att klimatvisualisering kan st dja mottagarna att konkretisera annars abstrakta aspekter av klimatf r ndringar och att ett lokalt fokus kan f klimatf r ndringarna att framst som mer personligt relevanta och intressanta f r m lgruppen Dock visar analyserna ven trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras f rf rst else om klimatf r ndringar som ett globalt och avl gset problem som ska l sas av andra akt rer s som nationella regeringar eller genom internationella politiska f rhandlingar ven om klimatvisualisering kan f rst rka k nslan av n rhet till klimatf r ndringar kan lokaliseringen av klimatriskerna ven leda till att deltagare tonar ned de lokala klimatriskernas betydelse Dessutom trots att b da fallen av klimatvisualisering avs g att skapa en k nsla av att kunna p verka blev ansvaret f r klimat tg rder f rem l f r kritisk f rhandling fr n deltagarnas sida de f rlade ansvaret f r att hantera klimatutmaningarna till andra akt rer Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte r n gon patentl sning f r klimatkommunikation Detta understryker ven vikten av att ta h nsyn till kulturella och sociala aspekter av den kommunikativa h ndelsen n r man studerar och utvecklar verktyg f r klimatvisualisering
