## **Exploring Early Childhood:**

**Exploring Early Years Education and Care** Linda Miller, Rose Drury, Robin Campbell, 2013-09-05 This textbook has been developed and written in response to the huge changes in the Early Years sector. It will encourage students to go beyond the basics to explore and research issues in more depth and to take a critical and reflective approach to their practice. The book takes full account of the curriculum framework and the Foundation Stage for early years; it also acknowledges the National Literacy Strategy and the National Numeracy Strategy. *Exploring Issues in Early Years Education and Care* enables readers to go beyond a basic introductory level and introduces the key issues in early childhood education and care such as researching young children, the place of work in early childhood, reducing inequalities in child health and comparative perspectives in early childhood literacy. Although rooted firmly in practice and with a UK focus, the text introduces controversial issues and takes a look beyond the UK. This book comes from the team that wrote the best-selling *Looking at Early Years Education and Care*. The contributors' wide range of backgrounds in early years health and education ensures that the text will meet the needs of students and tutors on many different early years and early primary courses as well as reflective practitioners working in a range of Early Years settings.

**Exploring Early Childhood Care and Education Levers to Improve Population Health** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Roundtable on Population Health Improvement, 2019-02-15. On September 14, 2017, the Roundtable on Population Health Improvement of the National Academies of Sciences, Engineering, and Medicine convened a workshop to explore the intersection of health and early childhood care and education, two key social determinants of health. This workshop follows a 2014 roundtable workshop that considered the interface between the education and health sectors broadly from research and metrics to cross-sectoral partnerships and financing. The 2017 workshop continued that discussion with a deeper focus on early childhood birth through age 5 as a critical period in human development and an important opportunity for educational and related interventions. This publication summarizes the presentations and discussions from the 2017 workshop.

**The Preschool in Action** Ronald K. Parker, 1972. The Pre-school in Action Ronald K. Parker, 1971.

**Re-Exploring Play and Playfulness in Early Childhood Teacher Education** Melanie K. Felton, Diana H. Cortez-Castro, 2024-08-12. This book explores early childhood teacher educators' lived experiences in designing and implementing intentional play-based approaches in teaching preservice teachers. The chapters cover action research, teaching stories about playful classroom practices, and diverse narratives about developing preservice teachers' positive views toward play. Early childhood teacher educators will be encouraged to re-explore their beliefs about the roles of play and playfulness in higher education. Readers will learn playful strategies to actively engage preservice teachers in building meaningful knowledge about play and how to use play to support young children's learning across varied cultural contexts, experiences, and individual differences.
