Doing Text Pete Bennett, Julian McDougall, 2017-02-14 This collection re imagines the study of English and media in a way that decentralises the text e g romantic poetry or film noir or media formats platforms e g broadcast media new media Instead the authors work across boundaries in meaningful thematic contexts that reflect the ways in which people engage with reading watching making and listening in their textual lives In so doing this project recasts both subjects as combined in a more reflexive critical space for the study of our everyday social and cultural interactions Across the chapters the authors present applicable learning and teaching strategies that weave together art works films social practices creativity viral media theater TV social media videogames and literature The culmination of this range of strategies is a reclaimed blue skies approach to progressive textual education free from constraining shackles of outdated ideas about textual categories and value that have hitherto alienated generations of students and both English and media from themselves

Literary Praxis Piet-Hein van de

Ven, Brenton Doecke, 2011-11-16 *Literary Praxis A Conversational Inquiry into the Teaching of Literature* explores the teaching of literature in secondary schools. It does this from the vantage point of educators in a range of settings around the world as they engage in dialogue with one another in order to capture the nature of their professional commitment, the knowledge they bring to their work as literature teachers, and the challenges of their professional practice as they interact with their students. The core of the book comprises accounts of their day to day teaching by Dutch and Australian educators. These teachers do more than capture the immediacy of the here and now of their classrooms; they attempt to understand those classrooms relationally, exploring the ways in which their professional practice is mediated by government policies, national literary traditions, and existing traditions of curriculum and pedagogy. They thereby enact a form of literary praxis that grapples with major ideological issues, most notably the impact of standards based reforms on their work. Educators from other countries then comment on the cases written by the Dutch and Australian teachers, thus taking the concept of praxis to a new level as part of a comparative inquiry that acknowledges the richly specific character of the cases and resists viewing teaching around the world as though it lends itself unproblematically to the same standards of measurement as in the fetish made of PISA. They step back from a judgmental stance and try to understand what it means to teach literature in other educational settings than their own. The essays in this collection show the complexities of literature teaching as a form of professional praxis, exploring the intensely reflexive learning in which teachers engage as they induct their students into reading literary texts and reflect on the socio cultural contexts of their work.
