Writing History in the Medieval Islamic World Fozia Bora, 2019-06-13 In the encyclopaedic fourteenth century Arabic chronicles produced in Mamluk cities bore textual witness to both recent and bygone history including that of the Fatimids 969 1171CE For in two centuries of rule over Egypt and North Africa the Isma ili Fatimids had left few self generated historiographical records Instead it fell to Ayyubid and Mamluk historians to represent the dynasty to posterity This monograph sets out to explain how later historians preserved interpreted and re organised earlier textual sources Mamluk historians engaged in a sophisticated archival practice within historiography rather than uncritically reproducing earlier reports In a new diplomatic edition translation and analysis of Mamluk historian Ibn al Furat s account of late Fatimid rule in *The History of Dynasties and Kings* a widely known but barely copied universal chronicle of Islamic history Fozia Bora traces the survival of historiographical narratives from Fatimid Egypt Through Ibn al Furat s text Bora demonstrates archivality as the heuristic key to Mamluk historical writing This book is essential for all scholars working on the written culture and history of the medieval Islamic world and paves the way for a more nuanced reading of pre modern Arabic chronicles and of the epistemic environment in which they were produced

Arabs in the Early Islamic Empire Ulrich Brian Ulrich, 2019-05-09 Examining a single broad tribal identity al Azd from the immediate pre Islamic period into the early Abbasid era this book notes the ways it was continually refashioned over that time It explores the ways in which the rise of the early Islamic empire influenced the peoples of the Arabian Peninsula who became a core part of it and examines the connections between the kinship societies and the developing state of the early caliphate This helps us to understand how what are often called tribal forms of social organisation identity conditioned its growth and helped shape what became its common elite culture Studying the relationship between tribe and state during the first two centuries of the caliphate author

Brian Ulrich's focus is on understanding the survival and transformation of tribal identity until it became part of the literate high culture of the Abbasid caliphate and a component of a larger Arab ethnic identity. He argues that from pre-Islamic Arabia to the caliphate, greater continuity existed between tribal identity and social practice than is generally portrayed.

Walāyah in the Fāṭimid Ismā'īlī Tradition Elizabeth R. Alexandrin, 2017-07-19 In this original study, Elizabeth R. Alexandrin examines the complex relationships that can be inscribed between medieval Ismā'īlī thought as an intellectual tradition with a devotional practice of reliance on the Imam and as a politico-esoteric system that redefined governance during the Fāṭimid caliphate in the eleventh century. Alexandrin's work is a departure from recent Western scholarship that focuses on similarities among early Islamic traditions. She argues instead that under the guidance of the Fāṭimid Ismā'īlī chief missionary al-Mu'ayyad f al-Dīn al-Shīrāzī (d. 1078 CE), the concept of walāyah (divine guidance) became closely associated with religious-political authority on the one hand and the perfection of the individual human being on the other. By signaling and affirming how the Fāṭimid caliphs were the heirs of walāyah and by proposing new definitions of the seal of God's friends (khawāṭim al-awliyā), al-Mu'ayyad broadened the contexts of making esoteric knowledge public and shifted the apocalyptic frameworks of Islamic messianism.

Crusading and Masculinities Natasha R. Hodgson, Katherine J. Lewis, Matthew M. Mesley, 2019-03-05 This volume presents the first substantial exploration of crusading and masculinity, focusing on the varied ways in which the symbiotic relationship between the two was made manifest in a range of medieval

settings and sources and to what ends Ideas about masculinity formed an inherent part of the mindset of societies in which crusading happened and of the conceptual framework informing both those who recorded the events and those who participated Examination and interrogation of these ideas enables a better contextualised analysis of how those events were experienced comprehended and portrayed The collection is structured around five themes sources and models contrasting masculinities emasculation and transgression masculinity and religiosity and kingship and chivalry By incorporating masculinity within their analysis of the crusades and of crusaders the contributors demonstrate how such approaches greatly enhance our understanding of crusading as an ideal an institution and an experience Individual essays consider western campaigns to the Middle East and Islamic responses events and sources from the Iberian peninsula and Prussia are also interrogated and re examined thus enabling cross cultural comparison of the meanings attached to medieval manhood The collection also highlights the value of employing gender as a vital means of assessing relationships between different groups of men whose values and standards of behaviour were socially and culturally constructed in distinct ways **Dynasties**

Intertwined Matt King, 2022-06-15 **Dynasties Intertwined** traces the turbulent relationship between the Zirids of Ifriqiya and the Normans of Sicily during the eleventh and twelfth centuries In doing so it reveals the complex web of economic political cultural and military connections that linked the two dynasties to each other and to other polities across the medieval Mediterranean Furthermore despite the contemporary interfaith holy wars happening around the Zirids and Normans their relationship was never governed by an overarching ideology like jihad or crusade Instead both dynasties pursued policies that they thought would expand their power and wealth either through collaboration or conflict The relationship between the Zirids and Normans ultimately came to a violent end in the 1140s when a devastating drought crippled Ifriqiya The Normans seized this opportunity to conquer lands across the Ifriqiyian coast bringing an end to the Zirid dynasty and forming the Norman kingdom of Africa which persisted until the Almohad conquest of Mahdia in 1160 Previous scholarship on medieval North Africa during the reign of the Zirids has depicted the region as one of instability and political anarchy that rendered local lords powerless in the face of foreign conquest Matt King shows that to the contrary the Zirids and other local lords in Ifriqiya were integral parts of the far reaching political and economic networks across the Mediterranean Despite the eventual collapse of the Zirid dynasty at the hands of the Normans **Dynasties Intertwined** makes clear that its emirs were active and consequential Mediterranean players for much of the eleventh and twelfth centuries with political agency independent of their Christian neighbors across the Strait of Sicily [Exploring World History through Geography](#) Julie
