Exploring Education

AW Rasmussen

Exploring Education:

Exploring Education Alan R. Sadovnik, Peter Cookson, Jr., Susan Semel, Ryan Coughlan, 2017-10-10 This much anticipated fifth edition of *Exploring Education* offers an alternative to traditional foundations texts by combining a point of view analysis with primary source readings. Pre and in service teachers will find a solid introduction to the foundations disciplines: history, philosophy, politics, and sociology of education, and their application to educational issues including school organization and teaching, curriculum and pedagogic practices, education and inequality, and school reform and improvement. This edition features substantive updates including additions to the discussion of neo liberal educational policy, recent debates about teacher diversity, updated data and research, and new selections of historical and contemporary readings. At a time when foundations of education are marginalized in many teacher education programs and teacher education reform pushes scripted approaches to curriculum and instruction, *Exploring Education* helps teachers to think critically about the what and why behind the most pressing issues in contemporary education. *Exploring Education Studies* Vivienne Walkup, 2013-11-04 *Exploring Education Studies* is a rich and multi layered investigation of the world of education. Although aimed at Education Studies courses, the book's thematic approach also makes it an excellent general introduction to education. Building around four central themes: psychology, sociology, current policy, and global education, the authors' lively discussions capture the essence of this diverse subject area. *Exploring Education and Professional Practice* Kathleen Mahon, Susanne Francisco, Stephen Kemmis, 2016-12-20 This book was written to help people understand and transform education and professional practice. It presents and extends the theory of practice architectures and offers a contemporary account of what practices are composed of and how practices shape and are shaped by the arrangements with which they are enmeshed in sites of practice. Through its empirically based case chapters, the book demonstrates how the theory of practice architectures can be used as a theoretical, analytical, and transformational resource to generate insights that have important implications for practice, theory, policy, and research in education and professional practice. These insights relate to how practices are shaped by arrangements and other practices present in specific sites of practice, including early childhood education settings, schools, adult education, and workplaces. They also relate to how practices create distinctive intersubjective spaces so that people encounter one another in particular ways: a) in particular semantic spaces, b) that are realised in particular locations and durations in physical space-time, and c) in particular social spaces. By applying such insights, readers can work towards changing practices by transforming the practice architectures that make them possible. *Exploring Education at Postgraduate Level* Anne O'Grady, Vanessa Cottle, 2015-09-25 There is a growing demand for educational professionals to develop a more critical understanding of the key and emerging debates in education so that they can better meet the challenges and demands placed upon them. *Exploring Education at Postgraduate Level* represents a range of perspectives from educational experts to academic researchers and highlights the key issues surrounding contemporary education.

Organised into three parts and drawing on key issues in education theory policy and practice the book considers areas such as SEN evaluating learning ESOL and gender Featuring reflective questions case studies and summaries of core ideas the chapters include Troublesome learning journey Applying educational thinkers to contemporary educational practice Values production through social and emotional learning Policy research In defence ad hocery We are all critically reflective now The politics of critical reflection in higher education and in the work place Developing critical thought about SEN The refuge of relativism Aimed at supporting students on Masters level courses this accessible but critically provocative text is an essential resource for those wishing to develop a more critical understanding of the role purpose and function of educational systems and practices

Exploring Education and Childhood Dominic Wyse, Rosemary Davis, Phil Jones, Sue Rogers, 2015-06-05 Education has become dominated by testing standards interventions strategies and political policy Yet while elements such as these are important Exploring Education and Childhood contends it is childhood including its sociology and psychology that is the vital holistic context for teaching and learning Written by a team of specialists who bring both experience of classroom teaching teacher training and of rigorous research and scholarship each chapter examines a topic that is of vital importance to teaching and the work of teachers The book explores examples of educational practice that illuminate contemporary problems and future possibilities for education develops educational theory to better understand practice and policy and critically evaluates education policy in the international context With an emphasis on reflection and deep thinking something that all the best teachers are able to do key issues in the book include the voice of the child metacognitive strategies agency pedagogy and curriculum performativity standards and school readiness educational settings and new technology teacher expertise and agency diversity and child agency families society and school choice Illustrated with powerful examples of practice together with key questions for reflection and further reading Exploring Education and Childhood challenges education professionals policy makers and all people with an interest in education to envision a new future It will be essential reading for all student teachers and teachers and is particularly appropriate for Masters level research professional studies Education Studies

Exploring Education Through Phenomenology Gloria Dall'Alba, 2010-01-15 This book explores the resurgence of interest in phenomenology as a philosophy and research movement among scholars in education the humanities and social sciences Brings together a series of essays by an international team of philosophers and educationalists Juxtaposes diverse approaches to phenomenological inquiry and addresses questions of significance for education today Demonstrates why phenomenology is a contemporary movement that is both dynamic and varied Highlights ways in which phenomenology can inform a broad range of aspects of educational theorising and practice including learning through the body writing online being an authentic teacher ambiguities in becoming professionals and school transition

Exploring Education for Digital Librarians Sue Myburgh, Anna Maria Tammaro, 2013-04-17 Exploring Education for Digital Librarians provides a refreshing perspective on the discipline and profession of Library and Information

Science LIS with a focus on preparing students for careers as librarians who can deal with present and future digital information environments A re examination of the knowledge base of the field combined with a proposed theoretical structure for LIS provide the basis for this work which also examines competencies for practice as well as some of the international changes in the nature of higher education The authors finally suggest a model that could be used internationally to educate librarians for their new roles and social responsibilities in a digitised networked world The twelve chapters of this book cover key issues in education for digital librarians including the necessity of regenerating the profession current contexts previous research on education for digital librarians understanding the dimensions of the discipline and profession of librarianship and the distinctions between them the social purpose of librarianship as a profession and the theoretical framework which supports the practice of the profession a brief analysis of curriculum design pedagogies and teaching methods and a glimpse of the proactive and important future role of librarianship in society Considers the ubiquitous misunderstanding that technology can replace libraries and librarians Provides a theoretical view of the field which can contribute awareness of dimensions of the dilemmas which the discipline profession currently faces Presents a broad international perspective which provides a basis for a new model for LIS education

Exploring Education and Democratization in South Asia Tania Saeed,Radhika Iyengar,Matthew A. Witenstein,Erik Jon Byker,2024-02-19 This volume brings together scholars practitioners activists and students to reflect on socio political transitions taking place in countries across South Asia and their implications for democracy and education It provides an important intervention for comparative education in South Asia by looking at the kind of ideological tensions that exist within the education systems and how these competing agendas are visible at different levels At a time when students have been protesting for their rights across educational institutions in South Asia where the Covid 19 pandemic has exacerbated inequalities with learning losses and job losses this collection creates a space to reflect on the limitations and possibilities of education in democracies across South Asia
