X-kit FET Grade 12 GEOGRAPHY, 2008 **Trade, Development and Environment** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2006-08-16 This report finds that Department for International Development DFID has the potential to take the lead internationally on integrating the environment into development the structures and links exist but there is still an under appreciation of the role of the environment in sustainable development The report sets out the background covering what poor people want the Millennium Ecosystem Assessment and Millennium Development Goals It then considers development aid and how it is changing Then the DFID's performance in integrating environment into development is critically examined Subjects covered include DFID policy water

climate and energy agriculture growth environmental capacity environmental screening and the environment strategy The Committee notes the failure of the Department to develop a coherent approach on the ground as a damning review of country programmes has shown It also highlights many areas where policy is poorly drafted and implemented and where the Department's environmental expertise has been allowed to wither The recent White Paper Eliminating world poverty 2006 Cm 6876 ISBN 0101687621 is seen as a missed opportunity to make the environment as central to its work as the Department itself has made clear it should be

Environmental Education in a Climate of Reform Sylvia Christine Almeida, 2015-10-29 India is grappling with serious environmental issues that have been largely sparked by its galloping economy As a measure of its seriousness to reduce the environmental impacts it has spearheaded numerous policy initiatives One of the major thrusts of the proposed initiatives to curb environmental degradation has been to create an informed and well educated citizenry The federal mandates have triggered new curriculum policies and the compulsory teaching of environmental and sustainability education at all levels in all education institutions This volume examines the policy practice conundrum It looks at how national and international policy reforms reach practitioners in this case teacher educators Furthermore it unravels how teacher educators understand environmental education the ways in which they negotiate its demands on their busy schedules what helps them in determining relevant issues within this and finally how they implement these policies in their everyday practices It is evident from this book that while there have been some really well meaning development of policies their impact on teacher educators practice and therefore student teachers learning about Environmental Education is limited The study showed that while these teacher educators had a clear understanding of the environment and saw the need importance of incorporating Environmental Education in their daily practices they had very little scope to do so There were numerous factors that constrained implementation The book provides inputs on global policy practice gaps It offers valuable insights to a global audience grappling with understanding the ways in which environmental education policies are put into practice in emerging economies like India The final argument is thesis that while policy reforms are a step in the right direction they need to be backed up with strong implementation systems in order to be successful
