Texas City Disaster, 1947 Hugh W. Stephens, 2010-01-01 On April 16 1947 a small fire broke out among bags of ammonium nitrate fertilizer in the hold of the ship Grandcamp as it lay docked at Texas City Texas Despite immediate attempts to extinguish the fire it rapidly intensified until the Grandcamp exploded in a blast that caused massive loss of life and property In the ensuing chaos no one gave much thought to the ship in the next slip the High Flyer It exploded sixteen hours later The story of the Texas City explosions America's worst industrial disaster in terms of casualties has never been fully told until now In this book Hugh W Stephens draws on official reports newspaper and magazine articles personal letters and interviews with several dozen survivors to provide the first full account of the disaster at Texas City Stephens describes the two explosions and the heroic efforts of Southeast Texans to rescue survivors and cope with extensive property damage At the same time he explores why the disaster occurred showing how a chain of indifference and negligence made a serious industrial accident almost inevitable while a lack of emergency planning allowed it to escalate into a major catastrophe This gripping cautionary tale holds important lessons for a wide reading public *Vapor Cloud Explosions* Dirk Roosendans, Pol Hoorelbeke, Marc Van Overmeire, 2024-12-30 The oil and gas industry operates installations and processes with important

quantities of flammable substances within a wide range of pressures and temperatures A particular hazard for this type of installations is an accidental release of a large quantity of flammable material resulting in the formation of a flammable cloud within the installation Upon ignition such a cloud may lead to an explosion producing shockwaves with enough energy to cause substantial damage to people and assets Such accidents are commonly named Vapor Cloud Explosions This book gives insight in the phenomena involved in Vapor Cloud Explosions and proposes strategies for their prevention and mitigation

Interior, Environment, and Related Agencies Appropriations for 2008 United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies, 2007 Long-range Futures Research

Robert H. Samet, 2009-03-24 This highly readable study explains how complexity science provides an evolutionary model for the civil system with a new world view that out ranges United Nations reference scenarios to beyond 2150 *Winning with Risk Management* Russell Walker, 2013 This book develops the notion that companies can succeed on the basis of risk management much as companies compete on efficiency costs labor location and other dimensions The reality of risk and how it impacts companies is that it is much more definite often catastrophic and looks more like a shock This is striking as a difference between firms on risk different than a marginal difference in operating efficiencies for example Competing on Risk Management requires a discipline a commitment to using information and recognizing shocks and then acting upon those to redistribute assets This book will examine how leading firms that compete on risk have done this and showcase best practices and impacts to the capital structure of firms and their organizational formation **The Rotarian**, 1948-03

Established in 1911 The Rotarian is the official magazine of Rotary International and is circulated worldwide Each issue contains feature articles columns and departments about or of interest to Rotarians Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Gandhi to Kurt Vonnegut Jr have written for the magazine Congressional Record

United States. Storage D. J. Evans, R. A. Chadwick, 2009 The UK became a net importer of natural gas in 2004 and by 2020 will import up to 90% of its requirements leaving it vulnerable to increasing energy bills and risk of disruption to supply New pipelines to Europe and improvements to interconnectors will meet some demand but Government recognises the need for increased gas storage capacity best met by the construction of underground storage facilities Energy security has also raised the likelihood of a new generation of coal fired power stations which to be environmentally viable will require clean coal technologies with near zero greenhouse gas emissions A key element of this strategy will be underground CO₂ storage This volume reviews the technologies and issues involved in the underground storage of natural gas and CO₂ with examples from the UK and

overseas The potential for underground storage of other gases such as hydrogen or compressed air linked to renewable sources is also reviewed

The Rich Get Richer and the Poor Get Prison Jeffrey Reiman,Paul

Leighton, 2020-06-29 For 40 years this classic text has taken the issue of economic inequality seriously and asked Why are our prisons filled with the poor Why aren't the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well off people who cause widespread harm This new edition continues to engage readers in important exercises of critical thinking Why has the U S relied so heavily on tough crime policies despite evidence of their limited effectiveness and how much of the decline in crime rates can be attributed to them Why does the U S have such a high crime rate compared to other developed nations and what could we do about it Are the morally blameworthy harms of the rich and poor equally translated into criminal laws that protect the public from harms on the streets and harms from the suites How much class bias is present in the criminal justice system both when the rich and poor engage in the same act and when the rich use their leadership of corporations to perpetrate mass victimization The Rich Get Richer shows readers that much of what goes on in the criminal justice system violates citizens sense of basic fairness It presents extensive evidence from mainstream data that the criminal justice system does not function in the way it says it does nor in the way that readers believe it should The authors develop a theoretical perspective from which readers might understand these failures and evaluate them morally and they do it in a short text written in plain language Readers who are not convinced about the larger theoretical perspective will still have engaged in extensive critical thinking to identify their own taken for granted assumptions about crime and criminal justice as well as uncover the effects of power on social practices This engagement helps readers develop their own worldview New to this edition Presents recent data comparing the harms due to criminal activity with the harms of dangerous but not criminal corporate actions Updates statistics on crime victimization incarceration wealth and discrimination Increased material for thinking critically about criminal justice and criminology Increased discussion of the criminality of middle and upper class youth Increased coverage of role of criminal justice fines and fees in generating revenue for government and how algorithms reproduce class bias while seeming objective Streamlined and condensed prose for greater clarity
