Japanese Firms in Europe Frédérique Sachwald, 2014-03-18 In this study the contributors examine the evolution of Japanese direct investment in Europe and explore its determinants They illustrate how as multinationals Japanese firms adapt to local conditions and try to take advantage of a global organisation In this respect three areas in particular are explored human resource management relationships with suppliers and R D unit locations

Routledge Revivals: The World Electronics Industry (1990) Daniel Todd, 2018-02-05 First published in 1990 this book provides an overview of the global distribution of the electronics industry and the structural factors which promoted this distribution by the end of the 1980s Regarded as a flagship sector in both advanced and developing countries the electronics industry is encouraged by governments everywhere Covering both the civilian and the military sides of the industry Professor Todd reflects on the future of civilian electronics in the light of its global segmentation and hints at the fundamental role of governments in the unfolding of both civilian and defence electronics developments He also endorses the overwhelming significance of strategies being played by electronics enterprises in both the USA and Japan

*Assembled in Japan* Simon Partner, 2023-04-28 *Assembled in Japan* investigates one of the great success stories of the twentieth century the rise of the Japanese electronics industry Contrary to mainstream interpretation Simon Partner discovers that behind the meteoric rise of Sony Matsushita Toshiba and other electrical goods companies was neither the iron hand of Japan s Ministry of International Trade and Industry nor a government sponsored export led growth policy but rather an explosion of domestic consumer demand that began in the 1950s This powerful consumer boom differed fundamentally from the one under way at the same time in the United States in that it began from widespread poverty and comparatively miserable living conditions Beginning with a discussion of the prewar origins of the consumer engine that was to take off under the American Occupation Partner quickly turns his sights on the business leaders inventors laborers and ordinary citizens who participated in the broadly successful effort to create new markets for expensive unfamiliar new products Throughout the author relates these pressure cooker years in Japan to the key themes of twentieth

century experience worldwide the role of technology in promoting social change the rise of mass consumer societies and the construction of gender in advanced industrial economies This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2000 Assembled in Japan investigates one of the great success stories of the twentieth century the rise of the Japanese electronics industry Contrary to mainstream interpretation Simon Partner discovers that behind the meteoric rise of Sony Matsushi Biotechnology in Japan Malcolm V. Brock,2024-11-01 In the early 1980s biotechnology caused worldwide excitement as a high technology with almost unlimited potential in science medicine and industry It not only allowed the manufacture of traditional products more quickly and inexpensively but also offered the possibility of synthesizing valuable materials anew All this made it very attractive to Japanese policymakers who targeted it as a high priority area for economic growth Originally published in 1989 Biotechnology in Japan is the first published in English to analyse the Japanese effort to promote the new biotechnology industries The author examines the strategies used for developing biotechnology in Japan and looks at the active role of government in a field in which the Japanese rapidly became the world leaders Focusing on the making and implementation of biotechnology policy he considers the relationship between the public and the private sector and makes use of different political constructs to analyse Japan s complex and unique balance between competitive market forces and collective interest

**The Japan-US Trade Friction Dilemma** Karen M Holgerson,2019-05-23 First published in 1998 this study of Japan U S trade friction and the role perceptual differences have played in its evolution differs from its predecessors in key ways First it is interdisciplinary drawing on the research of anthropologists area specialists intercultural communication specialists linguists sociologists and social psychologists as well as that of political scientists and economists Second it both identifies and quantifies perceptual differences between Japanese and American opinion leaders regarding the large bilateral trade imbalances the bilateral relationship and national negotiating styles Third original data were collected from completed questionnaires sent to 230 American and 230 Japanese opinion leaders from business government academia and the media who had been involved in some way with the rice automotive or semiconductor sectors Fourth the three case studies of trade friction are representative of three differing mixes of trade friction are representative of three differing mixes of trade friction causal factors and perceptual dynamics Finally based on the findings of this study modest suggestions are offered on how the bilateral perceptual gap might be narrowed and trade friction diminished so that the structural and sectoral problems might more effectively be addressed This book should be of interest to scholars government officials and business leaders in Japan the United States and other countries in the global community who are interested in bilateral relations international economic and political affairs and trade friction It should also be of special interest to social psychologists and

cross cultural scholars and researchers     Inventing the Electronic Century Alfred Dupont CHANDLER, Takashi Hikino, Andrew Von Nordenflycht, Alfred D Chandler, 2009-06-30 Consumer electronics and computers redefined life and work in the twentieth century In *Inventing the Electronic Century* Pulitzer Prize winning business historian Alfred D Chandler Jr traces their origins and worldwide development From electronics prime mover RCA in the 1920s to Sony and Matsushita s dramatic rise in the 1970s from IBM s dominance in computer technology in the 1950s to Microsoft s stunning example of the creation of competitive advantage this masterful analysis is essential reading for every manager and student of technology

The Technological Transformation of Japan Tessa Morris-Suzuki, 1994-11-25 This landmark book is the first general English language history of technology in modern Japan     **The Digital Flood** James W. Cortada, 2012-09-27 The history of how computers spread to over 20 nations globally in less than six decades exploring economic political social and technological reasons and consequences It is based on extensive research into primary and secondary sources and concludes with a discussion of implications for key players in the globalized economy     *Competitive-cum-Cooperative Interfirm Relations and Dynamics in the Japanese Semiconductor Industry* Yoshitaka Okada, 2012-12-06 Japanese semiconductor firms are well known for obtaining dynamics in a short period of time and achieving even global leadership A significant portion of their success are attributable to cooperative interfirm relations and the development of intermediate organizational structure based on long term relationship between firms The purpose of this book is to explain how interfirm relations contributed to their dynamics during the golden age of the semiconductor industry Meanwhile this book clarifies the real source of dynamics in interfirm relations and how the firms have interacted The author concludes that the competitive cum cooperative CCC interfirm interaction are observed Quantitative and qualitative findings show that firms enjoy not only flexible cooperation based synergy effects but also dynamics market like effects by creating competition among partners through CCC interaction     *Japanoise* David Novak, 2013-07-17 Noise an underground music made through an amalgam of feedback distortion and electronic effects first emerged as a genre in the 1980s circulating on cassette tapes traded between fans in Japan Europe and North America With its cultivated obscurity ear shattering sound and over the top performances Noise has captured the imagination of a small but passionate transnational audience For its scattered listeners Noise always seems to be new and to come from somewhere else In North America it was called Japanoise But does Noise really belong to Japan Is it even music at all And why has Noise become such a compelling metaphor for the complexities of globalization and participatory media at the turn of the millennium In *Japanoise* David Novak draws on more than a decade of research in Japan and the United States to trace the cultural feedback that generates and sustains Noise He provides a rich ethnographic account of live performances the circulation of recordings and the lives and creative practices of musicians and listeners He explores the technologies of Noise and the productive distortions of its networks Capturing the textures of feedback its sonic and cultural layers and vibrations Novak describes musical circulation through sound and listening recording and

**The Making of Northeast Asia** Kent Calder, Min Ye, 2010-08-16 Northeast Asia where the interests of three major nuclear powers and the world's two largest economies converge around the unstable pivot of the Korean peninsula is a region rife with political economic paradox. It ranks today among the most dangerous areas on earth plagued by security problems of global importance including nuclear and missile proliferation. Yet despite its insecurity the region has continued to be the most rapidly growing on earth for over five decades and it is emerging as an identifiable economic political and strategic region in its own right. As the locus of both economic growth and political military uncertainty in Asia has moved further to the Northeast a need has developed for a book that focuses analytically on prospects for Northeast Asian cooperation within the context of both Asia and the Asia Pacific regional relationship. This book does exactly that while also offering a more general theory for Asian institution building.

**The Logic of International Restructuring** Winfried Ruigrok, Rob van Tulder, 2013-11-05 There is within the corporate world an evolving international restructuring race between industrial complexes that is set to intensify over the coming years. An industrial complex consists of suppliers distributors governments financiers and trade unions. It is the reorganisation of the relationship between the core firm and the above components that is set to change before very long. In this book Winfried Ruigrok and Rob van Tulder address many current debates on topics such as Post Fordism globalisation and lean production. They also identify a number of rival internationalisation strategies that have been adopted by different companies. Moreover they present an abundance of new as well as historical data on the world's one hundred largest core companies. This data shows that none of the largest core firms is truly global or borderless and that virtually all of them in their history have benefited decisively from Governmental trade or industrial policies. The authors offer a highly interdisciplinary effort to link three previously isolated debates on industrial restructuring globalisation and international trade policies. *The Logic of International Restructuring* is aimed at a wide academic post graduate and professional audience working in the areas of business economics organisational studies and international relations.

*Japan and the Internet Revolution* K. Coates, C. Holroyd, 2003-09-02 Japan and the Internet Revolution challenges the portrait of Japan as a technologically slow moving nation lacking in creativity and entrepreneurial spirit. Overcoming the substantial barriers erected by the Japanese government to the introduction of the Internet promoters and entrepreneurs managed to create a flexible and dynamic Internet society. From a slow start Japan has emerged as the global leader in the mobile internet the host of arguably the strongest nation specific web presence in the world and a country determined to remain near the forefront of the digital revolution.
