Brouwer Collected Works Hans Freudenthal, 2014-05-12 L E J Brouwer Collected Works Volume 2 Geometry Analysis Topology and Mechanics focuses on the contributions and principles of Brouwer on geometry topology analysis and mechanics including non Euclidean spaces integrals and surfaces The publication first ponders on non Euclidean spaces and integral theorems lie groups and plane transition theorem Discussions focus on remarks on multiple integrals force field of the non Euclidean spaces with negative curvature difference quotients and differential quotients characterization of the Euclidean and non Euclidean motion groups and continuous one one transformations of surfaces in themselves The book also takes a look at vector fields on surfaces and new methods in topology including continuous vector distributions on surfaces and orthogonal trajectories of the orbits of a one parameter plane projective group The book then ponders on mechanics and topology of surfaces as well as the motion of a particle on the bottom of a rotating vessel under the influence of gravitational force The publication is a valuable reference for researchers interested in geometry topology analysis and mechanics

Tensor and Vector Analysis A.T. Fomenko, V.V. Trofimov, O V Manturov, 1998-11-26 Reflecting the significant contributions of Russian mathematicians to the field this book contains a selection of papers on tensor and vector analysis It is divided into three parts covering Hamiltonian systems Riemannian geometry and calculus of variations and topology The range of applications of these topics is very broad as many modern geometrical problems recur across a wide range of fields including mechanics and physics as well as mathematics Many of the approaches to problems presented in this volume will be novel to the Western reader although questions are of global interest The main achievements of the Russian school are placed in the context of the development of each individual subject
