Peter Cappelli, 2015-06-09 The decision of whether to go to college or where is hampered by poor information and inadequate understanding of the financial risk involved Adding to the confusion the same degree can cost dramatically different amounts for different people A barrage of advertising offers new degrees designed to lead to specific jobs but we see no information on whether graduates ever get those jobs Mix in a frenzied applications process and pressure from politicians for relevant programs and there is an urgent need to separate myth from reality Peter Cappelli an acclaimed expert in employment trends the workforce and education provides hard evidence that counters conventional

wisdom and helps us make cost effective choices Among the issues Cappelli analyzes are What is the real link between a college degree and a job that enables you to pay off the cost of college especially in a market that is in constant change Why it may be a mistake to pursue degrees that will land you the hottest jobs because what is hot today is unlikely to be so by the time you graduate Why the most expensive colleges may actually be the cheapest because of their ability to graduate students on time How parents and students can find out what different colleges actually deliver to students and whether it is something that employers really want College is the biggest expense for many families larger even than the cost of the family home and one that can bankrupt students and their parents if it works out poorly Peter Cappelli offers vital insight for parents and students to make decisions that both make sense financially and provide the foundation that will help students make their way in the world

Summary of Peter Cappelli's Will College Pay Off? Everest Media,2022-02-25T10:38:00Z Please note This is a companion version not the original book Sample Book Insights 1 The American college system is extremely expensive and while it is still considered necessary for advancement it has become far more risky in terms of the likely career payoffs 2 Despite the media s obsession with the supposed skills shortage employers actually seem relatively uninterested in academic skills They want the skills that come from experience on the job 3 The decision to go to college is one of the biggest financial decisions a family will make For most families the question is not whether to go to college versus not go to college but which college to attend and for that decision the potential payoff from the degree matters even more 4 The prevailing wisdom that students should be pursuing practical job oriented majors like animation property management and invasive cardiovascular technology may well be the wrong advice These narrow vocational degrees may not lead to career progression later on

The Complete Guide to Paying for College Leah Ingram, 2017-09-18 College costs are straining every family except the richest. Most financial aid goes to the neediest families. The middle class typically doesn't qualify for need-based financial aid, even though most can't afford to pay cash for college, and their salaries haven't allowed them to save enough to cover all costs. If these families are trying to put more than one child through college, the challenges are exponential. If you've been asking how your child can receive a quality education even though you can't pay today's college tuition out of pocket, *The Complete Guide to Paying for College* is the answer. This step-by-step guide includes actionable tips to save on education costs and the many living expenses: room, board, books, activities that apply to the first year and beyond. Leah Ingram, a money-saving expert and parent of two college students, reveals the insider tricks to pay for college, including how to find bona fide scholarships, not spam and scams. Where parents can work to receive tuition benefits. The pros and cons of earning college credits before graduating high school. Which schools give out the most merit aid, even if you're not a rocket scientist. Paying for college just got a lot easier for millions of families.
