[Epic Performances from the Middle Ages into the Twenty-First Century](#) Fiona Macintosh,Justine McConnell,Stephen Harrison,Claire Kenward,2018-11-01 Greek and Roman epic poetry has always provided creative artists in the modern world with a rich storehouse of themes Tim Supple and Simon Reade s 1999 stage adaptation of Ted Hughes *Tales from Ovid* for the RSC heralded a new lease of life for receptions of the genre and it now routinely provides raw material for the performance repertoire of both major cultural institutions and emergent experimental theatre companies This volume represents the first systematic attempt to chart the afterlife of epic in modern performance traditions with chapters covering not only a significant chronological span but also ranging widely across both place and genre analysing lyric film dance and opera from Europe to Asia and the Americas What emerges most clearly is how anxieties about the ability to write epic in the early modern world together with the ancient precedent of Greek tragedy s reworking of epic material explain its migration to the theatre This move though was not without problems as epic encountered the barriers imposed by neo classicists who sought to restrict serious theatre to a narrowly defined reality that precluded its broad sweeps across time and place In many instances in recent years the fact that the Homeric epics were composed orally has rendered reinvention not only legitimate but also deeply appropriate

opening up a range of forms and traditions within which epic themes and structures may be explored Drawing on the expertise of specialists from the fields of classical studies English and comparative literature modern languages music dance and theatre and performance studies as well as from practitioners within the creative industries the volume is able to offer an unprecedented modern and dynamic study of epic content and form across myriad diverse performance arenas **The**

**Golden Bough: pt. IV. Adonis, Attis, Osiris. 1922** Sir James George Frazer,1919 Virgil's Aeneid Michael Paschalis,1997 The capacity of proper names to condense concepts descriptions or short narratives can tell us a lot about the Aeneid But names only suggest or evoke meaning which can be elicited and or understood properly only by viewing it in a reading of the epic as a whole Virgil's epic reveals recurrent semantic patterns which show that names are substitutable semantic units One way to elicit their meaning is by exploring the semantic environment in which they occur as well as related semantic environments elsewhere in the narrative and by examining the way names combine with semantic units of transparent meaning This study offers a complete semantic analysis of the Aeneid by book based on the discussion of semantic components and semantic sequences and using the Laocoon Horse sequence as a model The analysis reveals a sustained pervasive and deep going exploitation of the meaning of names It yields new interpretations for every episode in the epic and provides the semantic features of most major characters It sheds new light on the significance of Polydorus the death of Anchises at Drepanum the Nisus and Euryalus relationship and Camilla's features in relation to the spearthrow of Metabus It shows the authenticity of the Helen episode as well as the significance of the catalogue of the of sinners in Tartarus and of the deaths of Pallas and Turnus **The Video Source Book** David J.
