Kirschner,Rob L. Martens,2006-04-11 A Dutch policy scientist once said the information and knowledge in the twenty first century has the shelf life of fresh fish and learning in this age often means learning where and how to find something and how to relate it to a specific situation instead of knowing everything one needs to know On top of this the world has become so highly interconnected that we have come to realise that every decision that we make can have repercussions somewhere else To touch as many bases as possible we need to work with knowledgeable others from different fields multiple agents and take heed of their points of view multiple representations To do this we make increasing use of computers and computer mediated communication If computer supported collaborative learning CSCL is not simply a newly discovered hype in education what is it and why are we writing a book about it Dissecting the phrase into its constituent parts we see that first of all CSCL is about learning and in the twenty first century this usually means constructivist learning The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 1 ISLS,2014-04-23 The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings Volume 1 Computer Support for Collaborative

Martens, 2004-03-31 This book is the first that presents an overview of the main topics involved in the study and implementation of Computer Supported Collaborative Learning CSCL from a learning viewpoint It is also one of the few or the only one that does this from a research and practical instructional design

perspective Too many books begin with the medium and or the environments used for CSCL as if you would write a book on building a house by focusing almost primarily on hammers saws and screwdrivers The main topics are clustered in four sections that are derived from reverse ordering the CSCL acronym because CSCL is all about learning through collaboration that is supported by computers Although CSCL is increasingly advocated in higher education specific CSCL implementations i e something more than providing technology without a well developed educational rationale are uncommon in higher education The topics covered in this book each including a review and several examples of current best practices in higher education can stimulate informed implementation of CSCL in higher education
