Child Protection in Development Michael Bourdillon, William Myers, 2014-06-11 Every day millions of children in developing countries face adversities of many kinds, yet there is a shortage of sound evidence concerning their plight and an urgent need to identify the most appropriate and effective policy responses from among the multiple approaches that exist. This collection of journal papers aims to engage with researchers and debates in the field so as to understand better some of the numerous risks confronted by children in developing countries. It highlights the complexity of protecting children in various forms of adversity, challenges conventional wisdom about what protects children, demonstrates why it is essential to consult with children to protect them successfully, and suggests that successful protection must be based on strong empirical understanding of the situation and the perspectives of children and communities involved. The contributors are all experienced researchers and practitioners who have worked for many years with children in developing countries. The book offers suggestions for reform of current child protection policies based on empirical findings around a range of child protection concerns, including children's work, independent migration, family separation, early marriage, and military occupation. Together, the contributions provide a body of knowledge important to humanitarian and development policy and practice. This book was published as a special issue of *Development in Practice*.

Brian Howe, J.C. Blokhuis, 2018-08-30

More than a quarter of a century has passed since Canada promised to recognize and respect the rights of children under the United Nations Convention on the Rights of the Child Ratification of the Convention cannot however guarantee that everyone will abandon proprietary notions about children or that all children will be free to enjoy the substance of their rights in every social and institutional context in which they find themselves including and perhaps especially within families This disconnect remains one of the most important challenges to the recognition of children's rights in Canada The authors argue that social toxins are as harmful to children's independent welfare and developmental interests as environmental toxins and that both must be eradicated if Canada is to fulfill its commitments under the Convention They also argue that if Canada wishes to ensure the substance of the rights outlined in the Convention are socially guaranteed an attitudinal or cultural shift is required concerning the moral and legal status of children This revised expanded and updated

edition of the bestselling *Challenge of Children's Rights for Canada* will be of interest to academics policymakers parents teachers social workers and human service professionals indeed to anyone who cares about and for children
