as well. Alas, with the outbreak of Covid 19, remote online notarization has finally become mainstream. This new advent should have opened the door for unlimited income possibilities for notaries, but it didn't. Big box SAAS companies emerged seeking to dominate the industry with business models that really only benefit them, usually not the notaries using the platforms. What's more, many of the platforms available are clunky and awkward. While there are too many to mention following this formula, it begs the question: Can the everyday remote online notary still make untold fortunes right from home by leveraging the internet and serving clientele all across the country? You may be surprised to hear this, but the answer is definitely yes. As of this writing, remote online notarization is now available in 40 States, and Counting RON isn't going anywhere, but it will take some effort, knowledge, and execution of a few sound principles to be able to make the most of this new opportunity for notary publics. In this book, we will go through the getting started process. We will discuss any equipment you may need, like PC and internet speeds needed. We will show you how to deal with some of the common nuisances as they related to RON platforms and online notarization in general. We will divulge our favorite, least favorite platforms that we use. We will tell you about vendors actively looking to utilize remote online notaries. Perhaps most importantly, we will show you the simple yet effective strategies we've used to consistently get regular, repeat clientele. With the right moves and set up, you can make more money in a couple of hours than most people do in an 8-hour work day, leveraging your digital pen and seal.
