Association for the Gifted and Talented 2017 Legacy Book Award Winner Parenting **Ways to Talk So Your Children Will Listen and Listen to Them as They Talk** J.D. Rockefeller, 2015-11-24 The relationship between a child and parent is without a doubt a very private and personal matter The idea of giving parents instructions on how to talk with their kids never sits right However parents should understand that the more they talk about things the more comfortable it will be for them Why not talk with kids in order to make them listen to you and why not listen to kids to make them talk The way parents talk to their kids has a huge impact on their ability to learn and listen Parents need to understand that they are constant examples to their kids on how to behave and act and talking to them fits perfectly in this matter Normally there are 3 different ways parents communicate with their kids and the first one is the aggressive way This usually involves yelling and putting their kids down by using attacking words This can make children to respond in several ways mainly through acting out ignoring the parent's order yelling back or feeling very fearful The second communication form is commonly seen in passive form Parent who fall under this category mutter softly use very cautious tones and words and even will just walk over their children when they find them fighting Unfortunately when the time comes that they're pushed to their limits they will suddenly burst and eventually turn into an aggressive communication tone The last and the third way that parents use to communicate with their children is the assertive way So far this is the most perfect way to communicate with kids at all time and levels Assertive communication is firm confident warm positive clear and consistent Assertive communication with kids is a skill and it shows to kids that dad and mom know what they are about to say and will make them eventually listen It's also very important for parents to understand that the importance of making their children listen to them is as equal as listening to them In this book parents will learn how to communicate with their kids in the most effective ways in order to make them listen and communicate effectively Also included in this book are the ways to help children deal with their feelings engage in cooperation effective and best alternatives to punishments how to encourage autonomy in children how to praise them and

many other things that will make the parent and child relationship even better and closer A parent should understand what is written in this book for a much better parenting experience *Smart Parenting for Smart Kids* Eileen Kennedy-Moore, Mark S. Bill Hendricks, Bev Hendricks Godby, 2021-09-07 Parents don't determine who their kids become They steward them into who they're meant to be One of the most common myths in parenting books you see it everywhere is that parents are responsible for who their children turn out to be Proper input yields proper output or so the thinking goes But that mindset works with machinery not people The truth is your child has a unique set of traits their giftedness that only they possess The parent's job isn't to crank out a product but to point an individual human being toward a healthy flourishing life In *So How Do I Parent THIS Child* brother and sister duo Bill Hendricks and Bev Hendricks Godby team up to help you understand the difference between producing a product and parenting a person They take you through all the stages of child rearing from diapers to driver's licenses to diplomas to give you a comprehensive look at how identifying giftedness and helping your children discover it for themselves makes all the difference As a parent you've got a lot of challenges ahead But with intentionality and an individualized approach you'll see your kids grow up to become the mature and confident adults that they're intended to be In the Best Interests of Children and Youth Hans Grietens, 2005 This book deals with the implementation and application of the in the best interests of the child principle in research and practice With contributions by authors from nine different countries United States Belgium France Norway The Netherlands United Kingdom Israel Ireland Canada an international perspective is adopted After the outline of the theme given in the introductory chapter the first part illustrates the search for theory driven and empirically based models to deal with the complexity of parenting In the second part illustrations about the implementation and application of the best interests principle in child and youth care practice are given Part three is focusing on the organization of child and youth care systems according to the best interests principle How the Gifted Brain Learns David A.
