Biographical Dictionary of Modern American Educators Shirley Ohles, Frederik Ohles, John Ramsay, 1997-10-28 Widely praised Greenwood's Biographical Dictionary of American Educators Greenwood 1978 quickly became a standard reference work for students and scholars of American education This new volume includes biographical sketches of more than 400 notable researchers leaders reformers critics and practitioners from all major fields of education and extends the coverage of its predecessor to the mid 20th

century Its topical range encompasses such diverse areas as psychology music health measurement and evaluation science special education history and administration It treats education at all levels including early childhood elementary and secondary higher and adult Most of the educators profiled were active in the 20th century but several dozen have been included from the 19th century A special effort has been made to include women and educators of color whose contributions have often been overlooked in the past Each biographical sketch includes information on family background a description of the educator s accomplishments and a digest of the person s education and career professional and civic service major publications and principal honors Each profile ends with a list of references and the volume closes with appendices listing birth places states of major service fields of work a chronological listing of educators and a list of important dates in American education A comprehensive index concludes the volume Educators are included from all fifty states and were selected from numerous suggested candidates for inclusion Most of the educators profiled were active in the 20th century but several dozen have been included from the 19th century A special effort has been made to include women and educators of color whose contributions have often been overlooked in the past [Our Schools and Education: the War Zone in America](#) James R. Lake,2009-08-27 In the ongoing saga of bureaucratic control misuse of money and personnel lies and failures not of the children but of the leaders educators and businesses that control education author James Lake firmly presents the truth versus the ideology in this comprehensive book Throughout Our Schools and Education The War Zone in America he includes the problems bureaucrats create and what we can do to reclaim our schools He shows workable and realistic solutions to help answer the pressing problems facing our children He invites everyone teachers parents and the young and old to be part of the positive effort instead of adding to the existing dilemma buy doing nothing allowing the bureaucrats to continue to control massive amounts of money meant to help our youth This book is an eye opener and should be read by every American that believes in the educational traditions that have made our nation great With the help of teachers parents and communities we can set aside the educational socialism forced upon us by Washington D C and reverse our present direction returning education to our communities We must maintain the America that our parents knew and created and not succumb to being a one world government We will teach our youth to love America and to cherish our history and what America has stood for The key to this is our support for what is right for our children and our nation Our schools must teach the three Rs but also history science the arts technology vocational classes and give our youth a very broad and realistic education We must not teach to a test nor national standards This book exposes the problems and gives answers to the needed solutions that every parent and teacher should be aware and active in their implementation Our Schools and Education The War Zone in America identifies the problems and presents the solutions to these issues so that educational socialism will be done away with and our communities will once again control and direct our schools reestablishing and maintaining the greatness that has been our nations May God bless America **Understanding Neoliberal Rule in K-12 Schools** Mark Abendroth,Brad

J. Porfilio, 2015-06-01 The word fundamentalism usually conjures up images of religions and their most zealous followers. Much less often the word appears in connection with political economy. The phrase free market gives the connotation that capitalism is freedom. Neoliberalism is the rise of global free market fundamentalism. It reaches into nearly every aspect of our daily lives as it seeks to dominate and eliminate the last vestiges of public domains through wanton privatization and deregulation. It degrades all that is public. The good news is that a global community of resistance continues to struggle against neoliberal oppression. Formal and informal education entities contribute to these struggles offering visions and strategies for creating a better future. The purpose of this volume is twofold. Several contributors will highlight how the neoliberal agenda is impacting educational policy formation, teaching and learning, and relationships between K-12 schools and communities. Other contributors will highlight how the global community has gradually become conscious of the ideological doctrine and how it is responsible for human suffering and misery. The volume is needed because the growing body of educational research linked to exploring the impact of neoliberalism on schools and society fails to provide conceptual or historical understanding of this ideology. It is also an important scholarly intervention because it provides insights as to why educators, scholars, and other global citizens have challenged the intrusion of market forces over life inside K-12 schools. Teacher educators, schoolteachers, and anyone who yearns to understand what is behind the debilitating trend of commercial forces subverting humanizing educational projects would benefit from this volume. Activists, educators, youth, and scholars who seek strategies and visions for building democratic schools and a society would consider this volume essential reading.

**Bad Students, Not Bad Schools** Robert Weissberg, 2019-01-22 Americans are increasingly alarmed over our nation's educational deficiencies. Though anxieties about schooling are unending, especially with public institutions, these problems are more complex than institutional failure. Expenditures for education have exploded and far exceed inflation and the rising costs of health care, but academic achievement remains flat. Many students are unable to graduate from high school, let alone obtain a college degree. And if they do make it to college, they are often forced into remedial courses. Why, despite this fiscal extravagance, are educational disappointments so widespread? In *Bad Students, Not Bad Schools*, Robert Weissberg argues that the answer is something everybody knows to be true but is afraid to say in public: America's educational woes too often reflect the demographic mix of students. Schools today are filled with millions of youngsters, too many of whom struggle with the English language or simply have mediocre intellectual ability. Their lackluster performances are probably impervious to the current reform prescriptions regardless of the remedy's ideological derivation. Making matters worse, retention of students in school is embraced as a philosophy even if it impedes the learning of other students. Weissberg argues that most of America's educational woes would vanish if indifferent troublesome students were permitted to leave when they had absorbed as much as they could learn; they would quickly be replaced by learning-hungry students, including many new immigrants from other countries. American education survives since we import highly intelligent, technically skillful foreigners.

just as we import oil but this may not last forever When educational establishments get serious about world class mathematics and science and permit serious students to learn problems will dissolve Rewarding the smartest not spending fortunes in a futile quest to uplift the bottom should become official policy This book is a bracing reminder of the risks of political manipulation of education and argues that the measure of policy should be academic achievement     *Missionary Exercise (no.3) for the Use of Sunday-schools and Mission Bands and Christian Endeavor Societies* Woman's Foreign Missionary Society of the Presbyterian Church (Presbyterian Church in the U.S.A.),1893
