Human Computer Interaction and Emerging Technologies Fernando Loizides, Marco

Winckler, Usashi Chatterjee, Jose Abdelnour-Nocera, Antigoni Parmaxi, 2020-05-07 The INTERACT Conferences are an important platform for researchers and practitioners in the field of human computer interaction HCI to showcase their work. They are organised biennially by the International Federation for Information Processing Technical Committee on Human Computer Interaction IFIP TC13 a committee of 30 member national societies and 9 Working Groups. The 17th IFIP TC13 International Conference on Human Computer Interaction INTERACT 2019 took place during 2-6 September 2019 in Paphos, Cyprus. The conference was held at the Coral Beach Hotel Resort and was co-sponsored by the Cyprus University of Technology and Tallinn University in cooperation with ACM and ACM SIGCHI. With an emphasis on inclusiveness, these conferences work to lower the barriers that prevent people in developing countries from participating in conferences. As a multidisciplinary field, HCI requires interaction and discussion among diverse people with different interests and backgrounds. This volume contains the Adjunct Proceedings to the 17th INTERACT Conference and comprises a series of papers from the workshops. It follows the INTERACT Conference tradition of the publication of adjunct proceedings by a University Press which has a connection to the conference itself. This tradition has been established to enhance the outreach and reputation of the University Press chosen. For INTERACT 2019, both the Conference Program Chair, Dr Fernando Loizides, and the Adjunct Proceedings Chair of the conference, Dr Usashi Chatterjee, work at Cardiff University, which is the home of Cardiff University Press.

Human-computer Interaction, INTERACT '03 Matthias Rauterberg, Marino Menozzi, Janet Wesson, 2003. This work brings together papers written by researchers and practitioners actively working in the field of human computer interaction. It should be of use to students who study information technology and computer sciences and to professional designers who are interested in User Interface design.

The Knowledge Medium Gary A. Berg, 2003-01-01. This timely new publication examines the notion of computer as medium and what such an idea might mean for education. *The Knowledge Medium: Designing Effective Computer Based Educational Learning Environments* suggests that the understanding of computers as a medium may be a key to re-envisioning educational technology. Because the subject is interdisciplinary, combining science with the humanities, the theoretical discussion draws from a broad range of disciplines: psychology, educational theory, film criticism, and computer science.

Ambient Intelligence for Scientific Discovery Yang Cai, 2005-02-16. Many difficult scientific discovery tasks can only be solved in interactive ways by combining intelligent computing techniques with intuitive and adaptive user interfaces. It is inevitable to use human intelligence in scientific discovery systems: human eyes can capture complex patterns and relationships along with detecting the exceptional cases in a data set; the human brain can easily manipulate perceptions to make decisions. Ambient intelligence is about this kind of ubiquitous and autonomous human interaction with information. Scientific discovery is a process of creative perception and communication dealing with questions like: how do we significantly reduce information while maintaining meaning, or how do we extract patterns from massive data and growing data resources. Originating from the SIGCHI Workshop on Ambient
