Foundations Of Learning And Memory:

Foundations of Learning and Memory Roger M. Tarpy, Richard E. Mayer, 1978 **Fundamentals of Learning and Memory** John P. Houston, 1991 **Foundations of Human Memory** Michael Jacob Kahana, 2014-05-01

Foundations of Human Memory provides an introduction to the scientific study of human memory with an emphasis on both the major theories of memory and the laboratory studies that have been used to test those theories and inspire their further development. Written with the undergraduate student in mind, the text assumes no specific background in the subject but a general familiarity with scientific method and quantitative approaches to the treatment of data. Foundations of human memory is organized around the major empirical paradigms used to study memory in the laboratory and the theories used to explain data obtained using those paradigms. The text begins with a focus on memory for individual items, building up to memory for associations between items and finally to memory for entire sequences of items and the problem of memory search. Several major theories of memory are considered in detail, including strength theory, summed similarity theory, neural network based theories, retrieved context theory, and theories based on the division of memory into separate short-term and long-term storage systems. The text emphasizes basic research over applied problems but brings in real-world examples and neuroscientific evidence as appropriate.

The Foundations of Remembering James S. Nairne, 2011-12-06

The Foundations of Remembering presents a collection of essays written by top memory scholars in honor of Henry L. Roediger III. The chapters were originally delivered as part of the Roddyfest conference held in March 2005 to celebrate Purdue University's awarding of an honorary doctor of letters to Roediger in recognition of his many contributions to the field of psychology. Authors were given a simple charge: choose your own topic but place your work in historical context. Roediger is fascinated by the intellectual lineage of ideas, so addressing historical foundations seemed a fitting tribute. The chapters contained in this volume help to establish the foundations of remembering circa the first decade of the 21st century as perceived by some of the leading memory researchers in the world. Not surprisingly, each of the chapters touches on Roediger's research as well, largely because his work has helped to define and clarify many topics of interest to the memory field. The Foundations of Remembering is intended for a wide audience: students, scholars, and anyone interested in exploring the historical and conceptual roots of modern memory theory.

The Psychological Foundations of Education Olga K. Baatz, Charles Albert Baatz, 1981 **Foundations of Bilingual Memory** Roberto R. Heredia, Jeanette Altarriba, 2013-11-22

Foundations of Bilingual Memory provides a valuable update to the field of bilingual memory and offers a new psychological perspective on how the bilingual mind encodes, stores, and retrieves information. This volume emphasizes theoretical issues such as classic memory approaches: Compound Coordinate Bilingualism, Bilingual Dual Coding Theory, and Working Memory, about which relatively little has been written in the bilingual domain. Also covered are the neuropsychology of bilingual memory. Applied issues such as false memories and bilingualism, emotion and memory. Empirical findings in support of the uniqueness of the

different memory systems of the bilingual individual Connectionist models of bilingualism The volume represents the first book of its kind in stressing a memory perspective with regards to bilingual speakers It can serve as an advanced text for both undergraduate and graduate level students and it will be of great interest to the growing number of bilingual teachers and university classes interested in understanding the bilingual mind as well as in preparing teachers to work with the bilingual individual

Foundations for A Psychology of Education Alan M. Lesgold, Robert Glaser, 2012-11-12 The chapters in this collection illustrate how current concepts and principles from various disciplines can be viewed from the perspective of their value to educational process thinking While not providing specific prescriptions for educational problems the articles provide relevant experimental and theoretical knowledge has accumulated in many fields including learning theory cognitive development motivation and intellectual abilities and attitudes
