Problems of Han Administration Michael Loewe,2016-05-18 Michael Loewe calls on literary and material evidence to examine three problems that arose in administering China s early empires Religious rites due to an emperor s predecessors must both pay the correct services to his ancestors and demonstrate his right to succeed to the throne In practical terms tax collectors merchants farmers and townsmen required the establishment of a standard set of weights and measures that was universally operative and which they could trust Those who saw reason to criticise the decisions taken by the emperor and his immediate advisors whether on grounds of moral principles or political expediency needed opportunities and the means of expressing their views whether as remonstrants to the throne by withdrawal from public life or as authors of private writings

Knechtges, 2024-12-11 The studies brought together here focus upon the literary and cultural activity of the Chinese court during the Han and early medieval period The first section concerns court literature in the Former Han and deals with the role of literature especially poetry at both the imperial and princely courts including one study of the writings attributed to an imperial concubine who used poetry to express her resentment at falling from the emperor's favour The next section looks at a leading court writer of the Late Western Han dynasty Yang Xiong while the third part deals with the leading poetic genre of this period the fu or rhapsody These papers examine major themes such as praise travel dating and authenticity and problems of translation The volume concludes with two articles on food culture in early and medieval China

[The Construction of Space in Early China](#) Mark Edward Lewis, 2012-02-01 This book examines the formation of the Chinese empire through its reorganization and reinterpretation of its basic spatial units the human body the household the city the region and the world The central theme of the book is the way all these forms of ordered space were reshaped by the project of unification and how at the same time that unification was constrained and limited by the necessary survival of the units on which it was based Consequently as Mark Edward Lewis shows each level of spatial organization could achieve order and meaning only within an encompassing superior whole the body within the household the household within the lineage and state the city within the region and the region within the world empire while each level still contained within itself the smaller units from which it was formed The unity that was the empire's highest goal avoided collapse back into the original chaos of nondistinction only by preserving within itself the very divisions on the basis of family or region that it claimed to transcend

The Flood Myths of Early China Mark Edward Lewis, 2012-02-01 Early Chinese ideas about the construction of an ordered human space received narrative form in a set of stories dealing with the rescue of the world and its inhabitants from a universal flood This book demonstrates how early Chinese stories of the re-creation of the world from a watery chaos provided principles underlying such fundamental units as the state lineage the married couple and even the human body These myths also supplied a charter for the major political and social institutions of Warring States 481-221 BC and early imperial 220 BC-AD 220 China In some versions of the tales the flood was triggered by rebellion while other versions linked the taming of the flood with the creation of the institution of a lineage and still others linked the taming to the process in which the divided principles of the masculine and the feminine were joined in the married couple to produce an ordered household While availing themselves of earlier stories and of central religious rituals of the period these myths transformed earlier divinities or animal spirits into rulers or ministers and provided both etiologies and legitimation for the emerging political and social institutions that culminated in the creation of a unitary empire
