**A Chesley Bonestell Space Art Chronology** Melvin H. Schuetz, 1999 Chesley Bonestell has been called the Father of Space Art His photorealistic paintings of the Moon and planets and other worlds beyond have awed us since they were first published over half a century ago Moreover he showed long before Gagarin or Glenn what it would be like for humans to explore the vastness of space As author Howard E McCurdy has written in his book *Space and the American Imagination* No artist had more impact on the emerging popular culture of space in America than Chesley Bonestell Through his visual images he stimulated the interest of a generation of Americans and showed how space travel would be accomplished Considering his great influence on both the public interest in space flight and the actual development of a national space program it is therefore both surprising and unfortunate that heretofore there has not been available a bibliography documenting those places where Bonestell s art appeared in print This book fills that void Written in cooperation with the artist s widow and his estate managers *A Chesley Bonestell Space Art Chronology* contains well over 700 entries and is the definitive reference guide to publications containing Bonestell s space art In praise of it the illustrator Vincent Di Fate says This entertaining and scholarly work is an invaluable and indispensable treasure for the vast legions of Bonestell s fans Thoughtful engrossing and utterly thorough it provides the cosmic ride of a lifetime

*Borders, Legal Spaces and Territories in Contemporary International Law* Tommaso Natoli, Alice Riccardi, 2019-09-12 This book examines the challenges posed to contemporary international law by the shifting role of the border which has recently re emerged as a

central issue in international relations It posits that borders do not merely correspond to States boundaries indeed while remaining a fundamental tool for asserting States power they are in fact a collection of constantly changing spatial limits Consequently the book approaches borders as context specific limits and revisits notions traditionally linked to them jurisdiction sovereignty responsibility individual rights while also adopting the innovative approach of viewing borders as phenomena of both closedness and openness Accordingly the first part of the book addresses what happens within borders investigating the root causes of the emergence of spatial limits and re assessing apparent extra territorial assertions of State power In turn the second part not only explores typical borderless spaces but also more generally considers the exercise of States and international organisations powers and prerogatives across or beyond borders

**Commercial Space Exploration** Jai Galliot, 2016-03-09 Not since man set foot on the moon over four decades ago has there been such passion and excitement about space exploration This enthusiasm and eagerness has been spurred on by the fact that for the first time since the very beginning of the space age space travel is no longer limited to an elite group of highly trained and well disciplined military officers and test pilots Instead we must understand that the possibility of commercial space travel is already on our horizon and that it comes with a number of significant practical and moral challenges Our level of scientific development and ability to influence international affairs and policy confers upon us an obligation to study the ethical legal and social considerations associated with space exploration and understanding the potential consequences from the beginning is critical This volume provides the first comprehensive and unifying analysis concerning the rise of private space exploration with a view toward developing policy that may influence real world decision making The plethora of questions demanding serious attention privatisation and commercialisation the impact on the environment health futures risk assessment responsibility and governance are directly addressed in this scholarly work
