Key Variables In Social Investigation:

Key Variables in Social Investigation Robert Burgess,2018-05-11 *Key Variables in Social Investigation* encourages sociologists and other social scientists to think about the conceptual and empirical problems of using and evaluating key variables in social research The book contains reviews of ten major variables age gender race and ethnicity health and illness education social class and occupation work employment and unemployment and unemployment leisure politics and voluntary ways in which concepts can be specified and translated into variables and indicators **Social Measurement through**

Social Surveys Julie Gibbs,2016-04-01 How do academic social scientists and survey professionals use social measurement techniques How are these techniques applied to specific concepts in empirical research This book is an important resource for students academic and professional researchers offering an overview of both new and practiced methods of social measurement for quantitative survey research It will provide readers looking to investigate hot social science topics with a way of learning how key measurement techniques can be utilised in that topic in a practical way Emerging from the editors widely used work on an online social survey resource offering information on key social surveys and their questionnaires entitled Question Bank this book aims to take this material further It elaborates on the problems involved with this resource type providing a comprehensive and unique volume that will enable the reader to have the confidence to use this technique in their own research

Women and Alcohol in Social Context J. Waterson,2000-11-08 Drinking alcohol can be immensely pleasurable and life enhancing On the other hand it can be associated with danger and risk This book explores some of the implications of this dichotomy which creates many policy and practice dilemmas by a detailed exploration of the place of drinking in women s lives Interviews and case studies show women s drinking practices to be constructive and autonomous responses to the social and material contexts of their lives **Applied Social Science for Early Years** Ewan

Ingleby,Geraldine Oliver,2008-07-25 Applying social science subjects such as psychology sociology social policy and research methods to Early Years can help to raise standards and ensure good practice These subjects inform much of the academic curriculum within many Early Years programmes and are subjects that make an important contribution to understanding children s behaviour growth and development The book identifies analyses and assesses how social science enriches Early Years as opposed to regarding Early Years and social science as distinct Each chapter imaginatively introduces the main learning objectives and includes formative activities which apply social science to particular themes to aid students cognitive skills

Social Class and Stratification Peter Saunders,2006-10-19 The questions raised by a study of class and inequality are important but often complex This book succeeds in making them understandable without oversimplifying and its breadth originality and easy style will appeal to a wide readership Peter Saunders covers theories of social class as well as evidence on class inequalities in the contemporary period He analyses why class inequalities exist whether they are inevitable whether they are unjust and how they are changing The analysis is comprehensive and up to date and includes

information on how the distribution of wealth and income and social mobility chances have been changing during the Thatcher years It also explores how the class structure is being affected by developments such as the spread of privatization and individual shareholdings the rise of the yuppies and the emergence of an underclass On the theoretical side Professor Saunders gives equal weight to marxist social democratic and neo liberal perspectives on class and inequality and writers as diverse as Karl Marx John Rawls and Friedrich Hayek all receive serious and balanced consideration

Social Class in Modern Britain Gordon Marshall, Howard Newby, David Rose, Carol Vogler, 2005-08-10 The book incorporates three alternative conceptions of class Erik Olin Wright's structural Marxist account is set alongside John Goldthorpe's occupational class schema and the Registrar General's prestige and skill related categories The authors use their unique data on inequality and conflict in contemporary Britain to provide for the first time a rigorous comparison of Marxist sociological and official class frameworks The book ranges widely across such topics as sectionalism in the workforce privatism of families and individuals fatalism gender and class processes sectoral production and consumption cleavages The authors conclude that class is still crucial in structuring economic political and social life

Doing Research in Organizations (RLE: Organizations) Alan Bryman, 2013-05-02 This textbook provides first hand inside accounts of the process of doing research in organizations It is intended both for students of research methods in sociology and social psychology and for students of organization studies organizational behaviour and management The contributors tackle such problems as gaining access to organizations getting on in organizations quantitative and qualitative styles of investigation the use of historical materials the effects of resources on the context of research the part played by political factors in organizational research the relevance of grounded theory and conducting research within a cross cultural framework

Sport, Leisure and Social Relations (RLE Sports Studies) John Horne, David Jary, Alan Tomlinson, 2014-04-24 When this book was first published the study of sport had been largely neglected by sociologists The contributions to this volume bring the sports field the leisure centre and everyday leisure activities to a more central position within the sociological enterprise Whether amateur or professional sport contributes to wider relations of power privilege and domination and this debate represents an important phase in the sociology of sport and leisure

Doing Secondary Analysis Angela Dale, Sara Arber, Michael Procter, 2025-06-30 Originally published in 1988 *Doing Secondary Analysis* is a practical guide to the secondary analysis of large scale survey data At a time when funding for primary data collection was increasingly constrained the secondary analysis of high quality government surveys offered the social scientist an unrivalled opportunity This volume provided a guide which moves through every stage of doing secondary analysis The authors begin with the conceptualization of the research problem and examine all the practicalities of using both standard rectangular data and hierarchical data and of deriving simple and complex variables They also provide a lucid description of the hardware and software available to the secondary analyst at the time This book successfully demonstrates the way in which secondary analysis can contribute both to the development of sociological theory

and to social policy formation The authors emphasize throughout that secondary analysis cannot be used as a short cut to quick results but that as much care over defining the research problem and understanding the categories of data is needed as for any other kind of research While Doing Secondary Analysis was invaluable to those about to embark upon social research it also offered many challenges to more experienced researchers

Hate Speech in Social Media Isabel Ermida, 2023-12-12 This edited book offers insight into the linguistic construction of prejudice and discrimination in social media Drawing on the outputs of a three year research project NETLANG involving scholars from five European countries Portugal Czech Republic Estonia Finland and Poland as well as on external contributions from participants in the project s final conference the collection brings together a variety of linguistic approaches to the study of online hate speech ranging from pragmatic to syntactic morphological and lexical analyses with a considerable focus on Natural Language Processing and Corpus Linguistics Data from English Portuguese Danish Lithuanian Persian Polish and Slovenian are examined along with various geopolitical contexts for hate speech especially anti refugee and anti immigrant discourse The authors explore a continuum of overt to covert textual data namely i structural elements such as syntactic and morphological patterns which recur throughout the texts ii lexical and stylistic elements revealing the often implicit ways in which vocabulary choices and rhetorical devices signal the expression of hate and iii interactional elements concerning the pragmatic relationships established in online communicative exchanges The chapters cover numerous types of prejudice such as sexism racism nationalism antisemitism religious intolerance ageism and homo transphobia The book will be of interest to an academic readership in Linguistics Media Studies Communication Studies and Social Sciences

Language and Social Structure in Urban France David Hornsby, 2017-07-05 The coming together of linguistics and sociology in the 1960 s most notably via the work of William Labov marked a revolution in the study of language and provided a paradigm for the understanding of variation and change Labovian quantitative methods have been employed successfully in North America the UK Scandinavia and New Zealand but have had surprisingly little resonance in France a country which poses many challenges to orthodox sociolinguistic thinking Why for example does a nation with unexceptional scores on income distribution and social mobility show an exceptionally high degree of linguistic levelling that is the elimination of marked regional or local speech forms And why does French appear to abound in hyperstyle variables which show greater variation on the stylistic than on the social dimension in defiance of a well established theory than such

variables should not occur This volume brings together leading variationist sociolinguists and sociologists from both sides of the Channel to ask what makes France exceptional In addressing this question variationists have been forced to reassess the accepted interdisciplinary consensus and to ask as sociolinguistics has come of age whether concepts and definitions have been transposed in a way which meaningfully preserves their original sense and crucially takes account of recent developments in sociology Sociologists for their part have focused on the largely neglected area of language variation and its implications for social theory Their findings therefore transcend the case study of a particularly enigmatic country to raise important theoretical questions for both disciplines

Women and Public Space in Turkey Selda Tuncer, 2018-06-21 Turkey's process of modernization developed rapidly during the second half of the twentieth century New social and legal reforms were institutionalized and political and economic changes located the country as a more liberated Western style society Women and Public Space in Turkey provides a historical understanding of women's experiences of this modernization between 1950 and 1980 a vital period in which their participation in urban public life expanded through higher education and employment Selda Tuncer examines the precise conditions that enabled women to leave the home and reveals how they perceived and experienced urban public space and social relations Drawing on interviews with two generations of women from Ankara and using personal family photographs the book provides invaluable insights into women in a predominantly Muslim society who are living in a highly secular social context Tuncer specifically focuses on women's everyday experiences and discusses how the relationship between women and public space was actually controlled and regulated by different notions of domestication especially in the micro politics of daily life The book sheds new light on the gendered processes of nation building socio cultural transformations and the crucial connections between gender modernity and the urban experience in a non Western context

The Values Debate Leslie J. Francis, 2014-05-22 Presents findings from a survey conducted among 30 000 13 15 year olds throughout England and Wales giving particular attention to social personal and moral issues

Constructing Educational Inequality Peter Foster, Roger Gomm, Martyn Hammersley, 2005-06-21 The issue of educational opportunity has long been of public concern and a major focus for educational research As a result there is now a substantial body of research findings in this field both quantitative and qualitative This work relates to various levels of the educational system and to different categories of student but particularly social class gender ethnicity and race The central trend has been to find persisting inequalities despite reform at system institutional and classroom levels Furthermore the educational system is frequently portrayed as playing a key role in reproducing wider social and economic inequalities This book examines the status of educational inequality as a social problem explores the conceptual issues surrounding it assesses a representative sample of recent research and seeks to clarify the relevant methodological ground rules thereby laying the basis for future research in the field

A Matter of Record John Scott, 2014-04-03 This textbook aims to give an introduction to the use of documentary sources in social research It is designed to be a companion to courses in research methods in the
