Formal Syntax And Semantics Of Java:

Formal Syntax and Semantics of Java Jim Alves-Foss, 2003-07-31 Java undoubtedly has its roots in embedded systems and the Web. Nevertheless, it is a fully functional high level programming language that can provide users with a wide range of functionality and versatility. This thoroughly cross reviewed state of the art survey is devoted to the study of the syntax and semantics of Java from a formal methods point of view. It consists of the following chapters by leading researchers: Formal Grammar for Java, Describing the Semantics of Java and Proving Type Soundness, Proving Java Type Soundness, Machine Checking the Java Specification, Proving Type Safety, An Event Based Structural Operational Semantics of Multi Threaded Java, Dynamic Denotational Semantics of Java, A Programmer's Reduction Semantics for Classes and Mixins, A Formal Specification of Java Virtual Machine Instructions for Objects, Methods and Subroutines, The Operational Semantics of a Java Secure Processor, A Programmer Friendly Modular Definition of the Semantics of Java. **Formal Syntax and Semantics**

Construction of Analysis of Systems W. Rance Cleaveland, 2003-05-21 ETAPS 99 is the second instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprises five conferences: FOSSACS, FASE, ESOP, CC TACAS, four satellite workshops, CMCS, AS, WAGA, CoFI, seven invited lectures, two invited tutorials and six contributed tutorials. The events that comprise ETAPS address various aspects of the system development process including specification

design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Dieren t blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive

Stärk, 2003-06-30 Proof theory has long been established as a basic discipline of mathematical logic It has recently become increasingly relevant to computer science The deductive apparatus provided by proof theory has proved useful for metatheoretical purposes as well as for practical applications Thus it seemed to us most natural to bring researchers together to assess both the role proof theory already plays in computer science and the role it might play in the future The form of a Dagstuhl seminar is most suitable for purposes like this as Schlo Dagstuhl provides a very convenient and stimulating environment to discuss new ideas and developments To accompany the conference with a proceedings volume appeared to us equally appropriate Such a volume not only presents basic results of the subject and makes them available to a broader audience but also signals to the scientific community that Proof Theory in Computer Science PTCS is a major research branch within the wider field of logic in computer science CONCUR 2000 - Concurrency Theory Catuscia

Modeling for New Information Systems Technologies Hiroshi Arisawa, Yahiko Kambayashi, 2003-08-06 The objective of the
 workshops associated with ER 2001 the 20th International Conference on Conceptual Modeling was to give participants the
 opportunity to present and discuss emerging hot topics thus adding new perspectives to conceptual modeling This the 20th
 ER conference the first of the 21st century was also the first one in Japan The conference was held on November 27-30 2001 at
 Yokohama National University with 192 participants from 31 countries ER 2001 encompasses the entire spectrum of c
 conceptual modeling from theoretical aspects to implementations including fundamentals applications and software engineering
 In particular ER 2001 emphasized e business and reengineering To meet this objective we selected the following four topics
 and planned four international workshops International Workshop on Conceptual Modeling of Human Organizational Social
 Aspects of Manufacturing Activities HUMACS 2001 Manufacturing enterprises have to confront a host of demands The
 competitive climate enhanced by communication and knowledge sharing will require increasingly rapid responses to market
 forces Customer demands for higher quality better services and lower cost will force manufacturers to reach new levels of
 exhibility and adaptability Sophisticated customers will demand products customized to meet their needs Industries have so
 far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful
 hardware and software technology Attention to the role of humans combined with organizational and social schemes in
 manufacturing has only been marginal The workshop HUMACS 2001 aimed to challenge the relevance of this last point

Schmitt, 2007-04-21 The ultimate goal of program verification is not the theory behind the tools or the tools themselves but
 the application of the theory and tools in the software engineering process Our society relies on the correctness of a vast and
 growing amount of software Improving the software engineering process is an important long term goal with many steps Two
 of those steps are the KeY tool and this KeY book *Logic for Programming, Artificial Intelligence, and Reasoning* Matthias
