Formal Spatial Economic Analysis:

Formal Spatial Economic Analysis Jean H. P. Paelinck, J. H. Kuiper, 1983 *Spatial Econometrics: Methods and Models* L. Anselin, 2013-03-09 Spatial econometrics deals with spatial dependence and spatial heterogeneity critical aspects of the data used by regional scientists These characteristics may cause standard econometric techniques to become inappropriate In this book I combine several recent research results to construct a comprehensive approach to the incorporation of spatial effects in econometrics My primary focus is to demonstrate how these spatial effects can be considered as special cases of general frameworks in standard econometrics and to outline how they necessitate a separate set of methods and techniques encompassed within the field of spatial econometrics My viewpoint differs from that taken in the discussion of spatial autocorrelation in spatial statistics e g most recently by Cliff and Ord 1981 and Upton and Fingleton 1985 in that I am mostly concerned with the relevance of spatial effects on model specification estimation and other inference in what I call a model driven approach as opposed to a data driven approach in spatial statistics I attempt to combine a rigorous econometric perspective with a comprehensive treatment of methodological issues in spatial analysis

Morphisms for Quantitative Spatial Analysis Daniel A. Griffith, Jean H. P. Paelinck, 2018-03-07 This book treats the notion of morphisms in spatial analysis paralleling these concepts in spatial statistics Part I and spatial econometrics Part II The principal concept is morphism e g isomorphisms homomorphisms and allomorphisms which is defined as a structure preserving the functional linkage between mathematical properties or operations in spatial statistics and spatial econometrics among other disciplines The purpose of this book is to present selected conceptions in both domains that are structurally the same even though their labelling and the notation for their elements may differ As the approaches presented here are applied to empirical materials in geography and economics the book will also be of interest to scholars of regional science quantitative geography and the geospatial sciences It is a follow up to the book Non standard Spatial Statistics and Spatial Econometrics by the same authors which was published by Springer in 2011 **History of Spatial Economic**

Theory C. Ponsard, 2012-12-06 The concept of space has always been a fundamental element in various branches of knowledge The concept often appears in the evolution of knowledge either as a basis of theory or as a factor in research It is associated more or less directly with all the history of scientific thought At the level of simple common sense the importance of the concept of space is only equaled by its lack of precision It was part of legend before becoming part of history To indicate the founding of Rome Romulus started by drawing the boundaries locating its landmarks in a discontinuous space after having cut the limits of a continuous space However neither geographical explorations nor mathematico logical speculations have ever completely removed the mystery from the concept of space For all its simple common sense its mystique remains intact The privileged position occupied by the concept of space in the history of science and the vagueness of its meaning in the current use of the term far from constituting a paradox are mutually explanatory Every concept of space

is necessarily the result of an abstraction whether the process by which it is reached is through mathematics psychology biology or any other discipline At the level of common knowledge the space time concept is the base upon which are arranged individual experiences It is thus easy to understand how the concept of space can be understood only through an orderly arrangement of these experiences and their integration into a logical scheme Wassily Leontief and Input-Output Economics Erik Dietzenbacher, Michael L. Lahr, 2004-03-25 Wassily Leontief 1905 1999 was the founding father of input output economics for which he received the Nobel Prize in 1973 This book offers a collection of papers in memory of Leontief by his students and close colleagues The first part Reflections on Input Output Economics focuses upon Leontief as a person and scholar as well as his personal contributions to economics It includes contributions by Nobel Laureate Paul A Samuelson who shares his memories of a young Professor Leontief at Harvard and ends with the last joint interview with Wassily and his wife to date previously unpublished The second part Perspectives of Input Output Economics includes theoretical and empirical research inspired by Leontief's work and offers a wide ranging sample of the state of interindustry economics a field Leontief founded This is a strong collection likely to appeal to a wide range of professionals in universities government industry and international organizations Infrastructure and the Space-Economy Karin Peschel, 2012-12-06 This Festschrift is dedicated to ROLF FUNCK on occasion of his 60th birthday on February 7 1990 It was a wholehearted desire of the authors who all are obliged to ROLF FUNCK in their research work to please and to honour him and to express their deep gratitude I gladly took the initiative of preparing this Festschrift since I have been closely associated with ROLF FUNCK for many years of his academic life We first met in 1958 when he was Assistant Professor Wissenschaftlicher Assistent and I was student at the University of Munster A few years later when ROLF FUNCK still very young moved to the University of Karlsruhe as Professor of Economics and Director of the Institute of Economic Policy and Research he offered me the opportunity of working with him and this started a long period of successful scientific collaboration Nowadays we meet only occasionally at conferences in committees etc but I always recall with pleasure the warm hearted and stimulating atmosphere he created at his Institute in Karlsruhe I express my thanks to the authors and to the publisher the Springer Verlag for their cooperation as well as to the sponsors who provided the necessary funds for the publication of this Festschrift For her enthusiasm in compiling and processing the articles on the PC and producing the final draft I am indebted to Mrs Ilona Lohr Qualitative and Quantitative Mathematical Economics Jean H. Paul Paelinck, 2012-12-06 Dynamics and Conflict in Regional Structural Change Manas Chatterji, Robert E. Keunne, 1990-06-18 The second in a two volume tribute to Walter Isard the first being New Frontiers in Regional Science this book looks at dynamics and conflict in regional structural change Together they contain 50 papers by experts in this field and look at subjects such as location theory *The Economic Thought of William Petty* Hugh Goodacre, 2018-05-11 William Petty 1623 1687 long recognised as a founding father of English political economy was actively involved in the military colonial administration of Ireland following

its invasion by Oliver Cromwell and to the end of his days continued to devise schemes for securing England's continued domination of that country. It was in that context that he elaborated his economic ideas which consequently reflect the world of military bureaucratic officialdom, neo-feudalism and colonialism he served. This book shows that much of the theory and methodology in use within the economics discipline of today has its roots in the writings of Petty and his contemporaries rather than in the supposedly universalistic and enlightened ideals of Adam Smith a century later. Many of the fundamental ideas of today's development economics for example are shown to have been deployed by Petty explicitly for the purpose of furthering England's colonialist objectives while his pioneering writings on fiscal issues and national accounting theory were equally explicitly directed towards the raising of funds for England's predatory colonial and commercial wars. This book argues that exploring the historical roots of economic ideas and methods in this way is an essential aspect of assessing their appropriateness and analytical power today and that this is more relevant than ever. It will be of interest to advanced students and researchers in the history of economic thought, early modern economic history, development economics and economic geography.

The Economics of Urban Property Markets Paschalis Arvanitidis, 2014-08-13. This book examines the relationship between the property market and urban economy. The stimulus for this work was provided by the seemingly ever accelerating process of urban economic change and the noticeable failure of existing studies to adequately explore the pivotal role that the property market plays in this process. Drawing on institutional economics, the central argument of the book is that the property market as an institution is a mediator through which urban economic potential can be realised and served. In developing this argument, the book provides a critical realist ontological framework that advances understanding of the institutional structure of the economy and the complex interrelation between the institutional environment and human agency as well as a holistic theoretical framework of urban economic change where appropriate emphasis is placed on the specific mechanisms, processes and dynamics through which the built environment is provided. Arvanitidis also explores an institutional conceptualisation of property market efficiency defined in terms of the ability of the market institution to adapt its structure and to provide outcomes that the economy requires. To inform empirical research on the developed concepts, the book also offers a generic analytical approach specifying appropriate research methods and techniques for investigation along with a specific research design providing an operational framework that translates developed theory into empirical practice. The book's primary contribution therefore lies in its delineation of a holistic research programme to conceptualise the property market as an institution and to explore its role within the urban economy. Multicriterion Decision in Management Jean-Charles Pomerol, Sergio Barba-Romero, 2012-12-06. Multicriterion Decision in Management: Principles and Practice is the first multicriterion analysis book devoted exclusively to discrete multicriterion decision making. Typically, multicriterion analysis is used in two distinct frameworks. Firstly, there is multiple criteria linear programming which is an extension of the results of linear programming and its associated algorithms. Secondly, there is

discrete multicriterion decision making which is concerned with choices among a finite number of possible alternatives such as projects investments decisions etc This is the focus of this book The book concentrates on the basic principles in the domain of discrete multicriterion analysis and examines each of these principles in terms of their properties and their implications In multicriterion decision analysis any optimum in the strict sense of the term does not exist Rather multicriterion decision making utilizes tools methods and thinking to examine several solutions each having their advantages and disadvantages depending on one s point of view Actually various methods exist for reaching a good choice in a multicriterion setting and even a complete ranking of the alternatives The book describes and compares these methods so called aggregation methods with their advantages and their shortcomings Clearly organizations are becoming more complex and it is becoming harder and harder to disregard complexity of points of view motivations and objectives The day of the single objective profit social environment etc is over and the wishes of all those involved in all their diversity must be taken into account To do this a basic knowledge of multicriterion decision analysis is necessary The objective of this book is to supply that knowledge and enable it to be applied The book is intended for use by practitioners managers consultants researchers and students in engineering and business
