Ellis,Natika Newton,2000-01-01 These new studies by prominent neuroscientists psychologists and philosophers work toward a coherent framework for understanding emotion and its contribution to the functioning of consciousness in general as an aspect of self organizing embodied subjects Distinguishing consciousness from unconscious information processing hinges on the role of motivating emotions in all conscious modalities and how emotional brain processes interact with those traditionally associated with cognitive function Computationally registering processing sensory signals e g in the occipital lobe or area V4 by itself does not result in perceptual consciousness which requires subcortical structures such as amygdala hypothalamus and brain stem This interdisciplinary anthology attempts to understand the complexity of emotional intentionality why the role of motivation in self organizing processes is crucial in distinguishing conscious from unconscious processes how emotions account for agency and how an adequate approach to emotion motivation can address the traditional mind body problem through a holistic understanding of the conscious behaving organism Series B      The World of Tacitus' Dialogus de Oratoribus Christopher S. van den Berg,2014-09-11 Coming to terms with the rhetorical arts of antiquity necessarily illuminates our own ideas of public discourse and the habits of speech to which they have led Tacitus wrote the Dialogus at a time ca 100 CE when intense scrutiny of the history the definitions and the immediate relevance of public speech were all being challenged and refashioned by a host of vibrant intellects and ambitious practitioners This book challenges the notion that Tacitus sought to explain the decline of oratory under the Principate Rather from examination of the dynamics of argument in the dialogue and the underlying literary traditions there emerges a sophisticated consideration of eloquentia in the Roman Empire Tacitus emulates Cicero's legacy and challenges his position at the top of Rome's oratorical canon He further shows that eloquentia is a means by which to compete with the power of the Principate      **The Secret Life of Oscar Wilde** Neil McKenna,2009-03-05 Oscar Wilde said of himself I put all
