

French and Raven's Five Forms of Power

In 1959, French and Raven, researchers at the University of Michigan, identified five bases or sources of social power as follow:

- **Coercive Power:** Have the ability to punish for non-compliance.
- **Reward Power:** Have the ability to compensate for compliance.
- **Legitimate Power:** Hold the formal right to make demands.
- **Referent Power:** Perceived attractiveness, worthiness, right to respect.
- **Expert Power:** Based on superior skill and knowledge.

Six years later, Raven added an extra power base:
Informational Power: Ability to control the information that others need to accomplish something.

Forms Of Power:

Forms of Power Gianfranco Poggi, 2016-04-07 Political power is often viewed as the sole embodiment of social power even while we recognize that social power manifests itself in different forms and institutional spheres This new book by Gianfranco Poggi suggests that the three principal forms of social power the economic the normative ideological and the political are based on a group's privileged access to and control over different resources Against this general background Poggi shows how various embodiments of normative ideological and economic power have both made claims on political power considered chiefly as it is embodied in the state and responded in turn to the latter's attempt to control or to instrumentalize them The embodiment of ideological power in religion and in modern intellectual elites is examined in the context of their relations to the state Poggi also explores both the demands laid upon the state by the business elite and the impact of the state's fiscal policies on the economic sphere The final chapter considers the relationship between a state's political class and its military elite which tends to use the resource of organized coercion for its own ends *Forms of Power* will be of interest to students and scholars of sociology and politics

Frameworks of Power Stewart Clegg, 1989-07-17 This textbook provides a coherent and comprehensive account of the different frameworks for understanding power which have been advanced within the social sciences Though looking back to the classical literature on power with special emphasis on Machiavelli and Hobbes the book concentrates on the modern analysis of power from both British and American social and political theorists and from German Critical Theory and French theorists such as Foucault and develops upon its theory and its application Not only does the book provide an overview of the various frameworks of power advanced by these and other influential thinkers but it also develops a new synthesis based on important work in both the sociology of science

Russia-EU Relations and the Common Neighborhood Irina Busygina, 2017-07-20 Examining Russia EU relations in terms of the forms and types of power tools they use this book argues that the deteriorating relations between Russia and the EU lie in the deep differences in their preferences for the international status quo These different approaches combined with economic interdependence and geographic proximity means both parties experience significant difficulties in shaping strategy and formulating agendas with regards to each other The Russian leadership is well aware of the EU's authority orientation but fails to reliably predict foreign policy at the EU level whilst the EU realizes Russia's coercive orientation in general but cannot predict when and where coercive tools will be used next Russia is gradually realizing the importance of authority while the EU sees the necessity of coercion tools for coping with certain challenges The learning process is ongoing but the basic distinction remains unchanged and so their approaches cannot be reconciled as long as both actors exist in their current form Using a theoretical framework and case studies including Belarus Georgia and Ukraine Busygina examines the possibilities and

constraints that arise when the power of authority and the power of coercion interact with each other and how this interaction affects third parties

Status and Sacredness Murray Milner, 1994 Status and Sacredness provides a new theory of status and sacral relationships and a provocative reinterpretation of the Indian caste system and Hinduism Milner shows how in India and many other social contexts status is a key resource and that sacredness can be usefully understood as a special form of status By analyzing the nature of this resource Milner is able to provide powerful explanations of the key features of the social structure culture and religion He argues against the widely held view that the Indian caste system is best understood as a unique cultural development demonstrating that many of the seemingly exotic features are variations on themes common to other societies Milner's analysis is rooted in a new theoretical framework called resource structuralism that helps to clarify the nature and significance of power and symbolic capital The book thus provides a bold new analysis of India an innovative approach to the analysis of religion and an important contribution to social theory

The Oxford Handbook of Social Psychology and Social Justice Phillip L. Hammack, 2018-02-15 The twentieth century witnessed not only the devastation of war conflict and injustice on a massive scale but it also saw the emergence of social psychology as a discipline committed to addressing these and other social problems In the 21st century however the promise of social psychology remains incomplete We have witnessed the reprise of authoritarianism and the endurance of institutionalized forms of oppression such as sexism racism and heterosexism across the globe Edited by Phillip L Hammack The Oxford Handbook of Social Psychology and Social Justice reorients social psychology toward the study of social injustice in real world settings The volume's contributing authors effectively span the borders between cultures and disciplines to better highlight new and emerging critical paradigms that interrogate the very real consequences of social injustice United in their belief in the possibility of liberation from oppression with this Handbook Hammack and his contributors offer a stirring blueprint for a new important kind of social psychology today

Dialogical Planning in a Fragmented Society Thomas L. Harper, Stanley Stein, 2018-02-06 The culmination of a critical study of neo pragmatism philosophy and its application to planning Dialogical Planning in a Fragmented Society begins with philosopher Stanley M Stein s examination of neo pragmatism and his thoughts on how it can be useful in the field of environmental design specifically how it can be applied to planning procedures and problems Neo pragmatism is an approach that has been in the past best expressed or implied in the writing of Hilary Putnam Richard Rorty and in particular Donald Davidson John Rawls and Ludwig Wittgenstein Thomas L Harper furthers this tradition by providing the context for this theoretical application from his academic background in economics and management as well as his practical experience with political decision making processes community planning and economic development The result is a fresh synthesis of ideas a new approach to thinking about planning theory and its implications for and relationship with practice Philosopher Michael Walzer has asserted that philosophy reflects and articulates the political culture of its time and politics presents and enacts the arguments of philosophy Similarly the authors view planning theory as planning reflected upon in tranquility away from the tumult of battle and planning practice as planning theory acted out in the confusion of the trenches Each changes the other in a dynamic way and the authors demonstrate the intimate and inextricable link between them

Gypsy and Traveller Ethnicity Brian A Belton, 2004-08-02 The book explores the notion of Gypsy and Traveller ethnicity and provides a critique of the conceptual basis of racial and ethnic categorisation An analysis of the post war housing situation is given in order to illustrate a connection between social and economic conditions legislation affecting gypsies and travellers and the visibility and general consciousness of the gypsy and traveller population The originality of the book lies in its argument that the position of gypsies and travellers largely arises out of social conditions and interaction rather than political biological or ideological determinants It puts forward the notion of an ethnic narrative of traveller identity and illustrates how variations

of this have been defensively deployed by some travellers and elaborated on by theorists Belton focuses on the social generation of travellers as a cultural ethnic and racial categorization offering a rational explanation of the development of an itinerant population that is less ambiguous and more informative in terms of the social nature of the gypsy and traveller position than interpretations based on blood breed stock ethnicity or race that dominate the literature *Labor of Dionysus* Michael Hardt,1994
