Design and Construction of Foundations in Areas of Deep Seasonal Frost and Permafrost Kenneth A. Linell, 1980 This report presents engineering guidance for the design and construction of foundations in areas of deep seasonal frost and permafrost as developed up to the early 1970 s Attention is given to basic considerations affecting foundation design site investigations survey datum points construction consideration and monitoring performance Included in the main text are 17 tables 141 figures and 213 selected references A bibliography presents 45 additional references *An Introduction to*

Foundations in Areas of Significant Frost Penetration J. Paul Guyer, 2013-06-02 Areas of significant frost penetration may be defined as those in which freezing temperatures occur in the ground to sufficient depth to be a significant factor in foundation design These areas may be further characterized as seasonal frost and permafrost zones Freeze thaw

temperature changes can exert major and potentially destructive forces on the foundations of structures This publication discusses planning design and construction methods for buildings and other infrastructure that can mitigate these forces in areas of significant frost penetration *An Introduction to Foundations in Areas of Significant Frost Penetration* J.
