Foundations Of Axiomatic Linguistics:

Foundations of Axiomatic Linguistics Jan Mulder, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Fundamental Principles of Corpus Linguistics Tony McEnery, Vaclav Brezina, 2022-09-29 How might evidence of language use, writing and speech be used as a way of studying language? Corpus linguistics is the study of linguistic data from a particular language or set of languages. It is a fast moving approach to studying language and there is still a degree of divergence in how research questions are approached using corpus data. This book uses a framework based on the work of Karl Popper to explore a number of fundamental issues in corpus linguistics. It critically evaluates how these issues are tackled and proposes a set of best practices for future research. It spells out why using corpus data is valuable, what we can learn from using it and how we may most effectively progress our understanding of language by using such data. It is essential reading for researchers and students of language in general and of applied linguistics and English language in particular.

The Foundations of Linguistic Theory (RLE Linguistics B: Grammar) Nigel Love, 2014-02-03 For Roy Harris the fundamental problem about linguistics is that it has been led astray by the fact that we are capable intellectually of decontextualising our own verbal behaviour. A whole interlocking system of doctrines about forms, meanings and communication has arisen designed to support the idea that one particular kind of decontextualising analysis is a prerequisite for rather than a retrospective reflection on that behaviour. Against this in 13 essays collected here for the first time Harris argues for a fresh start which recognises that we create language as we go, both as individuals and as communities, just as we create our social structures, forms of artistic expression, moral values and everything else we call civilisation. If Harris's thought can be put in a nutshell it is that all utterances, whether written or spoken, have to appear in a context and that context is an integral part of the utterance. There is no such thing as a contextless utterance. Euphony and Logos Roman Murawski, Jerzy Pogonowski, 2023-03-13 *Language in Focus: Foundations, Methods and Systems* A.
