Foundations Of Computational Mathematics Minneapolis 2002:

Foundations of Computational Mathematics, Minneapolis 2002 Felipe Cucker, 2004-03-25 The Foundations of Computational Mathematics meetings are a platform for cross fertilization between numerical analysis mathematics and computer science This volume first published in 2004 contains the plenary presentations given by some of the leading authorities in the world and topics surveyed range from optimization to computer algebra image processing to differential equations quantum complexity to geometry The volume will be essential reading for all those wishing to be informed of the state of the art in computational mathematics *Foundations of Computational Mathematics, Budapest 2011* Society for the Foundation of Computational Mathematics, 2013 A diverse collection of articles by leading experts in computational mathematics written to appeal to established researchers and non experts **Circuit Double Cover of Graphs** Cun-Quan Zhang, 2012-04-26 The famous Circuit Double Cover conjecture and its numerous variants is considered one of the major open problems in graph theory owing to its close relationship with topological graph theory integer flow theory graph coloring and the structure of snarks It is easy to state every 2 connected graph has a family of circuits covering every edge precisely twice C Q Zhang provides an up to date overview of the subject containing all of the techniques methods and results developed to help solve the conjecture since the first publication of the subject in the 1940s It is a useful survey for researchers already working on the problem and a fitting introduction for those just entering the field The end of chapter exercises have been designed to challenge readers at every level and hints are provided in an appendix *Surveys in Combinatorics 2013* Simon R. Blackburn, Stefanie Gerke, Mark J. Wildon, 2013 Surveys of recent important developments in combinatorics covering a wide range of areas in the field *Reversibility in Dynamics and Group Theory* Anthony G. O'Farrell, Ian Short, 2015-05-28 An accessible yet systematic account of reversibility that demonstrates its impact throughout many diverse areas of mathematics **The Maximal Subgroups of the Low-Dimensional Finite Classical Groups** John N. Bray, Derek F. Holt, Colva M. Roney-Dougal, 2013-07-25 Classifies the maximal subgroups of the finite groups of Lie type up to dimension 12 using theoretical and computational methods Automorphisms and Equivalence Relations in Topological Dynamics David B. Ellis, Robert Ellis, 2014-06-05 A lucid and self contained treatment of many key ideas in topological dynamics achieved by focusing on equivalence relations and automorphisms Optimal Transport Yann Ollivier, Hervé Pajot, Cedric Villani, 2014-08-07 The theory of optimal transportation has its origins in the eighteenth century when the problem of transporting resources at a minimal cost was first formalised Through subsequent developments particularly in recent decades it has become a powerful modern theory This book contains the proceedings of the summer school Optimal Transportation Theory and Applications held at the Fourier Institute in Grenoble The event brought together mathematicians from pure and applied mathematics astrophysics economics and computer science Part I of this book is devoted to introductory lecture notes accessible to graduate students while Part II contains research papers Together they represent a

valuable resource on both fundamental and advanced aspects of optimal transportation its applications and its interactions with analysis geometry PDE and probability urban planning and economics Topics covered include Ricci flow the Euler equations functional inequalities curvature dimension conditions and traffic congestion **Optimal Transportation** Yann Ollivier,Hervé Pajot,Cédric Villani,2014-08-07 Lecture notes and research papers on optimal transportation its applications and interactions with other areas of mathematics *Automorphic Forms and Galois Representations* Fred Diamond,Payman L.
