How to Choose the Perfect School Mary Lang,2005 A self help book for parents about school choice What 21st Century parents need to know about k 12 education Encyclopedia of American Education Harlow G. Unger,1996 Contains approximately 2 500 alphabetically arranged entries providing information on people events and topics related to a variety of educational areas such as administration reform history church state conflicts and civil rights each with bibliographic references **A Handbook of the Best Private Schools of the United States and Canada** ,1918 *Really Good Schools* James Tooley,2021-04-12 Almost overnight a virus has brought into question America s nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley s Really Good Schools A distinguished scholar of education and the world s foremost expert on private low cost innovative education Tooley takes readers to some of the world s most impoverished communities located in some of the world s most dangerous places including India and such war torn countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In

the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way **Choosing Homes, Choosing Schools** Annette

Lareau, Kimberly Goyette, 2014-03-31 A series of policy shifts over the past decade promises to change how Americans decide where to send their children to school In theory the boom in standardized test scores and charter schools will allow parents to evaluate their assigned neighborhood school or move in search of a better option But what kind of data do parents actually use while choosing schools Are there differences among suburban and urban families How do parents choices influence school and residential segregation in America Choosing Homes Choosing Schools presents a breakthrough analysis of the new era of school choice and what it portends for American neighborhoods The distinguished contributors to Choosing Homes Choosing Schools investigate the complex relationship between education neighborhood social networks and larger patterns of inequality Paul Jargowsky reviews recent trends in segregation by race and class His analysis shows that segregation between blacks and whites has declined since 1970 but remains extremely high Moreover white families with children are less likely than childless whites to live in neighborhoods with more minority residents In her chapter Annette Lareau draws on interviews with parents in three suburban neighborhoods to analyze school choice decisions Surprisingly she finds that middle and upper class parents do not rely on active research such as school tours or test scores Instead most simply trust advice from friends and other people in their network Their decision making process was largely informal and passive Eliot Weinginer complements this research when he draws from his data on urban parents He finds that these families worry endlessly about the selection of a school and that parents of all backgrounds actively consider alternatives including charter schools Middle and upper class parents relied more on federally mandated report cards district websites and online forums while working class parents use network contacts to gain information on school quality Little previous

research has explored what role school concerns play in the preferences of white and minority parents for particular neighborhoods. Featuring innovative work from more than a dozen scholars, *Choosing Homes Choosing Schools* adroitly addresses this gap and provides a firmer understanding of how Americans choose where to live and send their children to school.

School Choice and Human Good John E. Coons, 2021-10-21 John Coons is a progressive Berkeley law professor emeritus who in 1978 published a seminal book on the need for private school choice in the United States for children of lesser means. His motivation was and is straightforward: Families of greater means have always chosen their children's schools, whether by moving to preferred neighborhoods or paying private tuitions. Coons says we can't, with good conscience, continue to rob poor children of similar opportunities; children who often have the greatest educational needs. This book represents the ongoing observations of Coons, now 92 years of age, as he has written in brief essays published on an education blog in Florida, a state with an extraordinary degree of K-12 learning options. In a political arena that has been polarized on the issue of educational choice, Coons is a reminder that Democratic progressives were among the earliest to see value in expanding the educational universe of disadvantaged schoolchildren.

Good Enough for Government Work Amy E. Lerman, 2019-06-14 American government is in the midst of a reputation crisis. An overwhelming majority of citizens, Republicans and Democrats alike, hold negative perceptions of the government and believe it is wasteful, inefficient, and doing a generally poor job managing public programs and providing public services. When social problems arise, Americans are therefore skeptical that the government has the ability to respond effectively. It's a serious problem, argues Amy E. Lerman, and it will not be a simple one to fix. With *Good Enough for Government Work*, Lerman uses surveys, experiments, and public opinion data to argue persuasively that the reputation of government is itself an impediment to government's ability to achieve the common good. In addition to improving its efficiency and effectiveness, government therefore has an equally critical task: countering the belief that the public sector is mired in incompetence. Lerman takes readers through the main challenges. Negative perceptions are highly resistant to change, she shows, because we tend to perceive the world in a way that confirms our negative stereotypes of government, even in the face of new information. Those who hold particularly negative perceptions also begin to opt out in favor of private alternatives, such as sending their children to private schools, living in gated communities, and refusing to participate in public health insurance programs. When sufficient numbers of people opt out of public services, the result can be a decline in the objective quality of public provision. In this way, citizens' beliefs about government can quickly become a self-fulfilling prophecy with consequences for all. Lerman concludes with practical solutions for how the government might improve its reputation and roll back current efforts to eliminate or privatize even some of the most critical public services.
