**Helping Victims of Violent Crime** Diane L. Green, Albert R. Roberts, 2008-06-23 Over the past two decades violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people nearly 5% of the U S population are victims of crime every year and of that approximately one and a half million are victims of violent crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim centered and strengths perspective The book explores victim assistance through systems theory the holistic notion of examining the client in his her environment and a key theoretical underpinning of social work practice The basic assumption of systems theory is homeostasis A crime event causes a change in homeostasis and often results in disequilibrium The victim s focus at this point is to regain equilibrium Under the systems

metatheory coping crisis and attribution theories provide a good framework for victim centered intervention Stress and coping theories posit that three factors determine the state of balance perception of the event available situational support and coping mechanisms Crisis theory offers a framework to understand a victim's response to a crime The basic assumption of crisis theory asserts that when a crisis occurs people respond with a fairly predictable physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual's assertion that they can understand predict and control circumstances and result in the victim's assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that Treating Victims of Violent Crime offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism

Preparing for Digital Disruption Erik Schrijvers, Corien Prins, Reijer Passchier, 2021-09-28 This open access book offers an analysis of why preparations for digital disruption should become a stated goal of security policy and policies that aim to safeguard the continuity of critical infrastructure The increasing use of digital technology implies new and significant vulnerabilities for our society However it is striking that almost all cyber security measures taken by governments international bodies and other major players are aimed at preventing incidents But there is no such thing as total digital security Whether inside or outside the digital domain incidents can and will occur and may lead to disruption While a raft of provisions crisis contingency plans and legal regulations are in place to deal with the possibility of incidents in the real world no equivalence exists for the digital domain and digital disruption Hence this book uniquely discusses several specific policy measures government and businesses should take in order to be better prepared to deal with a digital disruption and prevent further escalation
