Systems of Reason and the Politics of Schooling Miguel Pereyra, Barry Franklin, 2014-06-27 The 1980s were an important decade for educational inquiry It was the moment of the linguistic turn with its emphasis on the role of language as a constructor of reality a structuring agent for institutions such as schools and a medium for translating knowledge into elements of power for processes of social regulation Drawing on the work and insights of educational researcher Thomas S Popkewitz this book shows how the linguistic turn provided an alternative to both mainline educational research grounded in the ideals of political liberalism and the effort of neo Marxists to challenge liberal thinking in favor of a scholarship based on class conflict and economic determinism *Tokyo* ,1998 日本語の文化 ,2004

Extraterrestrial Intelligence and Human Imagination John Traphagan, 2014-11-07 The search for extraterrestrial intelligence SETI represents one of the most significant crossroads at which the assumptions and methods of scientific inquiry come into direct contact with and in many cases conflict with those of religion Indeed at the core of SETI is the same question that motivates many interested in religion What is the place of humanity in the universe Both scientists involved with SETI and in other areas and those interested in and dedicated to some religious traditions are engaged in contemplating these types of questions even if their respective approaches and answers differ significantly This book explores this intersection with a focus on three core points 1 the relationship between science and religion as it is expressed within the framework of SETI research 2 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways in which SETI researchers have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 3 what sort of empirical evidence we might be able to access as a way

of thinking about the social impact that contact with alien intelligence might have for humanity from both religious and cultural perspectives The book developed as a result of a course the author teaches at the University of Texas at Austin Religion Science and the Search for Extraterrestrial Intelligence **The Intelligence** ,1904 **Trends in Artificial Intelligence Theory and Applications.
