Burton,Dorian Burton,Susan M. McHale,Valarie King,Jennifer Van Hook,2016-12-09 This

important volume takes a life course approach in sharing empirical insights on the family experiences of African American males in socioeconomic and political contexts. Representing fields ranging from developmental psychology to public health and sociology to education, chapters identify challenges facing black men and boys in the U.S. as well as family and community sources of support and resilience. Survey findings and exemplar case studies illustrate stressors and risk factors uniquely affecting African American communities, and tailored prevention and intervention strategies are described at the personal, family, and societal levels. These interdisciplinary perspectives not only encourage additional research but inspire the continued development of appropriate interventions, relevant practice, and equitable policy. Included in the coverage: The adjustment and development of African American males; Conceptual frameworks and emerging research opportunities; A trauma-informed approach to affirming the humanity of African American boys and supporting healthy transitions to manhood; Humanizing developmental science to promote positive development of young men of color; Families, prisoner reentry, and reintegration; Safe spaces for vulnerability; New perspectives on African Americans who struggle to be good fathers; They can't breathe: Why neighborhoods matter for the health of African American men and boys; Promoting diversity in the research agenda to reflect a diverse population; Boys and Men in African American Families is an invaluable reference for research professionals particularly interested in sociology, public policy, anthropology, urban and rural studies, and African American studies. Survey and ethnographic studies of poverty, inequality, family processes, and child, adolescent, and adult health and development are featured.

Why Men Win at Work Gill Whitty-Collins, 2020-08-01 Why are men still winning at work? If women have equal leadership ability, why are they so underrepresented at the top in business and society? Why are we still living in a man's world? And why do we accept it? In this provocative book, Gill Whitty Collins looks beyond the facts and figures on gender bias and uncovers the invisible discrimination that continues to sabotage us in the workplace and limits our shared success. Addressing both men and women and pulling no punches, she sets out the psychology of gender diversity from the perspective of real personal experience and shares her powerful insights on how to tackle the gender equality issue. This book tells the inconvenient truth about the gender inequality issue, providing some real deep insights into what truly gets in the way of driving diversity, even in companies that are trying to do the right thing. It may be uncomfortable reading for some, but crucial for driving the needed change to create a long-term advantage.
