Lequeu An Architectural Enigma:

An Architectural Enigma Philippe Duboy, 1986 Jean Jacques Lequeu does in fact hide behind the most enigmatic and controversial smile in the history of art writes Philippe Duboy in a book that is one of the most tantalizing examples of architectural investigation ever produced It is an extraordinary compilation part speculative biography part meticulous research with hundreds of intriguing drawings many in color that unravels the mystery of this eighteenth century maverick artist whose drawings have established him variously as a visionary architect associated with Boullée and Ledoux forerunner of surrealism and inventor of bad taste Lequeu's architectural drawings from the legendary portfolios *Architecture civile* and *Nouvelle methode* are presented here in their entirety along with his *Lewd Figures* perhaps the oddest feature of the whole collection The drawings are accompanied by long captions misspelt and ungrammatical but written in a flawless bureaucratic hand The artist's marginalia provide insights into his visions which seem dominated by an obsession with petrified forms and a recurring preoccupation with sex Interleaved with the drawings are curious autobiographical papers And it is here that Duboy's investigation of Lequeu begins to reveal strange clues He discovers that Lequeu was not an architect at all but a government bureaucrat a draftsman who ended up living in a brothel Between the brothel and the obscure office from which he was eventually fired he produced his encyclopedia of the universe bizarre portraits of nuns baring their breasts and other lewd figures and architectural fantasies of vast imaginary cities Duboy takes his study further into the realm of Charles Fourier and his brother in law Anthelme Brillat Savarin and from there to the world of the dadaists surrealists and futurists particularly the circles of Marcel Duchamp and Le Corbusier He suggests that Duchamp and Raymond Rousell tampered with the Lequeu drawings to concoct a character and oeuvre even more puzzling There are glimpses of Duchamp's convolutions of mind that will stir a reassessment of his work Duchamp emerges here for the first time as an intrepid and unwavering despiser of Le Corbusier Twentieth century reputations are as much at stake in this study as those of the eighteenth century artist notes Robin Middleton Philippe Duboy is Professor of the History of Cities Paris Belleville School of Architecture

Marcel Duchamp and the Architecture of Desire Penelope Haralambidou, 2017-03-02 While much has been written on Marcel Duchamp one of the twentieth century's most beguiling artists the subject of his flirtation with architecture seems to have been largely overlooked Yet in the carefully arranged plans and sections organising the blueprint of desire in the Large Glass his numerous pieces replicating architectural fragments and his involvement in designing exhibitions Duchamp's fascination with architectural design is clearly evident As his unconventional architectural influences Nicéron Lequeu and Kiesler and diverse legacy Tschumi OMA Webb Diller Scofidio and Nicholson indicate Duchamp was not as much interested in built architecture as he was in the architecture of desire re constructing the imagination through drawing and testing the boundaries between reality and its aesthetic and philosophical possibilities Marcel Duchamp and the Architecture of Desire examines the link between architectural thinking and Duchamp's work By employing design drawing and making the tools of the architect Haralambidou performs an architectural analysis of Duchamp's final enigmatic work Given 1 The Waterfall 2 The Illuminating Gas demonstrating an innovative research methodology able to grasp meaning beyond textual analysis This novel reading of his ideas and methods adds to but also challenges other art historical interpretations Through three main themes allegory visuality and desire the book defines and theorises an alternative drawing practice positioned between art and architecture that predates and includes Duchamp

The Architect's Dream Sean Pickersgill, 2023-09-29 Sean Pickersgill demonstrates that the goal of creating meaningful architecture can take a variety of critical and philosophical paths The importance of architecture as an expression of broad complex social drivers is complemented by the equally popular idea that architecture as an intellectual pursuit retains its own autonomy as a self-referential culture This book uniquely places the emphasis for innovation in architecture within the domain of critical thinking generally and a specific understanding of the semantics of

built form The book draws on a broad range of subject areas from film to philosophy to anthropology to mathematics and economics to show that the path to meaningful creative practice is always based in an understanding of the principal drivers for change and meaning in society It is not a simple recipe book or workshop manual for others to reproduce It requires the engaged reader to employ their own creative abilities to find what potential lies in each of the propositions and it will encourage the scholastic architect to continue to mine the rich veins of intellectual culture to demonstrate the latent purposiveness inherent in all meaningful architecture

Le Corbusier and the Occult Jan Birksted, 2009 Le Corbusier grew up in La Chaux de Fonds in Switzerland a city described by Karl Marx as one unified watchmaking industry Among the unifying social structures of La Chaux de Fonds was the Loge L Amiti the Masonic lodge with its francophone moral social and philosophical ideas including the symbolic iconography of the right angle rectitude and the compass exactitude Le Corbusier would later describe these as my guide my choice and as his time honored ideas ingrained and deep rooted in the intellect like entries from a catechism Through exhaustive research that challenges long held beliefs J K Birksted s *Le Corbusier and the Occult* traces the structure of Le Corbusier s brand of modernist spatial and architectural ideas based on startling new documents in hitherto undiscovered family and local archives Publisher [Design Book Review](#) ,1989

Reading Architecture with Freud and Lacan Lorens Holm, 2022-09-30 *Reading Architecture with Freud and Lacan* Shadowing the Public Realm methodically outlines key concepts in psychoanalytic discourse by reading them against key modern and post modern architects It begins with what is arguably the central concept for each discipline by putting the unconscious in a dialectic relation to space Each subsequent chapter begins with a detail in architectural discourse a kind of provocation that anchors each excursion into the thought of Freud and Lacan The text is cyclical episodic and cloudlike rather than expository the intention is not simply to explain the concept of the unconscious but to different degrees perform it in the text The book offers powerful critiques of current planning practice which has no tools to address our attachment to places It concludes with powerful critiques of our incapacity to change the environmentally damaging ways we live our lives which is an effect of our incapacity to recognise the presence of the death drive in our nature The text is an extended thesis spanning the chapters that the field of the Other is the common grammar that organises subjects into civilisations which has consequences for how we treat the public realm in architecture politics and the city The field of the Other is a slightly different slice through the urban social world It shadows but does not correspond exactly to more familiar categories like private public inside outside figure ground or piazza boulevard *Reading Architecture with Freud and Lacan* will be an essential resource to anyone interested in how the environment we build is a reflection of our desire Psychoanalysis is one of the great humanist discourses of the 20th century and this book will be a valuable reference to the humanist in architects

planners and social scientists whether they are students professionals or amateurs It will appeal to historians of the 20th century and to psychoanalysts and architects who are interested in how their respective discourses interdigitate with each other and with other discourses Proceedings of the ACSA Annual Meeting Association of Collegiate Schools of Architecture,1993 **Intervals in the Philosophy of Architecture** Alberto Pérez Gómez, Stephen Parcell,1996 In this second volume in the Chora series contributing authors explore critical questions for the theory and practice of architecture They take an interdisciplinary approach to architecture and other cultural concerns challenging readers to consider alternatives to conventional aesthetic and technological reductions Jean-Baptiste Greuze Colin B.
