Lequeu Architectural Enigma:

An Architectural Enigma Philippe Duboy, 1986 Jean Jacques Lequeu does in fact hide behind the most enigmatic and controversial smile in the history of art writes Philippe Duboy in a book that is one of the most tantalizing examples of architectural investigation ever produced It is an extraordinary compilation part speculative biography part meticulous research with hundreds of intriguing drawings many in color that unravels the mystery of this eighteenth century maverick artist whose drawings have established him variously as a visionary architect associated with Boullée and Ledoux forerunner of surrealism and inventor of bad taste Lequeu's architectural drawings from the legendary portfolios *Architecture civile* and *Nouvelle methode* are presented here in their entirety along with his *Lewd Figures* perhaps the oddest feature of the whole collection The drawings are accompanied by long captions misspelt and ungrammatical but written in a flawless bureaucratic hand The artist's marginalia provide insights into his visions which seem dominated by an obsession with petrified forms and a recurring preoccupation with sex Interleaved with the drawings are curious autobiographical papers And it is here that Duboy's investigation of Lequeu begins to reveal strange clues He discovers that Lequeu was not an architect at all but a government bureaucrat a draftsman who ended up living in a brothel Between the brothel and the obscure office from which he was eventually fired he produced his encyclopedia of the universe bizarre portraits of nuns baring their breasts and other lewd figures and architectural fantasies of vast imaginary cities Duboy takes his study further into the realm of Charles Fourier and his brother in law Anthelme Brillat Savarin and from there to the world of the dadaists surrealists and futurists particularly the circles of Marcel Duchamp and Le Corbusier He suggests that Duchamp and Raymond Rousell tampered with the Lequeu drawings to concoct a character and oeuvre even more puzzling There are glimpses of Duchamp's convolutions of mind that will stir a reassessment of his work Duchamp emerges here for the first time as an intrepid and unwavering despiser of Le Corbusier Twentieth century reputations are as much at stake in this study as those of the eighteenth century artist notes Robin Middleton Philippe Duboy is Professor of the History of Cities Paris Belleville School of Architecture

building and all we have to do is find it *Artificial Intelligence and Architecture* Stanislas Chaillou,2022-03-07 History and Panorama Artificial Intelligence s AI encounter with Architecture is still in its infancy However current experiments and applications already are a testimony to their gradual intersection This book provides an introduction to the topic through the triple lens of History Application and Theory A chronology of Architecture s technological evolution first puts AI back in the context of the discipline The author then presents a collection of AI s applications in Architecture The book finally gives the stage to contributors working at the forefront of this revolution From Harvard to Foster Partners their perspectives provide a panorama of the discourse surrounding AI s presence in the field Halfway between research and practice this book offers to unveil the promise and challenges AI holds for Architecture Artificial intelligence as a planning tool for architects From urban planning to floor plans Potential of a new way of working **Modern Architecture: A Critical History (Fifth) (World of Art)** Kenneth Frampton,2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton s highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of Modern Architecture Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever Drawing Imagining Building Paul Emmons,2019-04-01 Drawing Imagining Building focuses on the history of hand drawing practices to capture some of the most crucial and overlooked parts of the process Using 80 black and white images to illustrate the examples it examines architectural drawing practices to elucidate the ways drawing advances the architect s imagination Emmons considers drawing practices in the Renaissance and up to the first half of the twentieth century Combining systematic analysis across time with historical explication presents the development of hand drawing while also grounding early modern practices in their historical milieu Each of the illustrated chapters considers formative aspects of architectural drawing practice such as upright elevations flowing lines and occult lines and drawing scales to identify their roots in an embodied approach to show how hand drawing contributes to the architect s productive imagination By documenting some of the ways of thinking through practices of architectural handdrawing it describes how practices can enrich the ethical imagination of the architect This book would be beneficial for academics practitioners and students of architecture particularly those who are interested in the history and significance of hand drawing and technical drawing **The Architect's Dream** Sean Pickersgill,2023-09-29 Sean Pickersgill demonstrates that the goal of creating meaningful architecture can take a variety of

critical and philosophical paths The importance of architecture as an expression of broad complex social drivers is complemented by the equally popular idea that architecture as an intellectual pursuit retains its own autonomy as a self referential culture This book uniquely places the emphasis for innovation in architecture within the domain of critical thinking generally and a specific understanding of the semantics of built form The book draws on a broad range of subject areas from film to philosophy to anthropology to mathematics and economics to show that the path to meaningful creative practice is always based in an understanding of the principal drivers for change and meaning in society It is not a simple recipe book or workshop manual for others to reproduce It requires the engaged reader to employ their own creative abilities to find what potential lies in each of the propositions and it will encourage the scholastic architect to continue to mine the rich veins of intellectual culture to demonstrate the latent purposiveness inherent in all meaningful architecture **Marcel**

Duchamp and the Architecture of Desire Penelope Haralambidou, 2017-03-02 While much has been written on Marcel Duchamp one of the twentieth century's most beguiling artists the subject of his flirtation with architecture seems to have been largely overlooked Yet in the carefully arranged plans and sections organising the blueprint of desire in the Large Glass his numerous pieces replicating architectural fragments and his involvement in designing exhibitions Duchamp's fascination with architectural design is clearly evident As his unconventional architectural influences Nicéron Lequeu and Kiesler and diverse legacy Tschumi OMA Webb Diller Scofidio and Nicholson indicate Duchamp was not as much interested in built architecture as he was in the architecture of desire re constructing the imagination through drawing and testing the boundaries between reality and its aesthetic and philosophical possibilities Marcel Duchamp and the Architecture of Desire examines the link between architectural thinking and Duchamp's work By employing design drawing and making the tools of the architect Haralambidou performs an architectural analysis of Duchamp's final enigmatic work Given 1 The Waterfall 2 The Illuminating Gas demonstrating an innovative research methodology able to grasp meaning beyond textual analysis This novel reading of his ideas and methods adds to but also challenges other art historical interpretations Through three main themes allegory visuality and desire the book defines and theorises an alternative drawing practice positioned between art and architecture that predates and includes Duchamp **Handbook of Freemasonry**, 2014-06-12 Freemasonry is the

From Diversion to Subversion David Getsy, 2011 Examines the wide ranging influence of games and play on the development of modern art in the twentieth century Provided by publisher Star Theatre William Firebrace, 2017-12-30

Most of us can recall a childhood visit to a planetarium the sense of anticipation as the room darkens The stars begin to appear as the voice of an astronomer is heard In the planetarium where the audience is transported to distant galaxies the wondrous complexity of the cosmos combines with entertainment to become a theater of the night Star Theatre explores the history of the planetarium s mix of science and spectacle William Firebrace reveals how in the planetarium the solar system and universe is demonstrated on an ever expanding scale He traces the origins of the building through history from its antecedents to its invention in Germany in the 1920s developments in the USSR and the United States to its expansion across the globe at the time of the space race and finally to the evolution of the contemporary planetarium in a time of startling astronomical and cosmological discoveries This concise and well illustrated history will appeal to astronomy lovers and those interested in architecture theater and cinema

Reading Architecture with Freud and Lacan Lorens Holm, 2022-09-30
Reading Architecture with Freud and Lacan Shadowing the Public Realm methodically outlines key concepts in psychoanalytic discourse by reading them against key modern and post modern architects It begins with what is arguably the central concept for each discipline by putting the unconscious in a dialectic relation to space Each subsequent chapter begins with a detail in architectural discourse a kind of provocation that anchors each excursion into the thought of Freud and Lacan The text is cyclical episodic and cloudlike rather than expository the intention is not simply to explain the concept of the unconscious but to different degrees perform it in the text The book offers powerful critiques of current planning practice which has no tools to address our attachment to places It concludes with powerful critiques of our incapacity to change the environmentally damaging ways we live our lives which is an effect of our incapacity to recognise the presence of the death drive in our nature The text is an extended thesis spanning the chapters that the field of the Other is the common grammar

that organises subjects into civilisations which has consequences for how we treat the public realm in architecture politics and the city The field of the Other is a slightly different slice through the urban social world It shadows but does not correspond exactly to more familiar categories like private public inside outside figure ground or piazza boulevard Reading Architecture with Freud and Lacan will be an essential resource to anyone interested in how the environment we build is a reflection of our desire Psychoanalysis is one of the great humanist discourses of the 20th century and this book will be a valuable reference to the humanist in architects planners and social scientists whether they are students professionals or amateurs It will appeal to historians of the 20th century and to psychoanalysts and architects who are interested in how their respective discourses interdigitate with each other and with other discourses
